

woman with leg braces

Woman with Leg Braces: Overcoming Challenges and Embracing Life

Woman with leg braces is a phrase that often evokes a spectrum of emotions—from empathy and admiration to inspiration and hope. For many women living with leg braces, daily life involves navigating physical, emotional, and social challenges. Yet, countless women demonstrate resilience, adaptability, and strength, proving that a medical device does not define their capabilities or their spirits. This comprehensive guide explores the various aspects of being a woman with leg braces, including their types, everyday experiences, medical considerations, emotional well-being, and inspiring stories.

Understanding Leg Braces: Types and Purposes

Leg braces, also known as orthoses, are devices designed to support, align, prevent, or correct deformities or improve the function of the limbs. They come in numerous types tailored to different needs.

Types of Leg Braces

- Knee-Ankle-Foot Orthoses (KAFOs): These braces extend from the thigh down to the foot, providing support for the knee, ankle, and foot. They are often used for conditions like polio, muscular dystrophy, or severe paralysis.
- Hinged Knee Braces: Offer stability while allowing some movement, often used post-injury or surgery.
- AFOs (Ankle-Foot Orthoses): Support the ankle and foot, helping with foot drop or weakness.
- Solid Ankle or Foot Orthoses: Provide maximum stability, often used in severe cases.
- Dynamic Braces: Incorporate movable parts or joints to allow controlled movement.

Common Reasons for Wearing Leg Braces

- Congenital Conditions: Such as spina bifida or clubfoot.
- Injury or Trauma: Fractures, ligament tears, or nerve injuries.
- Neurological Disorders: Conditions like multiple sclerosis, cerebral palsy, or stroke.
- Muscular Dystrophies and Degenerative Diseases: For ongoing support and mobility.

The Daily Life of a Woman with Leg Braces

Living with leg braces can significantly influence daily routines, mobility,

and independence. Understanding these aspects provides insight into the resilience and adaptability required.

Mobility and Accessibility

Women with leg braces often develop unique strategies to navigate their environment:

- Use of Assistive Devices: Canes, walkers, or crutches to supplement braces.
- Modified Mobility Devices: Custom wheelchairs or scooters for longer distances.
- Home and Workplace Accessibility: Ramps, widened doorways, and adapted bathrooms facilitate movement.

Clothing and Personal Style

Fashion choices may adapt to accommodate braces:

- Clothing: Loose-fitting pants, skirts, or dresses that hide or accommodate braces.
- Footwear: Customized shoes or orthotic-friendly boots.
- Accessories: Fashionable braces or covers to express personal style.

Physical Activities and Exercise

Maintaining physical health is crucial:

- Rehabilitation Exercises: Tailored to strengthen muscles and improve flexibility.
- Adaptive Sports: Activities like wheelchair basketball, adapted yoga, or swimming.
- Therapy: Regular physiotherapy helps optimize mobility and reduce discomfort.

Challenges Faced

Women with leg braces often encounter challenges such as:

- Skin Irritation and Discomfort: Due to friction or pressure points.
- Fatigue: From physical exertion or wearing braces for extended periods.
- Social Stigma: Misconceptions or lack of awareness may lead to social barriers.
- Emotional Struggles: Feelings of frustration, self-consciousness, or depression.

Medical Considerations and Maintenance of Leg Braces

Proper use and maintenance of leg braces are vital for safety and effectiveness.

Proper Fitting and Adjustments

- Initial Fitting: Conducted by orthotists to ensure comfort and functionality.
- Regular Check-Ups: To adjust fit as the body changes, especially in children and adolescents.
- Signs of Wear and Tear: Cracks, loose straps, or padding breakdown require prompt attention.

Skin Care and Prevention

- Skin Checks: Daily inspection to prevent sores or irritation.
- Hygiene: Regular cleaning of the braces and skin to prevent infections.
- Padding and Liners: Use of soft materials to reduce pressure points.

Addressing Discomfort and Pain

- Consultation with Healthcare Providers: For persistent discomfort.
- Proper Usage Habits: Avoiding prolonged wear without breaks.
- Physical Therapy: To improve muscle strength and reduce strain.

Emotional and Psychological Well-being

Adjusting to life with leg braces involves more than physical adaptation; emotional resilience plays a significant role.

Overcoming Self-Image Challenges

- Building Confidence: Through support groups and counseling.
- Positive Self-Talk: Emphasizing abilities rather than limitations.
- Fashion and Personal Expression: Using clothing and accessories to showcase personality.

Support Systems

- Family and Friends: Crucial for emotional support and encouragement.
- Peer Support Groups: Connecting with others who share similar experiences.
- Counseling and Therapy: Addressing feelings of depression, anxiety, or social isolation.

Celebrating Achievements

Women with leg braces often achieve remarkable milestones:

- Returning to work or education.
- Participating in sports or hobbies.
- Volunteering or advocacy work to raise awareness.

Inspiring Stories of Women with Leg Braces

Many women have turned their challenges into sources of inspiration, breaking barriers and redefining societal perceptions.

Personal Success Stories

- Jane Doe: Overcame physical limitations to become a Paralympic athlete.
- Maria Lopez: Advocates for accessibility, inspiring others through her motivational speaking.
- Ava Smith: Started a fashion line specializing in stylish adaptive clothing.

Contributions to Society

Women with leg braces are making meaningful impacts in various fields:

- Healthcare: Orthopedic specialists, therapists, and advocates.
- Arts and Culture: Musicians, artists, and performers.
- Community Service: Leadership roles in disability rights organizations.

Resources and Support for Women with Leg Braces

Access to appropriate resources enhances quality of life:

- Medical Services: Orthopedic clinics, physiotherapy centers, and specialized hospitals.
- Support Organizations: National and local disability advocacy groups.
- Educational Materials: Guides on living with braces, adaptive exercises, and fashion tips.
- Assistive Technology Vendors: Providers of custom braces, orthotic devices, and accessories.

Tips for Women Living with Leg Braces

- Prioritize Skin Care: Daily inspections and hygiene.
- Stay Active: Engage in approved exercises to maintain strength.
- Seek Emotional Support: Join support groups or counseling.
- Educate Others: Raise awareness about your condition and needs.
- Practice Patience: Progress may be gradual; celebrate small victories.

Final Thoughts: Embracing Life Beyond Limitations

Being a woman with leg braces does not limit one's potential or happiness. With proper medical care, emotional resilience, and community support, women

can lead fulfilling, active, and inspiring lives. Society continues to evolve in understanding and accommodating diverse needs, fostering an environment where everyone can thrive regardless of physical challenges.

Frequently Asked Questions

What are common reasons a woman might need leg braces?

Common reasons include injury recovery, neurological conditions like multiple sclerosis, muscular dystrophy, cerebral palsy, or post-surgical support to improve mobility and stability.

How do leg braces help women with mobility challenges?

Leg braces provide support, stability, and alignment, helping women maintain proper posture, reduce pain, and improve walking ability during rehabilitation or daily activities.

Are there different types of leg braces suitable for women?

Yes, options include knee-ankle-foot orthoses (KAFO), ankle-foot orthoses (AFO), and custom-molded braces, tailored to individual needs and mobility goals.

What should women consider when choosing leg braces?

Factors include the specific medical condition, comfort, fit, activity level, aesthetic preferences, and guidance from healthcare professionals to ensure optimal support.

Can women with leg braces participate in sports or physical activities?

With proper guidance and specialized braces, many women can participate in adapted sports, physical therapy, and recreational activities to promote fitness and independence.

What are some challenges women face when wearing leg braces?

Challenges may include discomfort, skin irritation, difficulty with footwear, and social or psychological impacts related to body image and mobility concerns.

How can women improve comfort when wearing leg braces?

Regular fitting adjustments, wearing padded liners, choosing breathable materials, and consulting with orthotists can enhance comfort and reduce skin irritation.

Are there any advancements in leg brace technology for women?

Yes, recent innovations include lightweight materials, customizable designs, smart braces with sensors, and aesthetic options that blend support with style, improving overall user experience.

Woman with leg braces: Exploring Resilience, Innovation, and Empowerment

In an era where medical advancements and societal awareness are advancing hand in hand, the image of a woman confidently navigating her world while wearing leg braces embodies a story of resilience, innovation, and empowerment. Whether driven by congenital conditions, traumatic injuries, or neurological disorders, women with leg braces defy stereotypes and showcase the strength of the human spirit. This article delves into the multifaceted aspects of women who wear leg braces, examining medical insights, social implications, technological innovations, and personal stories that highlight their journeys.

Understanding Leg Braces: Types, Functions, and Medical Contexts

What Are Leg Braces? An Overview

Leg braces, also known as orthoses, are medical devices designed to support, align, prevent, or correct deformities and improve mobility. They are custom-

made or prefabricated devices that encompass the leg, ankle, or foot, often extending to the knee or thigh, depending on the condition they are aimed to address.

Types of Leg Braces:

- Ankle-Foot Orthoses (AFOs): Support the ankle and foot, aiding in dorsiflexion or plantarflexion, often used for foot drop or neuromuscular conditions.
- Knee-Ankle-Foot Orthoses (KAFOs): Extend above the ankle to stabilize the knee and ankle, suitable for more severe weakness or paralysis.
- Thigh-Foot Orthoses (TFOs): Cover from thigh to foot, used in specific cases such as hip dysplasia or severe limb deformities.
- Hinged or Solid Braces: Allow controlled movement or complete immobilization, respectively.

Functions of Leg Braces:

- Provide stability and support during ambulation.
- Correct deformities or misalignments.
- Prevent further injury.
- Enhance mobility and independence.

Medical Conditions Leading to Leg Brace Use

Women may require leg braces for various health conditions, including:

- Cerebral Palsy: Often causes muscle spasticity, leading to gait abnormalities corrected with orthoses.
- Multiple Sclerosis: Progressive weakness and coordination issues may necessitate leg support.
- Spinal Cord Injuries: Resulting paralysis or paresis can be managed with braces to facilitate standing or walking.
- Polio: Post-polio syndrome can weaken limb muscles, requiring orthotic support.
- Traumatic Injuries: Fractures, ligament tears, or nerve damage may lead to temporary or permanent brace use.
- Congenital Conditions: Such as clubfoot or limb length discrepancies.

Understanding these medical contexts underscores the importance of leg braces not merely as assistive devices but as tools that restore function and improve quality of life.

Personal Stories and Social Perspectives

Empowering Narratives: Women Breaking Barriers

Across the globe, numerous women wearing leg braces have become symbols of

resilience and advocacy. Their stories often involve overcoming societal stigmas, challenging physical limitations, and inspiring others.

Notable Examples:

- Athletes: Paralympic athletes who compete at the highest levels, wearing braces as part of their athletic gear, demonstrate that physical limitations do not define potential.
- Activists: Women advocating for accessibility and disability rights work tirelessly to promote inclusive environments.
- Artists and Influencers: Using their platforms to challenge stereotypes, they showcase that beauty and strength transcend physical differences.

Common Themes in Personal Narratives:

- Resilience: Facing daily challenges with determination.
- Identity: Embracing their bodies and redefining societal standards.
- Community: Finding support networks among peers and advocacy groups.
- Innovation: Utilizing advanced orthotic technology to enhance mobility.

Societal Attitudes and Challenges

Despite progress, women with leg braces still encounter societal hurdles:

- Stigma and Misconceptions: Some perceive braces as symbols of helplessness rather than empowerment.
- Accessibility Barriers: Lack of accessible infrastructure can limit participation in social, educational, or professional activities.
- Fashion and Self-Expression: Limited options for clothing and accessories that accommodate braces can impact self-esteem.

Addressing these challenges requires ongoing societal change, increased awareness, and inclusive design.

Technological Innovations and Future Directions

Advances in Orthotic Technology

The field of orthotics is rapidly evolving, driven by innovations that enhance comfort, functionality, and aesthetics.

Key Developments Include:

- Lightweight Materials: Use of carbon fiber and advanced polymers reduces device weight, improving comfort and wearability.
- Smart Orthoses: Integration of sensors and microprocessors enables real-time adjustments to support, balance, and gait patterns.
- 3D Printing: Customization at scale allows for precise fitting and rapid production, reducing costs and wait times.

- Aesthetic Customization: Personalized designs and colors empower users to express individuality.

Impact on Women:

These technological strides enable women to participate more fully in daily life, sports, and professional pursuits with less discomfort and greater confidence.

The Role of Robotics and Powered Orthoses

Recent breakthroughs include powered exoskeletons and robotic orthoses that assist or augment muscle function, promising transformative impacts:

- Restoration of Gait: Allowing women with paralysis or severe weakness to walk more naturally.
- Reduced Fatigue: Powered devices decrease effort required during ambulation.
- Rehabilitation Support: Facilitating recovery post-injury or surgery through guided movement.

While still emerging, these innovations hint at a future where leg braces are not just passive supports but active partners in mobility.

Medical and Therapeutic Considerations

Designing and Fitting Leg Braces

Proper fitting and customization are crucial for optimal functionality and comfort:

- Assessment: Involves gait analysis, muscle strength evaluation, and patient preferences.
- Customization: Tailoring the device to anatomical and lifestyle needs.
- Training: Teaching women how to don, doff, and maintain their braces effectively.

Rehabilitation and Physical Therapy

Wearing leg braces often accompanies comprehensive physical therapy:

- Gait Training: Improving walking patterns and balance.
- Muscle Strengthening: Ensuring residual muscles are active.
- Psychological Support: Addressing body image and self-esteem concerns.

These combined approaches foster independence and improve quality of life.

Conclusion: Embracing Empowerment and Inclusivity

The image of a woman with leg braces signifies more than mere mobility aid; it embodies resilience, technological progress, and societal change. As orthotic technology advances and societal perceptions evolve, women who wear leg braces are increasingly recognized for their strength, adaptability, and contributions across all facets of life. Their stories serve as powerful reminders that physical differences do not diminish human potential. Embracing inclusivity, fostering innovation, and promoting awareness are essential steps toward a future where every individual, regardless of physical challenges, can pursue their aspirations with confidence and dignity.

Woman With Leg Braces

woman with leg braces: Smart Woman's Guide to Midlife Horses Melinda Folse, 2011-05-23 WHEN YOU WERE A LITTLE GIRL, did you dream of horses, choosing Breyers over Barbies— plastic horses over plastic dolls? FOR THE PAST SEVERAL DECADES, has your life been more about taking care of others than taking care of yourself while your dreams have gathered dust on long forgotten shelves? ARE YOU AT THAT POINT IN LIFE when you've begun to wonder whether you'll ever find the courage to do all the things you wanted to do someday? Offering horses as both metaphor and solution to the natural malaise that often rears its head just about the time we blow out that midlife birthday candle, this is the book that will help you ask (and answer), What about my dreams? and Is it my turn yet? and If not now, when? and best of all, If now, how?

woman with leg braces: Painting Light in Polio's Shadow: One Artist's Struggles Sharon White Richardson, 2021-11-23 Landscape painter Sharon Richardson survived polio, a viral illness that damages or destroys the nerves essential for moving muscles. With no vaccines available, epidemics occurred unchecked. Also known as infantile paralysis, polio left youngsters crippled and dependent on leg braces, crutches, wheelchairs, and in some cases, iron lungs to breathe for them. Richardson was diagnosed with polio at the age of eight weeks in 1946. In a borrowed car, her parents drove their seriously ill infant, writhing with painful muscle spasms, a hundred miles to Mercy Hospital in Vicksburg, Mississippi. Enduring and responding to intense physical therapy treatments, she overcame the paralysis in her limbs and was released after two months. By the 1980s and 1990s, Richardson had established an enviable career with work in galleries and collections across the Southeast. Fifty-six years after recovering from paralysis, she succumbed to the muscle weakening effects of post-polio syndrome (PPS) in 2002. Approximately 25 to 40 percent of polio survivors are affected by PPS, and there is no treatment. She lost muscle strength and control in her legs, torso, and arms. This loss limited walking, increased scoliosis, and in her right arm, severely challenged Richardson's ability to paint. *Painting Light in Polio's Shadow: One Artist's Struggles* reveals how she coped with PPS setbacks and challenges and how these impediments forced her to make radical changes in her private and professional life. She was determined to do everything necessary to continue painting — which included learning to paint with her nondominant left hand.

woman with leg braces: The Woman MVP who set you FREE LuAn Mitchell, 2011-04-12

woman with leg braces: Jesus and The Time Travelers R.J. Mason, 2012-01-16 David Solomon,

an M.I.T. Professor, has perfected his dream of a Time Machine and ponders either going backward or forward in time. He is deeply concerned about the social ills throughout the world. He finally decides to transport a charismatic leader to the year 2010 without altering the written course of history. He will bring Jesus of Nazareth to the 21st Century with the help of two Harvard University Graduate Students, Brian Soranno and Martha Valdez. Martha and Brian travel back in time to the year 29 AD during the biblical days, and are tasked to find Jesus, and persuade him to visit mankind in the year 2010. Jesus meets the Pope and delivers a message from inside Vatican City to the clergy of the Catholic Church and also to the people of the world. History is made in the 21st Century, and becomes part of mankind's legacy for future descendants. If you invented a Time Machine, what would you use it for?

woman with leg braces: Female Sexuality Following Spinal Cord Injury Elle Friedman Becker, 1978

woman with leg braces: The Disabled Woman's Guide to Pregnancy and Birth Judith Rogers, 2005-06-01 The Disabled Woman's Guide to Pregnancy and Birth was a finalist for a 2005 Foreward Magazine Best Book of the Year Award and a 2006 Ben Franklin Award! This comprehensive and useful guide is based on the experiences of ninety women with disabilities who chose to have children. In order to bring an intimate focus and understanding to the issues involved in being pregnant and disabled, author Judith Rodgers conducted in-depth interviews with women with 22 different types of disabilities and with a total of 143 pregnancies. Thoroughly researched and informative, this book is a practical guide both for disabled women planning for pregnancy and the health professionals who work with them. The Disabled Woman's Guide to Pregnancy and Birth supports the right of all women to choose motherhood, and will be useful for any disabled woman who desires to have a child. The subjects covered include: an introduction to the ninety women and their specific disabilities; the decision to have a baby; parenting with a disability; emotional concerns of the mother, family and friends; nutrition and exercise in pregnancy; a look at each trimester; labor and delivery; caesarean delivery; the postpartum period; and breast-feeding. A list of references and a glossary will assist the reader in obtaining additional information and understanding medical terminology. Empathetic, balanced, comprehensive, and practical, this guide provides all the facts needed by disabled women and their families. It stresses the importance of informed communication among the pregnant woman, her family members, and health care professionals. It is the only book that answers critical questions and provides guidance for the woman with a disability facing one of the biggest challenges of her life.

woman with leg braces: The Disabled Woman's Guide to Pregnancy and Birth Otr Rogers, 2010-05 The Disabled Woman's Guide to Pregnancy and Birth is a comprehensive and useful guide based on the real-life experiences of women with disabilities who have chosen to have children. Empathetic, balanced, and practical, it is the only book that answers critical questions and provides guidance for the woman with a disability facing one of the biggest challenges of her life. Get answers to important questions such as: Will my disability affect labor and delivery? How can pregnancy complications be prevented or treated? Can my disability be inherited? What resources should I look for in choosing a hospital or clinic? Will I need a caesarean section? And much more! Thoroughly researched and informative, this book is a practical guide for both disabled women planning for pregnancy and for the health professionals who work with them.

woman with leg braces: Men Trapped in Men's Bodies Anne A. Lawrence, 2012-12-09 There are few topics in sex research as compelling and confounding to researchers, clinicians, and the general public as that of transsexualism. Upending normative notions of gender, eroticism, and identity, it poses significant scientific and clinical challenges. The book addresses a fascinating and largely unexplored topic within the study of transsexualism: The feelings and desires of conventionally masculine men who are attracted to women yet want to become women themselves. Through a collection and discussion of vivid first-person narratives, the book provides an in-depth examination of these men's unusual propensity to be sexually aroused by the thought of themselves as women and how these men's sexual feelings influence their decisions to seek or undergo sex

reassignment. These narratives about autogynephilia by autogynephilic male-to-female (MtF) transsexuals provide the first comprehensive documentation of the erotic ideation that underlies the most common form of MtF transsexualism. The narratives provide empirical evidence for Blanchard's theory of MtF transsexual motivation, and thus are of interest to researchers and theorists studying the phenomenology of MtF transsexualism. The narratives are likely to be eye-opening to psychologists, psychiatrists, physicians, and other professionals who work with MtF transsexuals: Most clinicians probably do not fully appreciate the erotic underpinnings of their clients' condition. A better understanding of their clients' autogynephilic feelings and motivations would enable these professionals to provide more empathetic and effective clinical care.

woman with leg braces: Dangerous Pilgrims Lawrence Swaim, 2016-10-28 Maitland Sutterfield is a San Francisco journalist who has just been through an exhausting divorce. He takes a writer's holiday, accepting an assignment as a reporter in Guatemala. In full flight from his personal demons, Sutterfield seeks peace in a beautiful land unlike his own - but this is Guatemala of the 1980s, and there is a brutal civil war underway. Instead of peace, Sutterfield finds the perils of love in a time of revolution, not to mention the moral quandaries of a country that is descending into madness. Maitland's main contact in Guatemala is Sofia Mendez, who takes him to a small Catholic mission in the highlands run by a Spanish-trained Jesuit priest. Maitland volunteers at the mission, convinced that the priest's ministry is a vivid example of the Liberation Theology movement about which he hopes to write the definitive book-length analysis. But complications abound when Sofia becomes Maitland's lover, before either he or Sofia have a chance to discuss the real nature of her previous vocation. Maitland is oppressively aware of the subtle but inevitable exploitation of third-world sources by first-world media, but the tables are turned as he finds himself trapped in a dangerous dilemma in which Sofia's needs dictate both their futures.

woman with leg braces: The One Year God's Great Blessings Devotional Patricia Raybon, 2011-09-29 This year, discover the blessings God has in store for you! In *The One Year God's Great Blessings Devotional*, acclaimed writer and speaker Patricia Raybon leads you on a 365-day journey through Scripture that traces the connection between God's virtues—his timeless, smart, life-giving principles—and his promised blessings to us. As you learn to live each day in a way that honors and blesses God, you'll encounter the rewards he gives us here on earth as well as in heaven.

woman with leg braces: Freeing Abigail Luann Nies, 2013-05-31 Abigail Pendergrass's dreams are destroyed when an accident claims her best friend's life and leaves her emotionally and physically paralyzed. Beauregard Winkelman, her new physical therapist, is a tall, sexy Texan whose career is on the rocks due to his scandalous past and indiscretions. Beau's last chance depends on getting Abby back on her feet. Her last chance for a real life rests in his trained hands. Tension enough without Dr. Voight threatening Beau's career and Abby's recovery.

woman with leg braces: Life Prints Mary Mason, 2001-08 Chronicles in seamless prose her own journeys as a person with a disability. She ends her memoir triumphantly, claiming proudly her identity as a feminist writer with a disability.--Library Journal

woman with leg braces: Rehabilitation Record ,

woman with leg braces: 9/11, Stealth Jihad and Obama Rohini DeSilva, 2012-08-23 I wrote this book for you. You are worried, Is Obama really a Muslim? What is happening to this country? I answer, Yes he is. He is destroying America. You exclaim, Surely not deliberately? I answer, Obama is waging a Stealth Jihad on this country. Read this book. You will see for yourself. You ask, How can you know? You're just a foreigner. I reply, I watched as Socialists destroyed Sri Lanka. Also, since I graduated with honors from Columbia Law School, I can explain clearly how Shariah is diametrically opposed to our Constitution. Islam is not a religion, but a political/ military/religious ideology that seeks to conquer America, just as it has conquered Europe. You complain, This book is too long. It is long because there is so much the media has hidden. You need to read the book and inform yourself. Then, liberal intellectuals cannot deceive you any more. You are afraid, The Media says I should not read this book because you are a racist, full of hate and an Islamophobe. I can only tell you, God gave me the courage to write this book. I know He will give you the courage to read it.

woman with leg braces: The Poison Eaters Gail Jarrow, 2020-05-19 Washington Post Best Children's Book Formaldehyde, borax, salicylic acid. Today, these chemicals are used in embalming fluids, cleaning supplies, and acne medications. But in 1900, they were routinely added to food that Americans ate from cans and jars. In 1900, products often weren't safe because unregulated, unethical companies added these and other chemicals to trick consumers into buying spoiled food or harmful medicines. Chemist Harvey Washington Wiley recognized these dangers and began a relentless thirty-year campaign to ensure that consumers could purchase safe food and drugs, eventually leading to the creation of the U.S. Food and Drug Administration, or FDA, a US governmental organization that now has a key role in addressing the COVID-19/Coronavirus pandemic gripping the world today. Acclaimed nonfiction and Sibert Honor winning author Gail Jarrow uncovers this intriguing history in her trademark style that makes the past enthrallingly relevant for today's young readers.

woman with leg braces: Voices From the Heartland Carolyn Anne Taylor, Emily Dial-Driver, Sally Emmons-Featherston, Carole Burrage, 2012-11-27 A thought-provoking collection of essays on life and living Voices from the Heartland is a celebration of women's contributions to Oklahoma's recent past. It records defining moments in women's lives—whether surviving the Oklahoma City bombing or surviving abuse—and represents a wide range of professions, lifestyles, and backgrounds to show how extraordinary lives have grown from the seeds of ordinary girlhoods. From former Cherokee principal chief Wilma Mankiller, First Lady Kim Henry, novelist Billie Letts, and prima ballerina Maria Tallchief, to OU basketball coach Sherri Coale, the authors share their personal reflections on finding balance as they look back on defining moments in their lives, mull over what they wish they had learned sooner, and convey the wisdom they've unearthed on their journeys thus far. Touching on topics from adultery to left-handedness, from losing children to losing perspective, these essays speak from the heart to reveal what it means to be an American woman today. Readers will meet activists and writers, advocates and artists—some of whom are household names, while others work outside the public eye. Voices from the Heartland speaks to readers all across America and demonstrates that women in Oklahoma represent the heart of us all.

woman with leg braces: ANASTASIA I.G. Whit, 2011-06-08 Stacie Forrester was in an automobile accident with her employer and was crippled. Her physical therapist asked her brother to help get the young girl motivated again. Insulting the young woman, the man gets more than he thought and in finding out about the young woman, wants to learn more. Unforeseen events take place putting Stacie in the limelight. How is she ever going to settle the affairs of her late employer and find a life of her own?

woman with leg braces: African Americans in Sports Carla Mooney, 2012-01-20 Author Carla Mooney explores African American involvement in sports in the United States from the nineteenth century to the present. Blacks' participation in horse racing, track and field, baseball, basketball, golf, tennis, and boxing are all covered. The book relates the accomplishments of trailblazers as well as the discrimination, insults, and physical violence they endured to open the doors of opportunity for black athletes around the country. The achievements of modern sports stars are also discussed and sidebars feature brief biographies of both pioneers and superstars.

woman with leg braces: *Female Serial Killers* Peter Vronsky, 2007-08-07 In this fascinating book, Peter Vronsky exposes and investigates the phenomenon of women who kill—and the political, economic, social and sexual implications buried with each victim. How many of us are even remotely prepared to imagine our mothers, daughters, sisters or grandmothers as fiendish killers? For centuries we have been conditioned to think of serial murderers and psychopathic predators as men—with women registering low on our paranoia radar. Perhaps that's why so many trusting husbands, lovers, family friends, and children have fallen prey to "the female monster." From history's earliest recorded cases of homicidal females to Irma Grese, the Nazi Beast of Belsen, from Britain's notorious child-slayer Myra Hindley to 'Honeymoon Killer' Martha Beck to the sensational cult of Aileen Wournos—the first female serial killer-as-celebrity—to cult killers, homicidal missionaries, and our pop-culture fascination with the sexy femme fatale, Vronsky not only challenges our ordinary standards of good and evil but also defies our basic accepted perceptions of gender role and identity.
