yearbook messages from principals: Boom Kids James A. Onusko, 2021-07-06 The baby boomers and postwar suburbia remain a touchstone. For many, there is a belief that it has never been as good for youngsters and their families, as it was in the postwar years. Boom Kids explores the triumphs and challenges of childhood and adolescence in Calgary's postwar suburbs. The boomers' impact on fifties and sixties Canadian life is unchallenged; social and cultural changes were made to meet their needs and desires. While time has passed, this era stands still in time—viewed as an idyllic period when great hopes and relative prosperity went hand in hand for all. Boom Kids is organized thematically, with chapters focusing on: suburban spaces; the Cold War and its impact on young people; ethnicity, "race," and work; the importance of play and recreation; children's bodies, health and sexuality; and the night, resistances and delinquency. Reinforced throughout this manuscript is the fact that children and adolescents were not only affected by their suburban experiences, but that they influenced the adult world in which they lived. Oral histories from former community members and archival materials, including school-based publications, form the backbone for a study that demonstrates that suburban life was diverse and filled with rich experiences for youngsters.

yearbook messages from principals: Remaining and Becoming Shelley Roberts, 2000-12-01 Remaining and Becoming: Cultural Crosscurrents in an Hispano School deals with the politics of identity and the concept of boundaries during a time of rapid change. It investigates how

the role of schooling for Hispanos in the Norteño School District (a pseudonym) in Northern New Mexico--a public school district, not fully consolidated until 1972--has changed significantly over the past three generations. Today, the Hispanos, a minority in the outside world but a majority in their own, are debating how the functions of the school should respond to the changes resulting from the coming of public education to their region. But the contemporary story of education in Norteño has much deeper roots in the political, religious, and cultural history of Northern New Mexico--a region where, over a period of several centuries, Spain, Mexico, and the United States each have claimed sovereignty, with differing goals for and attitudes about the welfare of the people. This study is an analysis of the ambiguity of education, the losses and gains that are its consequences, the lingering doubts about the past, and the questions about what future education can and should serve. It is about asking: Is what the students are learning worth as much as what they are forgetting? How does schooling affect the evolving process of asserting, renegotiating, and defending an Hispano identity? By exploring historical factors and ideologies of a particular school within a particular community, Roberts seeks to understand community expectations for the school as a fitting place for its children. The goal is not to generalize from the particular to the universal, but to join others in suggesting that we move away from discussing students in a generic sense and focus instead on looking at them in relation to the community in which they live. The fascinating and largely unknown story this book tells will be of interest to educators, researchers, and students across a range of fields, including sociology of education, educational anthropology, multicultural education, ethnic studies, Chicano studies, and qualitative research in education.

yearbook messages from principals: **School Yearbook** Kate Eichhorn, 2025-11-10 Why school yearbooks—as frivolous and cringey as they are—are far more than just objects of nostalgia. We’re all familiar with the embarrassment that washes over us when recalling our high school yearbooks. Questionable fashion choices, gravity-defying hair, a melodramatic quote—what were we thinking? Even as school yearbooks decline in popularity among contemporary teens, they continue to impact our lives in shocking ways. Collected, digitized, aggregated, and recombined in ways that would have been impossible to imagine just a few decades ago, yearbooks are no longer bound personal archives of adolescent memories. In the twenty-first century, they are shaping our lives in surprising and sometimes disturbing ways. And what could be a more fitting afterlife for these cringey books? In *School Yearbook*, cultural critic Kate Eichhorn investigates this ubiquitous object. On the surface, school yearbooks are easily dismissed as innocuous collections of embarrassing photographs and cheesy affirmations, but as Eichhorn reveals, there has never been anything innocent about the school yearbook tradition. Since the early twentieth century, yearbooks have circulated as forms of public relations, propaganda, and hate speech. They have been routinely used by police detectives, private investigators, and even the FBI to identify and profile suspects. With over half a million yearbooks now available online, these books have also acquired the power to continue shaping our lives long after graduation. Would-be landlords, employers, and even creditors can now turn to data culled from their embarrassing pages to make judgments about who we are and what we merit. In a digital era, school yearbooks have acquired the ability to keep judging us in perpetuity. Both timely and insightful, *School Yearbook* explores how these books have always been used to rank and judge us.

yearbook messages from principals: My Name Is Iran Davar Ardalan, 2010-07-01 A century of family tales from two beloved but divided homelands, Iran and America Drawing on her remarkable personal history, NPR producer Davar Ardalan brings us the lives of three generations of women and their ordeals with love, rejection, and revolution. Her American grandmother's love affair with an Iranian physician took her from New York to Iran in 1931. Ardalan herself moved from San Francisco to rural Iran in 1964 with her Iranian American parents who barely spoke Farsi. After her parents' divorce, Ardalan joined her father in Brookline, Massachusetts, where he had gone to make a new life; however improbably, after high school, Ardalan decided to move back to an Islamic Iran. When she arrived, she discovered a world she hardly recognized, and one which demands a near-complete renunciation of the freedoms she experienced in the West. In time, she and her young family make the opposite migration and discover the difficulties, however paradoxical, inherent in living a free life in America.

yearbook messages from principals: The Savvy Principal Jody Capelluti, 2013-12-05 This book is a manual on how to become a streetwise and savvy principal. These leaders do things very differently from other principals and what they do that distinguishes them is not found in studies on effective principals. There are two reasons for this: 1.) researchers aren't asking the right questions and 2.) even if researchers were asking the right questions, principals would be reluctant to reveal their responses because of the controversial nature. This book provides specific and candid suggestions and ideas for becoming a standout leader. It recommends actions and strategies to positively influence others behavior. It also suggests tactics and actions to avoid. Because, in reality, if principals are successful: students, teachers, schools and superintendents will benefit. And if this is the case; it naturally follows that school boards, parents and communities will be proud and pleased with what is happening in their schools. Everyone wins when the principal is successful.

yearbook messages from principals: The Heart of School Leadership Mary Louise Stahl, 2022-10-17 All school leaders are required to earn an educational leadership degree and certificate before they begin their work in a school. The aspect they sometimes don't teach in these programs has to do with the heart of school leadership, which can be the most important part. Most school administrators begin the work of school leadership from an emotional place, which is similar to why people want to be a teacher. Sometimes you have an unforgettable teacher or principal who you want to emulate, and sometimes you want to do things better, do things differently. It doesn't matter how you get there; it matters that you begin with the heart, and let it lead most of your work. Of

course, all work cannot be accomplished from an emotional base, but how we navigate our relationships with teachers, students, and parents has to start there. This leadership book is organized into sections that focus on work involving the heart, work involving the head, and work that spans both categories. It's a love song to school leadership.

yearbook messages from principals: *Do Teachers Wish to Be Agents of Change?* Allen Menlo, LeVerne Collet, 2015-04-27 This study surveyed principals and teachers in ten countries to compare principal and teacher attitudes toward the involvement of teachers in several change and development responsibilities. The participating countries were: Australia, Canada, China, Hungary, Israel, Japan, Netherlands, Singapore, South Africa, and United States. Each country administered mirror versions of a questionnaire to samples of at least 50 principals and at least 100 teachers. The questionnaires listed twenty items describing change responsibilities in which teachers might become involved. For each item, both principals and teachers assigned two teacher involvement ratings: their personal preference, and their estimate of the preference of their role counterpart. These involvement ratings produced four dependent variables: Principal Preferences, Principal Estimates, Teacher Preferences, and Teacher Estimates. For each variable, item responses were clustered to form index sub-scores that measured attitudes toward five education domains: Administration and Coordination, Human Relations, Teacher Support, Classroom Learning, and Evaluation. Systematic planned comparisons were conducted to determine the most important principal-teacher issues within and between countries, and how issues change across index domains. Typical results indicate low awareness of each other's aspirations and expectations. The first and last chapters of this book discuss the potential of teacher leaders to become agents of change within their own schools. Several social-psychological competencies are then described for these teachers in their work.
