doctor zawgyi: *A Doctor in the XIVth Army* Charles Evans, 1997-09-05 A personal account from a medic in the Fourteenth Army—also known as the “Forgotten Army”—during the 1944/45 campaign in Burma during World War II. Charles Evans records his passage from idyllic youth, fresh from Oxford in 1939, into the harsh reality of a junior doctor in Burma. Beautifully written and elegantly vivid, his diaries illuminate the progress of this ugly campaign while his post-war life saw ground-breaking work as a mountaineer, eventually rewarded by a knighthood.

His political analyses helped guide the nation during a turbulent era marked by internal struggles to establish a democracy independent of Britain in the late 1930s and the Japanese Occupation of the 1940s. The memoir is written by U Chit Maung's wife, Journal Kyaw Ma Ma Lay, a resilient woman whose deep admiration and love for her uncompromising husband are captured here.

doctor zawgyi: *Communities of Imagination* Catherine Diamond, 2016-11-30 Asian theatre is usually studied from the perspective of the major traditions of China, Japan, India, and Indonesia. Now, in this wide-ranging look at the contemporary theatre scene in Southeast Asia, Catherine Diamond shows that performance in some of the lesser known theatre traditions offers a vivid and fascinating picture of the rapidly changing societies in the region. Diamond examines how

traditional, modern, and contemporary dramatic works, with their interconnected styles, stories, and ideas, are being presented for local audiences. She not only places performances in their historical and cultural contexts but also connects them to the social, political, linguistic, and religious movements of the last two decades. Each chapter addresses theatre in a different country and highlights performances exhibiting the unique conditions and concerns of a particular place and time. Most performances revolve in some manner around "contemporary modernity," questioning what it means—for good or ill—to be a part of the globalized world. Chapters are grouped by three general and overlapping themes. The first, which includes Thailand, Vietnam, and Bali, is characterized by the increased participation of women in the performing arts—not only as performers but also as playwrights and directors. Cambodia, Singapore, and Myanmar are linked by a shared concern with the effects of censorship on theatre production. A third group, the Philippines, Laos, and Malaysia, is distinguished by a focus on nationalism: theatres are either contributing to official versions of historical and political events or creating alternative narratives that challenge those interpretations. *Communities of Imagination* shows the many influences of the past and how the past continues to affect cultural perceptions. It addresses major trends, suggesting why they have developed and why they are popular with the public. It also underscores how theatre continues to attract new practitioners and reflect the changing aspirations and anxieties of societies in immediate and provocative ways even as it is being marginalized by television, film, and the internet. The book will be of interest to students and scholars of theatre and performance, Asian literature, Southeast Asian studies, cultural studies, and gender studies. Travelers wishing to attend local performances as part of their experience abroad will find it an essential reference to theatres of the region.

doctor zawgyi: Burma 1942 Alan Warren, 2011-12-01 In December 1941 Japan set out to seize South-East Asia and the western Pacific to complete the building of a self-sufficient empire. The rapid loss of all of Britain's possessions in the Far East was the culmination of a failed attempt to deal with the rise of Japanese imperialism. Britain's bluff was called and millions of Britain's 'protected' subjects in Asia fell into the hands of a brutal occupying power. The British fought the Second World War in Burma and India against the backdrop of nationalist unrest and revolt. The appalling Bengal famine of 1943, brought about by the loss of Burma's rice crop and the dislocation of government, would cause the deaths of many. Alan Warren provides a new study of the series of battles that made up the Burma campaign, including first-hand accounts of the conflict and a fresh examination of the armies and commanders of the major combatants. *Burma 1942* powerfully demonstrates how victory or defeat in particular battles altered the trajectory of the conflict, affecting the lives of millions.

doctor zawgyi: History of Burma G. E. Harvey, 2019-06-04 Originally published in 1983, this book explores the history of Burma, including chapters on Burma before 1044, The Kingdom of Pagan and the Shan Dominion. Burma's history had been little studied until recently, until the Burma Research Society, founded in 1910, began to collect material of all kinds, and this book may be regarded therefore as one of the first-fruits. The book presents a mass of original work and incorporates the results of research up to the date of going to press; it offers a flood of light on the still many dark places of Burmese history and constitutes distinctly a step forward in our knowledge of the subject.

doctor zawgyi: Historical Dictionary of Burma (Myanmar) Donald M. Seekins, 2017-03-27 Burma (Myanmar) is a Southeast Asian country that is emerging from crisis after more than a half century of hard-line military rule and cultural, diplomatic and economic isolation. With the dissolution of its military regime, the State Peace and Development Council, in 2011, a formally civilian but military-dominated constitutional government was inaugurated. By 2012, Burma's

president, retired General Thein Sein, had established a working relationship with Daw Aung San Suu Kyi, the leader of the country's pro-democracy movement since 1988, and after a 2012 by-election she and members of her opposition party, the National League for Democracy (NLD), entered the new Union Parliament as legislators. However, even with the election victory of Daw Suu Kyi and the NLD in the General Election of November 2015, Burma faces daunting challenges: it is still one of the poorest countries in Southeast, fissured by longstanding ethnic conflicts that have made a nationwide peace agreement elusive and its people's security and the environment are threatened by foreign economic exploitation. Religious discord is also widely evident, as Buddhist militants instigate violence against the country's religious minorities, especially Muslims. Today Burma's prospects are the most hopeful they have been for over half a century, as the country takes steps along the road to a more open society and economy. This edition of the Historical Dictionary of Burma (Myanmar) encompasses not only current developments, but also Burma's over 1,500 years-old recorded history and the most important features of its cultures, ethnicity, religions, society and economy. This is done through achronology, an introduction, and an extensive bibliography. The dictionary section has over 700 cross-referenced entries on important personalities, politics, economy, foreign relations, religion, and culture.

doctor zawgyi: Buddhism and Society Melford E. Spiro, 1982-05-27 The current Western interest in Buddhism and other Eastern religions is--among other reasons--both the result of and the stimulation for an entire library of books purporting to bring the Wisdom of the East to an audience for whom the wisdom of the West has failed. This book is not an example of that genre. It is an attempt to interpret Buddhism in the light of some current theories about religion. As a work of scholarship, rather than a homiletic tract or an apologetic treatise, its aim is to understand Buddhism as one historical variant of the generic human attempt to find meaning and hope in a sacred order that transcends the mundane order of existence; its aim is not to encourage or discourage either a devotional or a soteriological interest in Buddhism.
