ny subway map pdf: Maps and the Internet M.P. Peterson, International Cartographic Association, 2005-12-17 This book examines a new trend affecting cartography and geographic information science. Presenting the work of over 30 authors from 16 different countries, the book provides an overview of current research in the new area of Internet Cartography. Chapters deal with the growth of this form of map distribution, uses in education, privacy issues, and technical aspects from the point of view of the map provider - including Internet protocols such as XML and SVG. Many see the Internet as a revolution for cartography. Previously tied to the medium of paper and expensive large-format color print technology, maps had a limited distribution and use. The Internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the display. Maps have also become timelier with some maps of traffic and weather being updated every few minutes. In addition, it is now possible to access maps from servers throughout the world. Finally, the Internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access. * Provides comprehensive coverage of maps and the internet * Delivers a global perspective * Combines theoretical and practical aspects

ny subway map pdf: The Gatekeeper Kathryn Smith, 2016-09-06 Journalist Smith (A Necessary War) grants readers an unusual insider's view of F.D.R.'s political career by profiling his longtime private secretary. Marguerite 'Missy' LeHand, a young woman with a modest background, an agile intellect, a pleasant personality, and remarkable stenographer's skills, began working for F.D.R. in 1920, when he ran for vice president. Smith writes particularly well about F.D.R.'s struggle to bounce back from being struck with polio in 1921, explaining the disease and the origins of the Warm Springs, Ga., health spa that he frequented. LeHand was F.D.R.'s most constant companion during the 1920s, sparking rumors--convincingly dismissed by Smith--that they were lovers. The real core of the story is the White House years from 1933 until 1942, when LeHand helped create the vast New Deal bureaucracy. She decided who would see the president and when; today her title

would be chief of staff. LeHand worked long hours but took time to enjoy the perks of the job, including a barrage of social invitations and fawning press coverage. Though Smith overstates her claim about LeHand's importance to F.D.R. and his work as president, she delivers a fascinating account of one woman's involvement in an important administration--Publishersweekly.com.

ny subway map pdf: *Beyond Zuccotti Park* Ronald Shiffman, Rick Bell, Lance Jay Brown, Lynne Elizabeth, 2012-10-02 Protests from Tahrir Square to Zuccotti Park have brought the crisis of public space to the forefront of our attention: Where can the public congregate? How can city planning, design, and policies support First Amendment rights to public assembly and free speech? Forty experts in social science, planning, design, civil liberties, urban affairs, and the arts use the Occupy movement as a springboard for original, multidisciplinary essays that address these exigent questions. This foundational book puts issues of democracy and civic engagement back into the center of dialogue about the built environment.

ny subway map pdf: *The New York Subway Map Debate* Gary Hustwit, 2022-07 The New York Subway Map Debate documents a pivotal event in design history: the 1978 debate between designer Massimo Vignelli and cartographer John Tauranac over the future of the NYC Subway Map. The book features the full transcript and discussions that followed (made possible by the recent discovery of a lost audio tape of the event) along with never-before-seen photographs of the evening by Stan Ries. The New York Subway Map Debate opens a hyper-specific window into a moment in New York design history and the eternal battle between form and content. Edited by filmmaker and design historian Gary Hustwit, with a foreword by designer Paula Scher.

ny subway map pdf: *Underground Engineering for Sustainable Urban Development* National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee on Geological and Geotechnical Engineering, Committee on Underground Engineering for Sustainable Development, 2013-03-26 For thousands of years, the underground has provided humans refuge, useful resources, physical support for surface structures, and a place for spiritual or artistic expression. More recently, many urban services have been placed underground. Over this time, humans have rarely considered how underground space can contribute to or be engineered to maximize its contribution to the sustainability of society. As human activities begin to change the planet and population struggle to maintain satisfactory standards of living, placing new infrastructure and related facilities underground may be the most successful way to encourage or support the redirection of urban development into sustainable patterns. Well maintained, resilient, and adequately performing underground infrastructure, therefore, becomes an essential part of sustainability, but much remains to be learned about improving the sustainability of underground infrastructure itself. At the request of the National Science Foundation (NSF), the National Research Council (NRC) conducted a study to consider sustainable underground development in the urban environment, to identify research needed to maximize opportunities for using underground space, and to enhance understanding among the public and technical communities of the role of underground engineering in urban sustainability. *Underground Engineering for Sustainable Urban Development* explains the findings of researchers and practitioners with expertise in geotechnical engineering, underground design and construction, trenchless technologies, risk assessment, visualization techniques for geotechnical applications, sustainable infrastructure development, life cycle assessment, infrastructure policy and planning, and fire prevention, safety and ventilation in the underground. This report is intended to inform a future research track and will be of interest to a broad audience including those in the private and public sectors engaged in urban and facility planning and design, underground construction, and safety and security.

ny subway map pdf: Climate Change and Cities Cynthia Rosenzweig, William D. Solecki, Patricia Romero-Lankao, Shagun Mehrotra, Shobhakar Dhakal, Somayya Ali Ibrahim, 2018-03-29 The Urban Climate Change Research Network's Second Assessment Report on Climate Change in Cities (ARC3.2) is the second in a series of global, science-based reports to examine climate risk, adaptation, and mitigation efforts in cities. The book explicitly seeks to explore the implications of changing climatic conditions on critical urban physical and social infrastructure sectors and intersectoral concerns. The primary purpose of ARC3.2 is to inform the development and implementation of effective urban climate change policies, leveraging ongoing and planned investments for populations in cities of developing, emerging, and developed countries. This volume, like its predecessor, will be invaluable for a range of audiences involved with climate change and cities: mayors, city officials and policymakers; urban planners; policymakers charged with developing climate change mitigation and adaptation programs; and a broad spectrum of researchers and advanced students in the environmental sciences.

ny subway map pdf: Tell Me Who You Are Winona Guo, Priya Vulchi, 2021-02-02 An eye-opening exploration of race in America In this deeply inspiring book, Winona Guo and Priya Vulchi recount their experiences talking to people from all walks of life about race and identity on a cross-country tour of America. Spurred by the realization that they had nearly completed high school without hearing any substantive discussion about racism in school, the two young women deferred college admission for a year to collect first-person accounts of how racism plays out in this country every day--and often in unexpected ways. In *Tell Me Who You Are*, Guo and Vulchi reveal the lines that separate us based on race or other perceived differences and how telling our stories--and listening deeply to the stories of others--are the first and most crucial steps we can take towards negating racial inequity in our culture. Featuring interviews with over 150 Americans accompanied by their photographs, this intimate toolkit also offers a deep examination of the seeds of racism and strategies for effecting change. This groundbreaking book will inspire readers to join Guo and Vulchi in imagining an America in which we can fully understand and appreciate who we are.

ny subway map pdf: Fatal Airs Scott Christianson, 2010-07-15 This is the first book to examine the deadly history and potential apocalyptic future of both natural and man-made lethal gases that threaten our world. *Fatal Airs: The Deadly History and Apocalyptic Future of Lethal Gases That Threaten Our World* relates the fascinating—and appalling—stories of the discovery, development, applications, and occupational and public health hazards of natural and man-made gases. Some of these gases have figured in mass extinctions. Others have created havoc through their use in chemical warfare or their accidental release. Among the hundreds of man-made lethal gases, several have been singled out for attention, including chlorine, phosgene, mustard gas, lewisite, hydrogen cyanide, and the nerve agents tabun, sarin, soman, VX, and methyl isocyanate. The book also examines some naturally occurring gases, such as carbon dioxide, sulfur dioxide, hydrogen sulfide, carbon monoxide, methane, and radon. Colorful accounts capture the characteristics and history of each of these mysterious substances, focusing on key episodes in scientific discovery and exploration since World War I.

ny subway map pdf: The Art Teacher's Guide to Exploring Art and Design in the Community Ilona Szekely, 2021-09-09 How can community art build connection in diverse communities? Where is the art in contemporary libraries? How do you bring subway art into the classroom? Drawing on an abundance of examples from Finland, Italy, New Zealand, Spain and the USA, including the NYC 2nd Ave Subway, the Detroit's Heidelberg Project, the Favel Painting Foundation and bicycle rack sculpture, Szekely inspires readers to look beyond the classroom walls to develop meaningful art experiences for students. She shows the myriad art forms, media expressions, and design professions that have the influence and potential to shape the local environment, reaching far beyond the traditional museum and gallery venue. Underpinned by a clear philosophical foundation, the field-tested approaches show readers how to go beyond the study of reproductions or dwelling on of the masters who are framed in art museums, instead having meaningful art experiences using everyday objects and diverse collective experiences. She also shows that innovative and exciting art lessons don't need large amounts of funding, transportation or even a museum within the local community. Each chapter includes photographs, talking points and key lesson ideas along with links to further resources.
