Significance of the ACP Answer Key for Score Calculation

- -0.25 marks for each incorrect answer
- No negative marking for unanswered questions

If your responses match the answer key as follows:

- Correct answers: 75
- Incorrect answers: 10
- Unanswered: 15

Your estimated score would be:

$$(75 \times 1) + (10 \times -0.25) + (15 \times 0) = 75 - 2.5 + 0 = 72.5$$

acp answer key: The Trade-Development Nexus in the European Union Maurizio Carbone, Jan Orbie, 2016-03-22 This volume offers new perspectives on the evolution of the trade-development nexus in the European Union against dramatic changes in the international context. Without disregarding them, it seeks to go beyond the controversial and extensively researched Economic Partnership Agreements (EPAs). In particular, it focuses on the reform of the Generalised System of Preferences, the negotiation of various Preferential Trade Agreements, the application of trade sanctions, the allegedly ambitious agendas on decent work, Aid for Trade and aid untying, and the implications of the changing balance of power in global economic relations. Taking diverse approaches and, at times, reaching different conclusions, contributors directly or indirectly address one or more of the three general themes of the book: differentiation, coherence, and norms. This book was published as a special issue of Contemporary Politics.

Dickson, 2018-07-30 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. It is increasingly recognised that EU development cooperation policy has failed to meet its stated aims. In this book, Arts and Dickson ask the obvious and important question: if the policy doesn't work, why bother with it? The authors assess why EU development policy has become largely ineffective, citing among the external causal factors the liberalisation of trade, and the growing influence of US and international actors such as the World Bank and the International Monetary Fund upon EU policy. It also considers contributing factors within the EU such as the enlargement of its membership and the resulting shifts in priorities. It is this analysis of internal and external factors affecting the decline of EU development policy that makes this study both innovative and unique. It brings together an impressive range of contributors from different disciplines resulting in a thorough and intelligent assessment of the debate. This study will appeal to advanced

level undergraduates and academics of European politics in general, EU integration, development studies, and International Relations.
