leadership manual arabic english pdf: Routledge Handbook on China-Middle East Relations Jonathan Fulton, 2021-12-27 This handbook brings together a mix of established and emerging international scholars to provide valuable analytical insights into how China's growing Middle East presence affects intra-regional development, trade, security, and diplomacy. As the largest extra-regional economic actor in the Middle East, China is the biggest source of foreign direct investment into the region and the largest trading partner for most Middle Eastern states. This portends a larger role in political and security affairs, as the value of Chinese assets combined with a growing expatriate population in the region demands a more proactive role in contributing to regional order. Exploring the effect of these developments, the expert contributors also consider the reverberations in great power politics, as the United States, Russia, India, Japan, and the European Union also have considerable interests in the region. The book is divided into four sections: • Historical and policy context • State and regional case studies • Trade and development • International relations, security, and diplomacy. leadership manual arabic english pdf: Transnational English Language Assessment Practices in the Age of Metrics Osman Z. Barnawi, Mohammed S. Alharbi, Ayman A. Alzahrani, 2022-12-26 This edited volume examines how transnational English language assessment practices are envisioned, enacted, and justified by different stakeholders, including students, teachers, and universities in different geographical contexts, and what would be the multi-level consequences of such practices. Bringing together diverse perspectives from across the Global South and Global North, the book argues that the field of English language assessment has always been transnational,

despite an absence of a research that explicitly examines English language assessment practices in relation to transnationalism. The contribution of this volume lies in filling in this critical scholarly gap. Through a wide set of epistemological, theoretical, and pedagogical interventions along with methodological orientations and analytical frameworks, the chapter authors question the social, economic, political, linguistic, and pedagogical consequences of transnational English language assessment practices in higher education (HE) settings and contexts. Offering fresh perspectives on English language assessment practices in relation to transnationalism, this book will be of great interest to researchers, academics, and post-graduate students in the fields of applied linguistics, Teaching English to Speakers of Other Languages (TESOL), and language assessment more broadly.

leadership manual arabic english pdf: *Handbook of Research on Transformative and Innovative Pedagogies in Education* Keengwe, Jared, 2022-05-13 Various pedagogies, such as the use of digital learning in education, have been used and researched for decades, but many schools have little to show for these initiatives. This contrasts starkly with technology-supported initiatives in other fields such as business and healthcare. Traditional pedagogies and general digital technology applications have yet to impact education in a significant way that transforms learning. A primary reason for this minimal impact on learning is that digital technologies have attempted to make traditional instructional processes more efficient rather than using a more appropriate paradigm for learning. As such, it is important to look at digital technology as a partner and use transformative applications to become partners with students (not teachers) to empower their learning process both in and out of school. The Handbook of Research on Transformative and Innovative Pedagogies in Education is a comprehensive reference that identifies and justifies the paradigm of transformative learning and pedagogies in education. It provides exemplars of existing transformative applications that, if used as partners to empower student learning, have the potential to dramatically engage students in a type of learning that better fits 21st century learners. Covering topics such as gamification, project-based learning, and professional development, this major reference work is an essential resource for pre-service and in-service teachers, educational technologists, instructional designers, educational administration and faculty, researchers, and academicians seeking pedagogical models that inspire students to learn meaningfully.

Employing a qualitative phenomenological approach which draws on a rich set of data from questionnaires to focus groups with Emirati students, Emirati schoolteachers, and expatriate university teachers, Hopkyns problematizes the common binary East-West paradigm focused on the tension between the use of English and Arabic in the UAE. Key issues emerging from the resulting analysis include the differing attitudes towards English and in particular, English Medium Instruction, the impact of this tension on identities, and the ways in which the two languages are employed in distinct ways on an everyday scale. The volume will particularly appeal to students and scholars interested in issues around language and identity, language policy and planning, multilingualism, translanguaging, and language in education.
