a study on the process of legal translation pdf free: *Carbon-Free Shipping and Shipping Carbon* Stephen Girvin, Vibe Ulfbeck, 2024-08-22 This book explores the private law implementation of the new international and EU regulatory framework targeting decarbonisation in the shipping industry. Compared with other sectors, the shipping industry has traditionally been labelled a 'slow mover' concerning the sustainability agenda. However, new regulatory measures on carbon reduction both internationally and in the EU require fundamentally new developments in the industry. This book focuses on the goal of carbon reduction from a private law perspective and considers how the new regulatory framework can be implemented in the shipping industry. This book studies existing contractual provisions in charterparties and bills of lading alongside new contractual model clauses designed to facilitate carbon reduction. It considers how the new clauses should be interpreted, whether they will transform traditional shipping contracts into more collaborative contracts, and how they will interact with other clauses in the contract and with other contracts in the supply chain. The contractual analysis is considered in context, reflecting on enforcement issues, such as Port State Control (PSC), the Poseidon Principles, and climate change litigation. The book also analyses the related topic of shipping contracts for carbon storage as a necessary means of meeting carbon reduction targets. The book is intended to pave the way for understanding how core shipping contracts can work in this new context and the extent to which the new types of clauses will profoundly transform contracts. It presents contributions by experienced and younger academics and practitioners from Asian, European and Scandinavian legal systems.

a study on the process of legal translation pdf free: The Politics of International Economic Law Tomer Broude, Marc L. Busch, Amelia Porges, 2011-03-07 How do politics and international economic law interact with each other? Financial crises and shifts in global economic patterns have refocused our attention on how the fingerprints of the 'visible hand' can be seen all over the institutions that underpin the rules of globalization. From trade and investment to finance, governments are under pressure to enforce, resist and rewrite international economic law. Lawyers have seldom given enough attention to the influence of politics on law, whereas political scientists have had an on-again, off-again fascination with how the law influences relations among states. This book leads the way toward filling this interdisciplinary gap, through a series of important studies written by leaders in the field on specific problems in international economic relations. The book demonstrates a variety of ways in which the international political-economic nexus may be researched and understood.
