lonely planet mexico city pdf: Rethinking Juan Rulfo's Creative World Nuala Finnegan, Dylan Brennan, 2016-05-05 Though primarily known for his haunting, enigmatic novel *Pedro Páramo* and the unrelenting depictions of the failures of post-revolutionary Mexico in his short story collection, *El Llano en llamas*, Juan Rulfo also worked as scriptwriter on various collaborative film projects and his powerful interventions in the area of documentary photography ensure that he continues to inspire interest worldwide. Bringing together some of the most significant names in Rulfian scholarship, this anthology engages with the complexity and diversity of Rulfo's cultural production. The essays in the collection bring the Rulfian texts into dialogues with other cultural traditions and techniques including the Japanese Noh or mask plays and modernist experimentation in the Irish language.

They also deploy diverse theoretical frameworks that range from Roland Barthes' work on studium and punctum in photography to Henri Lefebvre's ideas on space and spatiality and the postmodern insights of Jean Baudrillard on the nature of the simulacrum and the hyperreal. In this way, innovative approaches are brought to bear on the Rulfian texts as a way of illuminating the rich tensions and anxieties they evoke about Mexico, about history, about art and about the human condition.

lonely planet mexico city pdf: The Social Sciences in the Asian Century Carol Johnson, Vera Mackie, Tessa Morris-Suzuki, 2015-09-30 In this collection of essays, we reflect on what it means to practise the social sciences in the twenty-first century. The book brings together leading social scientists from the Asia-Pacific region. We argue for the benefit of dialogue between the diverse theories and methods of social sciences in the region, the role of the social sciences in addressing real-world problems, the need to transcend national boundaries in addressing regional problems, and the challenges for an increasingly globalised higher education sector in the twenty-first century. The chapters are a combination of theoretical reflections and locally focused case studies of processes that are embedded in global dynamics and the changing geopolitics of knowledge. In an increasingly connected world, these reflections will be of global relevance

lonely planet mexico city pdf: Transmedia Geographies Kevin Glynn, Julie Cupples, 2024-12-13 Looking at the US, New Zealand, and Central America, this book considers how cultural politics has been deeply reworked in our contemporary media environment. The authors analyze how rampant technological convergence has allowed stories to spill across media platforms as well

as geographical borders and how those stories reemerge as transmediated events. The authors explore the cultural politics that have developed within this new media environment by moving across the mediated landscapes of the first, third, and fourth (Indigenous people's) worlds, which are deeply intertwined and interconnected under contemporary conditions of neoliberal globalization and emergent regimes of authoritarian postdemocracy. The book attends both to the platforms and digital networks of the new media environment and to the cultural forms and practices that have constituted television as the dominant medium of communication throughout the second half of the twentieth century. In the new media environment, transmediation works on behalf not only of those corporate megaconglomerates that have become all too familiar to media consumers around the world but also of many communities that have previously been excluded from access to the means of electronic textual production and circulation. For the latter, grassroots transmediation has become an important technique for the production of cultural citizenship.

lonely planet mexico city pdf: *Higher Education in the Global Age* Daniel Araya, Peter Marber, 2013-11-20 Discussions on globalization now routinely focus on the economic impact of developing countries in Asia, Africa, the Middle East, the former Soviet Union and Latin America. Only twenty-five years ago, many developing countries were largely closed societies. Today, the growing power of "emerging markets" is reordering the geopolitical landscape. On a purchasing power parity basis, emerging economies now constitute half of the world's economic activity. Financial markets too are seeing growing integration: Asia now accounts for 1/3 of world stock markets, more than double that of just 15 years ago. Given current trajectories, most economists predict that China and India alone will account for half of global output by 2050 (almost a complete return to their positions prior to the Industrial Revolution). How is higher education shaping and being shaped by these massive tectonic shifts? As education rises as a geopolitical priority, it has converged with discussions on economic policy and a global labor market. As part of the Routledge Studies in Emerging Societies series, this edited collection focuses on the globalization of higher education, particularly the increasing symbiosis between advanced and developing countries. Bringing together senior scholars, journalists, and practitioners from around the world, this collection explores the relatively new and changing higher education landscape.

lonely planet mexico city pdf: Contemporary Ethnic Geographies in America Christopher A. Airriess, 2015-09-28 Ethnic diversity has marked the United States from its inception, and it is impossible to separate ethnicity from an understanding of the United States as a country and “Americans” as a people. Since the 1965 Immigration and Nationality Act, the United States has experienced watershed transformations in its social, cultural, and ethnic geographies. Considering the impact of these wide-ranging changes, this unique text examines the experiences of a range of ethnic groups in both historical and contemporary context. It begins by laying out a comprehensive conceptual framework that integrates immigration theory; globalization; transnational community formation; and urban, cultural, and economic geography. The contributors then present a rich set of case studies of the key Latin American, Asian American, and Middle Eastern communities comprising the vast majority of newer immigrants. Each case offers a brief historical overview of the group’s immigration experience and settlement patterns and discusses its contemporary socioeconomic dynamics. All these communities have transformed—and been transformed by—the places in which they have settled. Exploring these changing communities, places, and landscapes, this book offers a nuanced understanding of the evolution of America's contemporary ethnic geographies.

lonely planet mexico city pdf: *Beyond Straw Men* Phaedra C. Pezzullo, 2023-08-22 Addressing plastics can feel overwhelming. Guilt, shame, anger, hurt, fear, dismissiveness, and despair abound. *Beyond Straw Men* moves beyond “hot take” or straw man fallacies by illustrating how affective counterpublics mobilized around plastics reveal broader stories about environmental justice and social change. Inspired by on- and offline organizing in the Global South and the Global North, Phaedra C. Pezzullo engages public controversies and policies through analysis of hashtag activism, campaign materials, and podcast interviews with headline-making advocates in Bangladesh, Kenya, the United States, and Vietnam. She argues that plastics have become an articulator of crisis and an entry point into the contested environmental politics of carbon-heavy masculinity, carceral policies, planetary fatalism, eco-ableism, greenwashing, marine life endangerment, pollution colonialism, and waste imperialism. Attuned to plastic attachments, *Beyond*

Straw Men illustrates how everyday people resist unsustainable patterns of the plastics-industrial complex through imperfect but impactful networked cultures of care.
