field of dreams american culture assignment cultural geography pdf: Culture Works Arlene Dávila, 2012-04-16 Culture Works addresses and critiques an important dimension of the "work of culture," an argument made by enthusiasts of creative economies that culture contributes to the GDP, employment, social cohesion, and other forms of neoliberal development. While culture does make important contributions to national and urban economies, the incentives and benefits of participating in this economy are not distributed equally, due to restructuring that neoliberal policies have wrought from the 1980s on, as well as long-standing social structures, such as racism and classism, that breed inequality. The cultural economy promises to make life better, particularly in cities, but not everyone can take advantage of it for decent jobs. Exposing and challenging the taken-for-granted assumptions around questions of space, value and mobility that are sustained by

neoliberal treatments of culture, *Culture Works* explores some of the hierarchies of cultural workers that these engender, as they play out in a variety of settings, from shopping malls in Puerto Rico and art galleries in New York to tango tourism in Buenos Aires. Noted scholar Arlene Dávila brilliantly reveals how similar dynamics of space, value and mobility come to bear in each location, inspiring particular cultural politics that have repercussions that are both geographically specific, but also ultimately global in scope.

field of dreams american culture assignment cultural geography pdf: Singlewide Sonya Salamon, Katherine MacTavish, 2017-10-15 In Singlewide, Sonya Salamon and Katherine MacTavish explore the role of the trailer park as a source of affordable housing. America's trailer parks, most in rural places, shelter an estimated 12 million people, and the authors show how these parks serve as a private solution to a pressing public need. Singlewide considers the circumstances of families with school-age children in trailer parks serving whites in Illinois, Hispanics in New Mexico, and African Americans in North Carolina. By looking carefully at the daily lives of families who live side by side in rows of manufactured homes, Salamon and MacTavish draw conclusions about the importance of housing, community, and location in the families' dreams of opportunities and success as signified by eventually owning land and a conventional home. Working-poor rural families who engage with what Salamon and MacTavish call the mobile home industrial complex may become caught in an expensive trap starting with their purchase of a mobile home. A family that must site its trailer in a land-lease trailer park struggles to realize any of the anticipated benefits of homeownership. Seeking to break down stereotypes, Salamon and MacTavish reveal the important place that trailer parks hold within the United States national experience. In so doing, they attempt to integrate and normalize a way of life that many see as outside the mainstream, suggesting that families who live in trailer parks, rather than being trailer trash, culturally resemble the parks' neighbors who live in conventional homes.

field of dreams american culture assignment cultural geography pdf: Fencing in Democracy Miguel Díaz-Barriga, Margaret E. Dorsey, 2020-01-31 Border walls permeate our world, with more than thirty nation-states constructing them. Anthropologists Margaret E. Dorsey and Miguel Díaz-Barriga argue that border wall construction manifests transformations in citizenship practices that are aimed not only at keeping migrants out but also at enmeshing citizens into a wider politics of exclusion. For a decade, the authors studied the U.S.-Mexico border wall constructed by

the Department of Homeland Security and observed the political protests and legal challenges that residents mounted in opposition to the wall. In *Fencing in Democracy* Dorsey and Díaz-Barriga take us to those border communities most affected by the wall and often ignored in national discussions about border security to highlight how the state diminishes citizens' rights. That dynamic speaks to the citizenship experiences of border residents that is indicative of how walls imprison the populations they are built to protect. Dorsey and Díaz-Barriga brilliantly expand conversations about citizenship, the operation of U.S. power, and the implications of border walls for the future of democracy.

field of dreams american culture assignment cultural geography pdf: Transmedia Television Elizabeth Evans, 2011-02-25 The early years of the twenty-first century have seen dramatic changes within the television industry. The development of the internet and mobile phone as platforms for content directly linked to television programming has offered a challenge to the television set's status as the sole domestic access point to audio-visual dramatic content. Viewers can engage with 'television' without ever turning a television set on. Whilst there has already been some exploration of these changes, little attention has been paid to the audience and the extent to which these technologies are being integrated into their daily lives. Focusing on a particular period of rapid change and using case studies including *Spooks*, *24* and *Doctor Who*, Transmedia Television considers how the television industry has exploited emergent technologies and the extent to which audiences have embraced them. How has television content been transformed by shifts towards multiplatform strategies? What is the appeal of using game formats to lose oneself within a narrative world? How can television, with its ever larger screens and association with domesticity, be reconciled with the small portable, public technology of the mobile phone? What does the shift from television schedules to online downloading mean for our understanding of 'the television audience'? Transmedia Television will consider how the relationship between television and daily life has been altered as a result of the industry's development of emerging new media technologies, and what 'television' now means for its audiences.
