Understanding the Origins and Significance of Canon in D

Historical Background and Composer

The "Canon in D," officially titled Canon and Gigue in D major, was composed by Johann Pachelbel, a prolific German Baroque composer and organist of the late 17th century. Although Pachelbel's works were well-regarded during his lifetime, the "Canon in D" did not gain widespread recognition until centuries later. Its modern popularity surged in the 20th century, largely due to its melodic simplicity and harmonic richness.

Pachelbel's style is characterized by intricate counterpoint and elegant, flowing lines. The "Canon in D" exemplifies these traits, featuring a repeating bass line (ground bass) over which a series of variations and imitative voices unfold. Its structure is both repetitive and inventive, creating a hypnotic and emotionally resonant effect.

Yet, upon closer consideration, clear points of convergence emerge. Not only do many contemporary performers move easily between these two worlds, but they often do so using a shared ethos of flexibility, improvisation, curiosity, and collaboration—collaboration with composers past and present, with other performers, and with audiences. Bringing together expert scholars and performers considering a wide range of issues and case studies, *Historical Performance and New Music*—the first book of its kind—addresses the synergies in aesthetics and practices in historical performance and new music. The essays treat matters including technologies and media such as laptops, printing presses, and graphic notation; new music written for period instruments from natural horns to the clavichord; personalities such as the pioneering singer Cathy Berberian; the musically “omnivorous” ensembles A Far Cry and Roomful of Teeth; and composers Luciano Berio, David Lang, Molly Herron, Caroline Shaw, and many others. *Historical Performance and New Music* presents pathbreaking ideas in an accessible

style that speaks to performers, composers, scholars, and music lovers alike. Richly documented and diverse in its methods and subject matter, this book will open new conversations about contemporary musical life.

canon in d piano pdf: The Oxford Handbook of Algorithmic Music Alex McLean, Roger T. Dean, 2018-01-18 With the ongoing development of algorithmic composition programs and communities of practice expanding, algorithmic music faces a turning point. Joining dozens of emerging and established scholars alongside leading practitioners in the field, chapters in this Handbook both describe the state of algorithmic composition and also set the agenda for critical research on and analysis of algorithmic music. Organized into four sections, chapters explore the music's history, utility, community, politics, and potential for mass consumption. Contributors address such issues as the role of algorithms as co-performers, live coding practices, and discussions of the algorithmic culture as it currently exists and what it can potentially contribute society, education, and ecommerce. Chapters engage particularly with post-human perspectives - what new musics are now being found through algorithmic means which humans could not otherwise have made - and, in reciprocation, how algorithmic music is being assimilated back into human culture and what meanings it subsequently takes. Blending technical, artistic, cultural, and scientific viewpoints, this Handbook positions algorithmic music making as an essentially human activity.

canon in d piano pdf: Emma and Claude Debussy Gillian Opstad, 2022 Emma Bardac and her relationship with Claude Debussy take centre stage in this insightful exploration of their lives together. The singer Emma Bardac (1862-1934) has often been presented as a woman who ensnared Claude Debussy (1862-1918) because she wanted to be associated with his fame and to live a life of luxury. Indeed, in many biographies and composer-related studies of Debussy, the only mentions that she receives are brief and derogatory. Here Emma Bardac and her relationship with the composer take centre stage. The book traces Emma's Jewish ancestry and her background, the significant role of her wealthy uncle Osiris, her marriage at seventeen to the wealthy Jewish banker Sigismond Bardac, her affair with Gabriel Faur and her liaison with and subsequent marriage to Debussy. As Gillian Opstad shows, the pressure and stifling effects of domestic life on Debussy's attitude to his composing were considerable. The financial consequences of their partnership were disastrous, and their circle of close friends was small. Emma suffered physically and mentally from the tensions of the marriage, particularly money worries, and the possibility that Debussy was attracted to her older daughter. She considered divorce but supported him through his deepest depression and during the First World War until he succumbed to cancer in 1918. After Debussy's death, Emma felt driven both on his behalf and for financial reasons to further performances of the composer's works and provoked the annoyance of other musicians by having early compositions resurrected, completed and performed. In this engagingly written biography, Gillian Opstad brings to light little-known facts about Emma's background and family, advances new insights into her relationship with Debussy, and provides a glimpse of an early twentieth-century Parisian milieu that experienced wide-spread antisemitism.

canon in d piano pdf: Accenting the Classics Deborah Mawer, Barbara L. Kelly, Rachel Moore, Graham Sadler, 2023 Brings new insights to the music of well-known European composers by telling a fascinating, little-known story about French music publishing, specifically through the lens of Jacques Durand's Édition Classique. French composers, performers and musicologists acted as

editors of eighteenth- and nineteenth-century European 'classics', primarily for piano. Among these editors were Fauré, Saint-Saëns, Debussy, Ravel and Dukas; the objects of their enquiries included core works by Rameau, Bach, Mozart, Beethoven, Mendelssohn, Schumann and Chopin. Presenting six composer-editor case studies, the volume shows that the French 'accent', both musical and cultural, upon this predominantly Austro-German music was highly varied. Editorial responses range from scholarly approaches to those directed by performance or compositional agendas, and from pan-European to strongly patriotic stances. Intriguing intersections are revealed between old and new, and between French and cross-European canons. Beyond editing, the book explores the Édition's role in pedagogy and performance, including by pianists Robert Casadesus and Yvonne Loriod, and in the reassertion of contemporary French composition, especially regarding innovation around neoclassicism. It will interest a wide readership, including musicologists, performers and concert-goers, cultural historians and other humanities scholars.

canon in d piano pdf: Erik Satie Caroline Potter, 2016 Satie's music and ideas are inextricably linked with the City of Light. This book situates Satie's work within the context and sonic environment of contemporary Paris. Sunday Times Classical Music Book of the Year Erik Satie's (1866-1925) music appeals to wide audiences and has influenced both experimental artists and pop musicians. Little about Satie was conventional, and he resists classification under easy headings such as classical music. Instead of pursuing the path of a professional composer, Satie initially earned a living as a café pianist and moved in bohemian circles which prized satire, popular culture and experiment. Small wonder that his music is fundamentally new in conception. It is music which is not always designed to be listened to attentively: music which can be machine-like but is to be played by humans. For Satie, music was part of a wider concept of artistic creation, as evidenced by his collaborations with leading avant-garde artists and in works which cross traditional genre boundaries such as his textured piano pieces. His music was created in some of the most exciting and creatively stimulating environments of the late nineteenth and early twentieth century: Montmartre and Montparnasse. Paris was the artistic centre of Europe, and Satie was a notorious figure whose music and ideas are inextricably linked with the City of Light. This book situates Satie's work within the context and sonic environment of contemporary Paris. It shows that the influence of street music, musicians and poets interested in new technology, contemporary innovations and radical politics are all crucial to an understanding of Satie. Music from the ever-popular *Gymnopédies* to newly discovered works are discussed, and an online supplement features rare pieces recorded especially for the book. CAROLINE POTTER is Reader in Music at Kingston University London. A graduate in both French and Music, she has published widely on French music since Debussy and was Series Advisor to the Philharmonia Orchestra's Paris 2014-15 season.

canon in d piano pdf: Shaping Church Law Around the Year 1000 Greta Austin, 2017-05-15 This study of Burchard's 'Decretum', a popular book of Catholic canon law compiled just after the year 1000, sheds new light on the development of law and theology long before the Gregorian Reform, normally considered as a watershed in the history of the Latin Church. Practical episcopal concerns and an appreciation of new scholarly methods led Burchard to be dissatisfied

with the quality of contemporary jurisprudence and particularly with the teaching texts available to local bishops. Drawing upon new manuscript discoveries, the author shows how Burchard tried to create a new text that would address these problems. He carefully selected and compiled canons from earlier collections and then went on to tamper systematically with the texts he had chosen. By doing so, he created a book of church law that appeared to be based on indisputable authority, that was internally consistent and that was easy to apply through logical extrapolation to new cases. The present study thus provides a window into the development of legal and theological reasoning in the medieval West, and suggests that, thanks to the work of ambitious bishops, the flowering of law and theology began far earlier, and for different reasons, than scholars have heretofore supposed.

canon in d piano pdf: John Cage Anne de Fornel, 2019-02-27 John Cage (1912-1992) est l'un des compositeurs les plus connus, mais aussi les plus controversés du XXe siècle. Il a exploré des territoires inconnus en créant un répertoire pour le piano préparé, en utilisant l'électronique de manière novatrice et en introduisant l'impersonnel dans son processus de composition. Son important corpus de pièces indéterminées témoigne d'un refus des hiérarchies du monde musical de son temps. Il a contribué à élargir l'univers sonore, a développé la dimension de la performance et a donné davantage de liberté à l'interprète. Il est l'un des rares compositeurs à avoir créé parallèlement une oeuvre plastique d'une grande importance et avoir produit des installations-expositions où il s'est livré à une forme de tabula rasa. En étroite collaboration avec le chorégraphe Merce Cunningham, il a forgé un rapport radicalement nouveau entre la musique et la danse. Son insatiable curiosité l'a conduit à se tourner vers le bouddhisme zen, qui deviendra le fondement de sa création non intentionnelle. Dans cette monographie, Anne de Fornel présente à la fois l'homme et l'oeuvre en éclairant tous les aspects de sa production à partir d'une recherche de première main effectuée dans différents fonds d'archives américains. Des entretiens réalisés avec des personnalités proches, des collaborateurs de longue date et une nouvelle génération d'interprètes apportent aussi le témoignage de l'empreinte qu'a laissée John Cage dans l'art du XXe siècle. Anne de Fornel est une musicologue et pianiste franco-américaine. Elle est titulaire d'un doctorat de Musique et Musicologie de l'Université de Paris- Sorbonne (Paris IV), d'un Master de piano du CNSMD de Lyon et d'un Master spécialisé « Médias, Art et Création » de HEC Paris. Elle est l'auteur de nombreux articles et publications sur la musique et les arts plastiques des XXe et XXIe siècles.

canon in d piano pdf: Prospettive architettoniche II Graziano Mario Valenti, 2016-12-31 Le prospettive architettoniche sono un ponte che collega l'arte alla scienza, e la scienza all'arte; e questo ponte l'ha costruito la Storia. Sono un ponte perché nella realizzazione di queste rappresentazioni di architettura che 'sfondano' la compagine muraria non si possono raggiungere effetti illusionistici di sì grande potenza senza una consapevolezza delle leggi della proiezione centrale e senza una conoscenza quantomeno empirica dei complessi meccanismi della percezione visiva. Questo ponte l'ha costruito la Storia, pietra dopo pietra, dalle origini delle prime rappresentazioni prospettiche intuitive pervenute dall'epoca romana fino ad oggi, attraversando ere storiche, persone, evoluzioni culturali, nelle quali la prospettiva è via via maturata fino ad assurgere ad ambito di scambio teorico e applicativo fra pensiero artistico e pensiero scientifico. Questo secondo volume, che si pone in continuità con il primo omonimo pubblicato nel 2014, rappresenta un nuovo stato di avanzamento della ricerca, volta a definire un repertorio delle prospettive architettoniche in Italia, documentare le prospettive con le tecniche più avanzate di rilevamento e svelarne i segreti dal punto di vista della scienza della rappresentazione.
