quality control system pdf: Proceedings of the International Conference Theory and Applications in the Knowledge Economy TAKE 2017 Blazenka Knezevic, Gaby Neumann , 2017-07-08 Foreword A famous Portuguese Poet once said around one hundred years ago; "before I was born all the words that should save the Humanity had already been written.., the only thing that was missing was to save Humanity." Fast forward to the 21st century services led and knowledge based economy, and we have myriads of theoretical study about the decisive assets - namely intangibles. Those analysis are made in several perspectives, namely Human Resources, Knowledge Management, Intellectual Capital, and also many sectorial perspectives like Trade, Economics, Logistics, Social Policy etc. However, today the question about the applicability of all these studies remains unsolved. So, it like, many of the words that will save the Knowledge Economy have already been written, all we need is to save the Knowledge Economy...Or is it not? The idea behind TAKE Conference was to provide a multidisciplinary forum in which those multiple perspectives will come together. We believe it is a fruitful operation and we intend to continue the exercise in the future. The problem of the relation between theory and practice in the knowledge economy is getting more important and not less important with the development of the BRICS and other nations. TAKE main question will be one of the problems of the 21st century. Following the promising start of TAKE 2016 in Aveiro, Portugal, TAKE 2017 was organized by the Faculty of Economics of Zagreb University, around Prof. Blazenka Knezevic. I would like to thank her and her team for the massive effort in putting TAKE 2017 together. It will be a very nice and memorable conference. I would like also to thank the 5 keynotes, the special sessions and workshop organizes, the authors of the 60 papers and 5 posters, the stream leaders, the reviewers and the sponsors for the efforts. And to the 90 participants from 20 countries: Austria, Bosnia-Herzegovina, Canada, Croatia, Germany, Hong Kong, Hungary, Netherlands, Mexico, Portugal, Poland, Romania, Russia, South Africa, Serbia, Slovakia, Spain, Thailand, United Kingdom, United States. A special word to Prof. Gaby Neumann from Wildau

who organized the Proceedings. Let us make TAKE 2017 a great occasion and help save the knowledge economy a bit. Eduardo Tomé, Conference Chair Zagreb, July 2017

quality control system pdf: Geographical Indication Protection in India Niharika Sahoo Bhattacharya, 2022-09-13 This book is a unique compilation of comprehensive works covering the potentials, challenges, and realities of geographical indications from an Indian perspective. The book encompasses critical studies on legal, regulatory, and institutional frameworks and debates surrounding geographical indications. The concept of geographical indication has not received paramount importance in India compared to the other forms of intellectual property rights like patents and trademarks, while GI is becoming critical in national and international discourses. It aims at presenting both national and international situations and discussions, which will appeal to readers worldwide. This book in its first part elaborately deals with the genesis of the GI Act, and then it goes on to analyze both substantive as well as procedural aspects of the registration under the Indian GI Act and tries to identify the discrepancy and gaps in the laws. Also, a comparative perspective has been built by analyzing the GI laws and regulations of some developed countries with that of India. The challenges in existing regulation for quality control and enforcement of GI products in the Indian GI Act have been dealt comprehensively by the authors which are critical in achieving the stated objectives of the Act. The book also focuses on the role of geographical indication in the socio-economic development of rural India. The authors have illustrated how the GI can act as an effective mechanism for employment generation and sustainable growth opportunities in different sectors like agriculture, food, and handicraft. The interaction of GI with traditional knowledge and biodiversity and their impact on society is also extensively covered. The book contains real-life case studies by the authors from different states of India highlighting the success stories and missed opportunities of different GIs and the way forward where the GI can function as an effective tool for the overall development of a country and promote international trade. The book will provide law students, scholars from legal and IP disciplines, legal practitioners, producers, and policymakers a factual and multidimensional insight into the GI system in India. This will further promote research in this area, particularly from an Asian perspective and enhance the real-life application of GI to varied products.
