personal narrative examples pdf: Heritage and Community Engagement Emma Waterton, Steve Watson, 2013-09-13 This book is about the way that professionals in archaeology and in other sectors of heritage interact with a range of stakeholder groups, communities and the wider public. Whilst these issues have been researched and discussed over many years and in many geographical contexts, the debate seems to have settled into a comfortable stasis wherein it is assumed that all that can be done by way of engagement has been done and there is little left to achieve. In some cases, such engagement is built on legislation or codes of ethics and there can be little doubt that it is an important and significant aspect of heritage policy. This book is different, however, because it questions not so much the motivations of heritage professionals but the nature of the engagement itself, the extent to which this is collaborative or contested and the implications this has for the communities concerned. Furthermore, in exploring these issues in a variety of contexts around the world, it recognises that heritage provides a source of engagement within communities that is separate from professional discourse and can thus enable them to find voices of their own in the political processes that concern them and affect their development, identity and well-being. This book was published as a special issue of the International Journal of Heritage Studies.

personal narrative examples pdf: Oxford Textbook of Community Mental Health Graham Thornicroft, Robert E. Drake, Oye Gureje, Kim T. Mueser, George Szmukler, 2025-01-03 Community mental health has evolved as a field of practice and as a research discipline during the last 50 years. Now newer concepts, such as shared decision-making, the recovery approach, evidence-based practice, implementation science, telemedicine, and mobile device technology, are adding layers of texture to this domain. These developments require an ever more sophisticated understanding of the very latest evidence and experience in community mental health care to respond to the values, goals, needs and preferences of people with lived experience of mental health conditions. This second edition of the Oxford Textbook of Community Mental Health addresses recent changes and achievements, current controversies, and future challenges while emphasizing areas of convergence, where social values, health, medical sciences, and policy formation converge and meet. This edition also features a new section on global mental health, to emphasise what is known about the mental health gap in low- and middle-income countries, and the evidence of how to respond to these huge global challenges. Like community mental health care itself, the authors are multidisciplinary, international, and bring both clinical and scientific perspectives to this volume. This textbook will be an invaluable and authoritative source of reference for all mental health specialists; for people with mental health conditions, for staff in non-governmental and governmental organisations, and indeed for all who are dedicated to creating better mental health services and systems.

personal narrative examples pdf: Law, Narrative and Masterplot Chris Bevan, David Gurnham, 2025-06-13 The book brings together a range of socio-legal and law and humanities scholars to elaborate and explore the idea of the legal 'masterplot'. There is a class of narrative, sometimes referred to as 'masterplot' or 'metanarrative', that stands above the plethora of other stories, plots, and myths that may be found in law. This book focuses on the masterplot concept as providing a productive yet largely under-explored way of seeing, understanding, and responding to legal controversies and socio-legal problems. Masterplots may be understood as those prevalent and enduring ideas and narratives that form the basis of expectations, assumptions, stereotypes, and prejudices. In legal contexts, masterplots give shape and significance to particular experiences or issues. In aligning with them, legal arguments, judgments, and reforms gain acceptability and can be presented as authoritative, proportionate, and legitimate. Reflecting, from different legal perspectives and subdisciplines, on the masterplots at play in our current legal frameworks, this collection illuminates the often-hidden ways in which law functions. This book will appeal to students and scholars of socio-legal studies, sociology, social policy, and humanities approaches to law.
