**ford ecat:** Agents of Neoliberal Globalization Michael C. Dreiling, Derek Y. Darves, 2016-09-26 Depictions of globalization commonly recite a story of a market unleashed, bringing Big Macs and iPhones to all corners of the world. Human society appears as a passive observer to a busy revolution of an invisible global market, paradoxically unfolding by its own energy. Sometimes, this market is thought to be unleashed by politicians working on the surface of an autonomous state. This book rejects both perspectives and provides an analytically rich alternative to conventional approaches to globalization. By the 1980s, an enduring corporate coalition advanced in nearly synonymous terms free trade, tax cuts, and deregulation. Highly networked corporate leaders and state officials worked in concert to produce the trade policy framework for neoliberal globalization. Marshalling original network data and a historical narrative, this book shows that the globalizing corporate titans of the late 1960s aligned with economic conservatives to set into motion this vision of a global free market.

Benton, 2022-11-22 The decline of the U.S. textile and apparel industries between the 1940s and 1970s helped lay the groundwork for the twenty-first century's potent economic populism in America. James C. Benton looks at how shortsighted trade and economic policy by labor, business, and government undermined an employment sector that once employed millions and supported countless communities. Starting in the 1930s, Benton examines how the New Deal combined promoting trade with weakening worker rights. He then moves to the ineffective attempts to aid textile and apparel workers even as imports surged, the 1974 pivot by policymakers and big business to institute lowered trade barriers, and the deindustrialization and economic devastation that followed. Throughout, Benton provides the often-overlooked views of workers, executives, and federal officials who instituted the United States' policy framework in the 1930s and guided it through the ensuing decades. Compelling and

comprehensive, *Fraying Fabric* explains what happened to textile and apparel manufacturing and how it played a role in today's politics of anger.

Ronald Cox and Daniel Skidmore-Hess argue that U.S. policy has been motivated less by anxiety about the independence and stability of the domestic economy and more by worry about factors that might limit the participation of U.S. corporations in international markets. Connecting trends in domestic and foreign policy with the changing needs of industry, they associate increased globalization with the breakup of the liberal, New Deal coalition; the collapse of the Bretton Woods Agreement in the 1970s; the neoconservative, antiregulatory movements of the 1980s; and the rightward drift of both the Republican and Democratic Parties.

Beder shows how they created business associations and think tanks in the 1970s to drive public policy, forced the worldwide privatization and deregulation of public services in the 1980s and 1990s (enabling a massive transfer of ownership and control over essential services) and, still not satisfied, have worked relentlessly since the late 1990s to rewrite the very rules of the global economy to funnel

wealth and power into their pockets. Want a globalized and homogenized world of conflict, poverty and massive environmental degradation run by a corporate oligarchy that wipes its feet on democracy? Or a democratic world, where poverty is history, companies work for people and clean water is a right, not a privilege you pay for? Beder's message is clear - it's your world, and it's time to fight for it.

In the third edition of this American Political Science Association's Gladys Kammerer award-winner for the best book on US national policy, Destler extends his original analysis to assess the politics of the extraordinarily contentious debates over NAFTA and the Uruguay Round. He explains how free traders overcame the opposing forces represented by H. Ross Perot, Pat Buchanan and Ralph Nader to secure congressional approval for the two most important US trade agreements in the postwar period. The liberal trade regime survived these latest challenges, but Destler nevertheless argues that there is a need for reform of the policymaking system in the 1990s to advance US-led free trade negotiations in the Western Hemisphere and the Asia Pacific as well as future rounds of global liberalization. Published jointly with the Twentieth Century Fund.
