In *Godfather*, Phillips argues that Coppola has repeatedly bucked the Hollywood factory system in an attempt to create distinct films that reflect his own artistic vision—often to the detriment of his career and finances. Phillips conducted interviews with the director and his colleagues and examined Coppola's production journals and screenplays. Phillips also reviewed rare copies of Coppola's student films, his early excursions into soft-core pornography, and his less celebrated productions such as *One from the Heart* and *Tucker: The Man and His Dream*. The result is the definitive assessment of one of Hollywood's most enduring and misunderstood mavericks.

the outsiders script play: *Play, Development, and Early Education* James Ewald Johnson, James F. Christie, Francis Wardle, 2005 Respected play scholars James Johnson and James Christie join esteemed author Francis Wardle in this exciting new text on the theorizing and research of childhood play. Play is the universal language of childhood. In order to converse with new generations of children, today's teachers must prepare themselves and learn how this form of communication can be adapted to the classroom. Play, Development, and Early Education, challenges the reader to discover what play is and how to incorporate it into a curriculum for children from toddlerhood through the primary grades. Utilizing three major ideas--the quality of play in early childhood, play as a means of self-expression, and play as a channel of communication to achieving social sense--the authors examine the beliefs, perspectives, and theories relating to play and what effects culture, media and technology have on play. In addition, the text addresses the role of parents in supporting and elaborating play, the direct connections between research and play practice, and the value of play in relation to the total development (cognitive, affective, emotional, social, and physical) of all children.

Theory, curriculum, methods, and assessment are woven into a comprehensive model for setting objectives; planning lessons, units, and courses; choosing classroom strategies; and constructing tests for some of the field's most popular and enduring programs. The reflective and integrative framework emphasizes building imagination, insight, and critical thinking into everyday classrooms; encourages problem-solving attitudes and behavior; and provokes analysis, reflection, and debate. The text includes separate chapters on teaching each of the major areas of the social studies curriculum. Throughout the text, all aspects of curriculum and instruction are viewed from a tripartite perspective that divides social studies instruction into didactic (factual), reflective (analytical), and affective (judgmental) components. These three components are seen as supporting one another, building the groundwork for taking stands on issues, past and present. At the center is the author's belief that the heart and soul of social studies instruction, perhaps all teaching, lies in stimulating the production of ideas; looking at knowledge from others' viewpoints; and formulating for oneself a set of goals, values, and beliefs that can be explained and justified in open discussion.
