Tips for Using the Weeks Dye Works Color Chart

To get the most out of your color planning, consider these expert tips:

1. Always Test Colors First

Order small skeins or use color charts from the company to see how shades look in person, as digital images may not capture the true tonal variations.

2. Use Color Names and Codes for Consistency

When sharing your project or ordering supplies, specify the exact color code and name to avoid confusion.

3. Buy Extra Skeins

Due to hand-dyed variations, it's wise to purchase 10-20% more skeins than your project requires to ensure matching dye lots.

4. Keep a Record

Maintain a project log noting the colors used, dye lot numbers, and any substitutions—this can be invaluable for future projects or repairs.

5. Incorporate Variegation Thoughtfully

Variegated threads can add movement and interest, but use them carefully—pair with solid colors to prevent overwhelming your design.

Mathew Scotts wife made breakfast, while his son sat nearby, waiting to be fed. Mathew hadnt slept well the night before. Hed wandered around the house a bit, which was when hed seen the shadow fall across the moon. Maybe it was a dream; that was what he told himself on his way to the office. That afternoon, Mathew was put in charge of a large amount of company money. He was supposed to deposit the money in the local bank, but he never did. That afternoon, he disappeared without a trace to be gone for a year before he returned. Upon his arrival back in Chicago, Mathew finds himself the target of an embezzlement lawsuit, but that isnt the worst of it. Mathew also comes to realize he has been abducted by aliens. How do you prove an alien abduction in a court of law? Is it possible, or will people write you off as a madman? Does Matthew have enough evidence to present to a jury in an attempt to convince them that his story is even plausible? He can only hope so. If not, he will face a guilty verdict and time in a federal prison.
