**therealworl: Silence the Shadows** Sri Siva Sankaran Pathmanathan, 2022-09-04 By taking a

holistic view, 'Silence the Shadows', is the exploration of the power shadows can have in presenting an object and, setting the tone of this particular photographic work. As the title entails, this book dwells into a dark and gloomy perception of post modernism, and foreshadows the inspiration for the ensemble of these photographs. Therefore, in order to retain this element of mystery, keen viewers will notice the gradual use of shadows, hiding the subject from sight. Doing so, the overall sequence can be viewed as a deliberate intention to mask any sources of light and, draw attention to the more sinister shift in visual documentation. Mainly in the beginning pages are the images shot in open and bright places, drawing focus towards the details of the subject and landscape. Consequently, this provides an easy insight into the scenery, and leaves little to the imagination. Yet, this notion is juxtaposed with the increasing use of shadows as the book ends. From which, this tests the limits of realism, as the frame's composition becomes more disguised. Blurred outlines and vague silhouettes begin to haunt the mind, alongside feelings of discomfort and fear. This kind of attention in uncovering hidden corners, may be difficult and invites a timeliness mystery to the photos. As much as 'Silence the Shadows', is a photographic expression of the role of light and shadow, it also plays into the story-telling of an illicit affair. It can be argued that as the viewer, one is required to engage themselves into the creative journey, in order to fully immerse into this additional layer. The narrative follows a journey between two strangers, in which their secret inner lives are traced out in the sequencing of the photographs. Likewise throughout, the glimpse appearance of the mysterious couple, inevitably carry numerous rhetorical questions, and heightens the tension in their story. However, not all is revealed at the end, inviting the viewer to give their personal meaning. Interestingly, this initial perceptions likely to change as more time passes.

**therealworl: Trusted Computing Platforms** Sean W. Smith, 2013-12-11 How can one trust computation taking place at a remote site, particularly if a party at that site might have motivation to subvert this trust? In recent years, industrial efforts have advanced the notion of a trusted computing platform as a building block. Through a conspiracy of hardware and software magic, these platforms attempt to solve this remote trust problem, to preserve various critical properties against various types of adversaries. However, these current efforts are just points on a larger continuum, which ranges from earlier work on secure coprocessor design and applications, through TCPA/TCG, to recent academic developments. Without wading through stacks of theses and research literature, the general computer science reader cannot see this big picture. *Trusted Computing Platforms: Design and Applications* fills this gap. Starting with early prototypes and proposed applications, this book surveys the longer history of amplifying small amounts of hardware security into broader system security--and reports real case study experience with security architecture and applications on multiple types of platforms. The author examines the theory, design, implementation of the IBM 4758 secure coprocessor platform and discusses real case study applications that exploit the unique capabilities of this platform. The author discusses how these foundations grow into newer industrial designs, and discusses alternate architectures and case studies of applications that this newer hardware can enable. The author closes with an examination of more recent cutting-edge experimental work in this area. *Trusted Computing Platforms: Design and Applications* is written for security architects, application designers, and the general computer scientist interested in the evolution and uses of this emerging technology

engages with the idea of the Global South through cinema as a concept of resistance; as a space of decolonialisation; and as an arena of virtuality, creativity and change. It opens up a dialogue amongst scholars and filmmakers from the Global South: India, Nigeria, Colombia, Brazil, South Africa, and Egypt. The essays in the volume approach cinema as an intertwined process of both production and perception not divorced from the economic, social, political and cultural. They emphasise film as a visual medium where form, structure and content are not separable. Through a wide array of film-readings, the authors explore the concept of a southern cinematic esthetics, in particular, and the concept of the Global South in general. The volume will be of interest to scholars, students and researchers of film and media studies, critical theory, cultural studies and Global South studies.

**therealworl: The Delusion of Atheism** Patrick Mooney, 2020-09-29 Both atheistic materialism and organized religion have been the two great forces which have had the greatest mind control over Western Civilization's perception and value system. Both systems have used their power to keep humanity in subjugation and slavery through the tactics of fear and terror. Both systems have denied humanity the dignity of its true Divine identity. When social systems exist for the sole purpose of strengthening and propelling their own self-interest rather the welfare of its citizens, then the matrix in which humanity lives becomes corrupt and decadent. When a people are denied the understanding of their own self-concept as a unique person and a child of God, they become disassociated from their own holographic identity. Nature does not tolerate a vacuum. Dystopia rushes in to replace the void caused by the split or the dualism which both atheism and organized religion cause in world which some non-local Supreme Intelligence created for a more noble purpose. Atheistic Materialism denies the existence of A Creator and is pessimistically Nihilistic. Organized Religion while admitting an Omega or an absolute, divides the soul from the body and turns this world Into a vale of tears. The New Science of Quantum Physics teaches that the Whole is greater than the sum of its parts and the substrata of the atom is consciousness. Quantum teaches the Cosmos is one. There is no separation. All that exists is linked together in the one reality of interdependence, interconnection and interrelationship. Consciousness is eternal. It carries on after the atoms of our bodies have deteriorated and gone. Consciousness tells us, that despite the momentary reality of our bodies we are spiritually eternal. Materialistic Atheism is temporary and built of the false promise of economy and profit. It proposes tragedy instead of ecstasy. Consciousness joins body and soul together. Life in this world in other world is a continuum. Life here is sacred and must be lived in this respect. Whether we like it or not we are doomed to be spiritual. It is the human spirit which is primary. Consciousness teaches us this. Terribly, Atheism has inverted this. It makes the body and its temporality primary. It forgets and denies humanity's need for transcendence. Atheism stultifies. It concerns itself with grasping rather than reaching. Atheism is greedy. It is anti-compassion. This world will surely fail unless we begin to become aware that love is our highest electromagnetic capability and selfishness our lowest.
