sample jeopardy questions: Question Answering over Text and Knowledge Base Saeedeh Momtazi, Zahra Abbasiantaeb, 2022-11-04 This book provides a coherent and complete overview of various Question Answering (QA) systems. It covers three main categories based on the source of the data that can be unstructured text (TextQA), structured knowledge graphs (KBQA), and the combination of both. Developing a QA system usually requires using a combination of various important techniques, including natural language processing, information retrieval and extraction, knowledge graph processing, and machine learning. After a general introduction and an overview of the book in Chapter 1, the history of QA systems and the architecture of different QA approaches are explained in Chapter 2. It starts with early close domain QA systems and reviews different generations of QA up to state-of-the-art hybrid models. Next, Chapter 3 is devoted to explaining the datasets and the metrics used for evaluating TextQA and KBQA. Chapter 4 introduces the neural and deep learning models used in QA systems. This chapter includes the required knowledge of deep learning and neural text representation models for comprehending the QA models over text and QA models over knowledge base explained in Chapters 5 and 6, respectively. In some of the KBQA models the textual data is also used as another source besides the knowledge base; these hybrid models are studied in Chapter 7. In Chapter 8, a detailed explanation of some well-known real applications of the QA systems is provided. Eventually, open issues and future work on QA are discussed in Chapter 9. This book delivers a comprehensive overview on QA over text, QA over knowledge base, and hybrid QA systems which can be used by researchers starting in this field. It will help its readers to follow the state-of-the-art research in the area by providing essential and basic knowledge.

sample jeopardy questions: Indirect Questioning in Sample Surveys Arijit Chaudhuri, Tasos C. Christofides, 2013-08-31 Indirect questioning is a crucial topic in surveys of human populations. When the issue is about a stigmatizing characteristic (for example about illegal drug

use), standard survey methodologies are destined to fail because, as expected, people are not willing to reveal incriminating information or information violating their privacy. Indirect questioning techniques have been devised so that the privacy of participants in a sample survey is protected and at the same time good estimates of certain parameters (e.g. the percentage of people in a certain community who use illegal drugs) can be delivered. The topic is modern and still under development. Indirect Questioning in Sample Surveys represents a collection of the most important and recent techniques of indirect questioning, including various versions of randomized response, the item count technique, the nominative technique, the three-card method, non-randomized response models and negative surveys, while also exploring the key aspect of protecting privacy.

sample jeopardy questions: Reinventing Racism Jonathan D. Church, 2020-12-03 The theory of white fragility is one of the most influential ideas to emerge in recent years on the topics of race, racism, and racial inequality. White fragility is defined as an unwillingness on the part of white people to engage in the difficult conversations necessary to address racial inequality. This "fragility" allegedly undermines the fight against racial inequality. Despite its wide acclaim and rapid acceptance, the theory of white fragility has received no serious and sustained scrutiny. This book argues that the theory is flawed on numerous fronts. The theory functions as a divisive rhetorical device to shut down debate. It relies on the flawed premise of implicit bias. It posits a faulty way of understanding racism. It has serious methodological problems. It conflates objectivity and neutrality. It exploits narrative at the expense of facts. It distorts many of the ideas upon which the theory relies. This book also offers a more constructive way to think about Whiteness, white privilege, and "white fragility," pointing us to a more promising vision for addressing racial inequality.
