showbi: Thailand: Deadly Destination John Stapleton, 2014-11-17 The daily robbing, bashing, drugging, extortion and murder of foreign tourists on Thai soil, along with numerous scandals involving unsafe facilities and well established scams, has led to frequent predictions that Thailand's multi-billion dollar tourist industry will self-destruct. Instead tourist numbers more than doubled in the decade to 2014. The world might not have come to the hometowns of the many visitors fascinated by Thailand, but it certainly came to the Land of Smiles. While the Thai media is heavily censored, and bad news stories about tourists suppressed, nonetheless there is more than enough evidence to demonstrate that something has gone seriously awry with the nation's tourist industry. In 2014, just as in the years preceding it, there were train, bus, ferry, speedboat, motorbike and car accidents, murders, knifings, unexplained deaths, numerous suicides, diving accidents, robberies gone wrong, anonymous bodies washing up on the shores and a string of alcohol and drug related incidents. Thailand had a dying king and serious succession problems, weak democratic institutions, an economy slipping into recession, faced issues of corruption across many of its key services and was host to international crime syndicates, awash with despised foreigners and drifting perilously towards civil war. Tourists choose one destination over another for a number of reasons, most of which Thailand scores highly on. But on the core issue of tourist safety, Thailand scores very badly indeed.

showbi: In Concert Philip Auslander, 2021-01-04 The conventional way of understanding what musicians do as performers is to treat them as producers of sound; some even argue that it is unnecessary to see musicians in performance as long as one can hear them. But musical performance, counters Philip Auslander, is also a social interaction between musicians and their

audiences, appealing as much to the eye as to the ear. In *Concert: Performing Musical Persona* he addresses not only the visual means by which musicians engage their audiences through costume and physical gesture, but also spectacular aspects of performance such as light shows. Although musicians do not usually enact fictional characters on stage, they nevertheless present themselves to audiences in ways specific to the performance situation. Auslander's term to denote the musician's presence before the audience is musical persona. While presence of a musical persona may be most obvious within rock and pop music, the book's analysis extends to classical music, jazz, blues, country, electronic music, laptop performance, and music made with experimental digital interfaces. The eclectic group of performers discussed include the Beatles, Miles Davis, Keith Urban, Lady Gaga, Nicki Minaj, Frank Zappa, B. B. King, Jefferson Airplane, Virgil Fox, Keith Jarrett, Glenn Gould, and Laurie Anderson.
