nzt 48 real: Transformed States Martin Halliwell, 2024-11-15 Honourable Mention, British Association of American Studies Book Award Transformed States offers a timely history of the politics, ethics, medical applications, and cultural representations of the biotechnological revolution, from the Human Genome Project to the COVID-19 pandemic. In exploring the entanglements of mental and physical health in an age of biotechnology, it views the post-Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty-first century. The book draws on original research spanning the presidencies of George H. W. Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology. Some of these technologies reveal fierce ideological conflicts in the arenas of cloning, reproduction, artificial intelligence, longevity, gender affirmation, vaccination and environmental health. Interweaving politics and culture, the book illustrates how these health issues are reflected in and challenged by literary and cinematic texts, from *Oryx and Crake* to *Annihilation*, and from *Gattaca* to *Avatar*. By assessing the complex relationship between federal politics and the biomedical industry, Transformed States develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise. To that end, Martin Halliwell analyzes thirty years that radically transformed American science, medicine, and policy, positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested. Along with the two earlier books, *Therapeutic Revolutions* (2013) and *Voices of Mental Health* (2017), Transformed States is the final volume of a landmark cultural and intellectual history of mental health in the United States, journeying from the combat zones of World War II to the global emergency of COVID-19.

nzt 48 real: Pill Robert Bennett, 2019-03-21 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. "You are what you eat." Never is this truer than when we use medications, from beta blockers and aspirin to Viagra and epidurals-and

especially psychotropic pills that transform our minds as well as our bodies. Meditating on how modern medicine increasingly measures out human identity not in T. S. Eliot's proverbial coffee spoons but in 1mg-, 5mg-, or 300mg-doses, *Pill* traces the uncanny presence of psychiatric pills through science, medicine, autobiography, television, cinema, literature, and popular music. Robert Bennett reveals modern psychopharmacology to be a brave new world in which human identities—thoughts, emotions, personalities, and selves themselves—are increasingly determined by the extraordinary powers of seemingly ordinary pills. *Object Lessons* is published in partnership with an essay series in *The Atlantic*.

nzt 48 real: High Ingrid Walker, 2017-10-20 Whether drinking Red Bull, relieving chronic pain with oxycodone, or experimenting with Ecstasy, Americans participate in a culture of self-medication, using psychoactive substances to enhance or manage our moods. A “drug-free America” seems to be a fantasyland that most people don’t want to inhabit. *High: Drugs, Desire, and a Nation of Users* asks fundamental questions about US drug policies and social norms. Why do we endorse the use of some drugs and criminalize others? Why do we accept the necessity of a doctor-prescribed opiate but not the same thing bought off the street? This divided approach shapes public policy, the justice system, research, social services, and health care. And despite the decades-old war on drugs, drug use remains relatively unchanged. Ingrid Walker speaks to the silencing effects of both criminalization and medicalization, incorporating first-person narratives to show a wide variety of user experiences with drugs. By challenging current thinking about drugs and users, Walker calls for a next wave of drug policy reform in the United States, beginning with recognizing the full spectrum of drug use practices.

nzt 48 real: *Words of Weedsdom* Cee D, 2022-12-14 I had become the princess and the pea, feeling even the smallest sensations, and everything seemed to slow down around me. I was aware of everything, and every sound, smell, and movement triggered my consciousness like a factory hard-wired for efficiency. I was detached from reality, yet still in possession of my every thought and movement . . . This is what it was to be high. As an introverted millennial growing up in the nineties, being a child of divorce and mental illness made Cee D believe that self-neglect and isolation would keep her family together. Pursuing a nursing career which continued to focus on others at her own expense, she sought psychedelic distraction from a disappointing adulthood, and turned to drugs. Discovering newfound wisdom—or “weedsdom”—through a sect of spirituality that she lovingly refers to as “Bud-dism”, the author demonstrates how psychoactive substances, particularly cannabis, may shed light on our traumas, and can be used as a tool for self-actualization and the pursuit of individual happiness. Narrated with the perfect mix of humorous anecdotes and reflective wonder, *Words of Weedsdom* combines Cee D’s life-changing introduction into cannabis culture with a wider commentary on the drug, including its history, as well as its effects on the mind and body. Whether you are a cannabis user, cannabis curious, or a cannabis critic, this candid and light-hearted memoir addresses stigmatization surrounding the plant, and challenges the stereotypical image of “stoners” portrayed in popular media.

nzt 48 real: Chemically Modified Minds Matthew Hall, Mark Forshaw, Catharine Montgomery, 2020-10-30 This innovative edited collection brings together leading international academics to explore the use of various non-prescription and prescription substances. From a psychosocial perspective, the authors discuss the complex reasons behind their adoption, the ways in which they are misused, and links between use and cognitive enhancement. While studies on substance use to date have examined the aetiology and effects in the context of sporting performance, addiction and recreational use, there has been little work which explores their wider misuse to improve cognitive enhancement. With medical sociology and social psychology at its core, this important volume shows the complex reasons behind the misuse of various substances, how these are connected to contemporary desire for increased mental performance, and why the

potential health risks and possibly harmful side effects do not act as deterrents.

nzt 48 real: The Science Fiction Film in Contemporary Hollywood Evdokia Stefanopoulou, 2023-07-27 The Science Fiction Film in Contemporary Hollywood focuses on the American science fiction (SF) film during the period 2001-2020, in order to provide a theoretical mapping of the genre in the context of Conglomerate Hollywood. Using a social semiotics approach in a systematic corpus of films, the book argues that the SF film can be delineated by two semiotic squares -the first one centering on the genre's more-than-human ontologies (SF bodies), and the second one focusing on its imaginative worlds (SF worlds). Based on this theoretical framework, the book examines the genre in six cycles, which are placed in their historical context, and are analyzed in relation to cultural discourses, such as technological embodiment, race, animal-human relations, environmentalism, global capitalism, and the techno-scientific Empire. By considering these cycles -which include superhero films, creature films, space operas, among others-as expressions of the genre's basic oppositions, the book facilitates the comparison and juxtaposition of films that have rarely been discussed in tandem, offering a new perspective on the multiple articulations of the SF film in the new millennium.

nzt 48 real: Postphenomenological Investigations Rosenberger,, Peter-Paul Verbeek, 2015-05-20 Postphenomenological Investigations: Essays on Human-Technology Relations provides an introduction to the school of thought called postphenomenology and showcases projects at the cutting edge of this perspective. Postphenomenology presents a unique blend of insights from the philosophical traditions of phenomenology and American pragmatism, and applies them to studies of user relations to technologies. These studies provide deep descriptions of the ways technologies transform our abilities, augment our experience, and shape the world around us. This book proceeds with a preface by Don Ihde, postphenomenology's founder, and a detailed review of the main ideas of this perspective by the editors Robert Rosenberger and Peter-Paul Verbeek. The body of this volume is composed of twelve postphenomenological essays which reflect the expansive range, detail-orientation, and interdisciplinarity of this school of thought. These essays confront a broad assortment of topics, both abstract and concrete. Abstract topics addressed include metaphysics, ethics, methodology, and analysis of the notions of selfhood, skill training, speed, and political activism. Just a few of the concrete topics studied include human-like interactive robots, ethics education, image interpretation in radiology, science fiction tropes, transportation history, wearable computing, and organ donation protocols for brain-dead bodies. The volume concludes with constructive critiques of postphenomenology by Andrew Feenberg, Diane Michelfelder, and Albert Borgmann, all figures whose work is relevant to postphenomenological projects.

nzt 48 real: The Ethics of Superintelligent Design Paul Golata, 2018-03-07 Artificial intelligence (AI) permeates Google searches, the personal assistants in our smartphones, and is all over our newsfeeds. Watson's machine learning has already started to revolutionize many important industries including oncology, law, finance, and entertainment. The idea that man is about to

increase his immediate surroundings with exponential gains in the level of intelligence over the coming generations is based upon a technological revolution and the potential for artificial superintelligence (ASI). It is within this context that there is a prevailing need for a discussion of its ethical implications. As a Christian ethicist, Paul Golata believes that the need for this conversation to be informed by Christian principles is imperative. ASI is a move toward the proper handling of information. However, how a society interprets and applies this information is actually more pertinent than the raw amount of information it possesses. This important ethical conversation is being led by humanistic thinkers who assume that all of reality is just matter in motion and that mind is nothing more than electrochemical activity in the “wetware” of human brains. The Ethics of Superintelligent Design critically examines and challenges some of the most important trajectories of ASI while upholding the authority and inerrancy of the Bible, the supernatural creation account, a realistic view of the state of humanity, and biblical ethics.

nzt 48 real: Posthumanism in Practice Christine Daigle, Matthew Hayler, 2023-01-12 Problematic assumptions which see humans as special and easily defined as standing apart from animals, plants, and microbiota, both consciously and unconsciously underpin scientific investigation, arts practice, curation, education, and research across the social sciences and humanities. This is the case particularly in those traditions emerging from European and Enlightenment philosophies. Posthumanism disrupts these traditional humanist outlooks and interrogates their profound shaping of how we see ourselves, our place in the world, and our role in its protection. In *Posthumanism in Practice*, artists, researchers, educators, and curators set out how they have developed and responded to posthumanist ideas across their work in the arts, sciences, and humanities, and provide examples and insights to support the exploration of posthumanism in how we can think, create, and live. In capturing these ideas, *Posthumanism in Practice* shows how posthumanist thought can move beyond theory, inform action, and produce new artefacts, effects, and methods that are more relevant and more useful for the incoming realities for all life in the 21st century.

nzt 48 real: *Artificial* Amy Kurzweil, 2023-10-17 Winner of the Living Now Book Award Finalist for the American Book Fest Best Book Awards A visionary story of three generations of artists whose search for meaning and connection transcends the limits of life How do we relate to—and hold—our family's past? Is it through technology? Through spirit? Art, poetry, music? Or is it through the resonances we look for in ourselves? In *Artificial*, we meet the Kurzweils, a family of creators who are preserving their history through unusual means. At the center is renowned inventor and futurist Ray Kurzweil, who has long been saving the documents of his deceased father, Fredric, an accomplished conductor and pianist from Vienna who fled the Nazis in 1938. Once, Fred's life was saved by his art: an American benefactor, impressed by Fred's musical genius, sponsored his emigration to the United States. He escaped just one month before Kristallnacht. Now, Fred has returned. Through AI and salvaged writing, Ray is building a chatbot that writes in Fred's voice, and he enlists his daughter, cartoonist Amy Kurzweil, to help him ensure the immortality of their family's fraught inheritance. Amy's deepening understanding of her family's traumatic uprooting resonates with the creative life she fights to claim in the present, as Amy and her partner, Jacob, chase jobs, and each other, across the country. Kurzweil evokes an understanding of accomplishment that centers conversation and connection, knowing and being known by others. nzt 48 real: Sophie's Thoroughway Jules Smith, 2014-09-28 Sophie needs to find a way to

balance the chaotic route she has been forced to walk down... a son she cannot control – diagnosed with Aspergers and PDA (Pathological Demand Avoidance), coinciding with the onset of raging hormones; a daughter she has to ensure gets attention so she doesn't feel left out; and an ex-husband who comes and goes as he pleases. At the same time, Sophie struggles to hold down her job as an interiors writer for a magazine. Her rambling house is in desperate need of upkeep – her garden is full of overgrowing plants; there's no end of laundry, cleaning and cooking and there's not nearly enough money. Only wine, chocolate and good friends keep Sophie from tipping over the edge. That, and the mysterious voice of her cyber love. Could he be the saviour she's been waiting for? Or has he been in front of her the whole time? Told from the perspective of a mother who has to battle through life on a daily basis – fighting hard to keep her son in school, dealing with her marriage breaking up, giving her daughter her attention, maintaining her job and exploring her future love life. Sophie's Throughway is a heartwarming read, written to inspire empathy and compassion within the reader, as well as increasing understanding for a condition that does not have enough public recognition.
