Introduction

In the realm of historical and cultural analysis, few books have significantly shaped our understanding of Western civilization as *Dominion: The Making of the Western Mind* by historian Tom Holland. This comprehensive work explores the profound influence of Christianity on Western thought, values, and societal structures. By examining the evolution of ideas from antiquity through the medieval period and into the modern era, Holland reveals how religious doctrines, philosophical developments, and cultural transformations have intertwined to forge the modern Western mind. In this article, we delve into the core themes of *Dominion*, its historical insights, and its relevance in understanding the foundations of Western civilization.

Overview of *Dominion: The Making of the Western Mind*

Dominion is a sweeping historical narrative that spans over two millennia, tracing the transformation of Western culture from its pagan roots to a predominantly Christian worldview. Holland's narrative emphasizes how Christianity's moral and philosophical frameworks have persisted, often subtly, shaping societal norms, laws, and individual values.

Key Themes of the Book:

- The transformative power of Christianity on Western thought
- The shift from pagan polytheism to monotheism
- The influence of Christian morality on concepts of human rights and equality

- The enduring legacy of Christian ideas in modern secular society
- The tension between religious traditions and emerging rationalist ideas

Holland's work is not merely a history of religion but an analysis of the profound cultural and psychological impact Christianity had on shaping Western civilization's core identity.

Historical Foundations of Western Thought

The Greco-Roman Roots

Before Christianity's rise, Western thought was heavily influenced by Greco-Roman philosophy, politics, and art. Ancient Greece introduced concepts of democracy, rational inquiry, and humanism, while Rome contributed legal systems and administrative organization.

Key Contributions:

- Philosophical schools like Stoicism and Epicureanism
- The development of legal codes such as Roman law
- Artistic and architectural innovations
- Literature and scientific inquiry

Despite these achievements, the Greco-Roman worldview was largely pagan, polytheistic, and sometimes hierarchical, with a focus on civic virtue and worldly pursuits.

Christianity's Ascendancy

With the fall of the Roman Empire, Christianity became the dominant cultural force in the West. This transition marked a pivotal moment in shaping Western minds.

Major Impacts:

- The Christianization of the Roman Empire under Constantine
- The establishment of the Church as a central authority
- The integration of Christian theology with classical philosophy
- The creation of a new moral universe centered on salvation and spiritual life

Holland emphasizes how Christian doctrine introduced new moral concepts, such as the intrinsic worth of every individual, which would later influence ideas of human rights.

The Moral Revolution and Its Effects

From Polytheism to Monotheism

The shift from multiple gods to a singular divine entity brought about a unified moral framework. Christianity's emphasis on the love of neighbor, forgiveness, and humility contrasted sharply with pagan values.

Key Developments:

- The Sermon on the Mount as a moral guide

- The Christian commandment to love one's enemies
- The concept of the soul's equality before God

Holland argues that these ideas laid the groundwork for later notions of universal morality and social justice.

The Role of the Church in Shaping Values

Throughout the Middle Ages, the Church served as the primary custodian of knowledge, morality, and social order.

Influences include:

- The reaffirmation of human dignity
- The establishment of charity and compassion as virtues
- The promotion of education and learning linked to theological pursuits

These principles permeated Western society, influencing legal systems, social hierarchies, and cultural norms.

Renaissance, Reformation, and Enlightenment: Challenges and Continuities

The Renaissance Revival

The Renaissance rekindled interest in classical antiquity, blending humanist ideals with Christian thought. Artists and scholars emphasized individual achievement and inquiry.

Notable aspects:

- The rediscovery of ancient texts
- The rise of secular art and literature
- The questioning of traditional authority

While challenging some Church doctrines, the Renaissance did not fundamentally alter Christian influence but rather reinterpreted it.

The Reformation and Religious Fragmentation

The Protestant Reformation of the 16th century fractured Western Christianity, leading to diverse religious denominations.

Impacts on the Western Mind:

- Increased emphasis on personal faith and scripture
- Challenges to ecclesiastical authority
- The rise of individual conscience and moral responsibility

Holland views the Reformation as both a crisis and a catalyst for individualism and rational inquiry.

The Enlightenment and Rationalism

The Enlightenment questioned traditional authority and emphasized reason, science, and empirical evidence.

Key ideas:

- The separation of church and state
- The development of political liberalism
- The decline of religious dogma in public life

Despite this shift, Holland notes that Enlightenment thinkers often retained Christian moral underpinnings, consciously or unconsciously.

The Legacy of Christianity in Modern Western Society

Human Rights and Moral Foundations

Many principles central to contemporary Western societies—such as equality, dignity, and justice—trace their origins to Christian doctrines.

Examples:

- The concept of universal human rights
- Abolition of slavery
- Advocacy for social justice

Holland emphasizes that these ideas emerged from Christian moral commitments, even as secularism grew.

Secularism and Modern Morality

While Western societies have become increasingly secular, Holland argues that Christian ideas continue to underpin moral reasoning, often operating beneath the surface of secular laws and customs.

Persistent influences:

- The notion of the individual's moral agency
- The importance of compassion and charity
- The idea that moral truths are universal

He suggests that understanding Christianity's role helps explain the durability of certain moral norms.

Critiques and Controversies

While *Dominion* celebrates Christianity's influence, Holland does not shy away from discussing its darker chapters:

- Religious intolerance and persecution
- The suppression of scientific inquiry during certain periods
- Colonialism and cultural imperialism justified by Christian narratives

He contextualizes these issues within the broader historical fabric, emphasizing that the Western

mind's development was complex and multifaceted.

Conclusion: The Continuing Influence of Dominion

Dominion: The Making of the Western Mind offers a compelling narrative of how Christianity shaped the moral, philosophical, and cultural contours of Western civilization. Holland's meticulous research invites readers to appreciate the deep roots of contemporary values and the ongoing dialogue between faith and reason.

Understanding these historical processes is crucial for anyone interested in the development of Western identity, morality, and societal structures. Whether viewed as a source of progress or conflict, Christianity's role in shaping the Western mind remains a central theme in the story of Western civilization.

In summary:

- Christianity profoundly influenced Western notions of morality, human dignity, and social justice.
- The evolution of Western thought involved complex interactions between pagan traditions, Christian doctrines, and rationalist ideas.
- Recognizing this history enriches our understanding of modern Western society and its enduring values.

Final thoughts

Dominion is an essential read for students of history, philosophy, theology, and anyone interested in the origins of Western cultural norms. It challenges readers to consider how religious ideas continue to

influence contemporary life, often in subtle but powerful ways. By exploring the making of the Western mind, Holland provides invaluable insights into the enduring legacy of Christianity and its role in shaping the civilization we live in today.

Dominion: The Making of the Western Mind – An Investigative Review

In recent years, the book "Dominion: The Making of the Western Mind" by historian and scholar Tom Holland has garnered widespread attention for its ambitious attempt to trace the profound influence of Christianity on Western civilization. By exploring the historical, philosophical, and cultural evolution of the West, Holland asserts that Christianity has not only shaped moral frameworks and institutions but has also fundamentally molded the Western psyche. This review delves into the core themes of the book, critically examines its methodology, and considers its implications for understanding Western identity.

Understanding the Central Thesis: Christianity's Cultural Genesis

At the heart of "Dominion" lies a provocative thesis: that the moral, legal, and intellectual foundations

of the modern West are indelibly rooted in Christian thought. Holland contends that even secular Western society continues to bear the imprint of Christian values—whether consciously acknowledged or not.

He argues that Christianity introduced revolutionary ideas—such as the intrinsic worth of every individual, the notion of universal compassion, and the concept of equality before God—that gradually permeated societal structures. These ideas, once radical, became embedded in the legal codes, human rights doctrines, and cultural narratives that define Western civilization today.

The Historical Arc: From Pagan Roots to Christian Dominance

Holland's narrative begins with the pre-Christian world, characterized by pagan polytheism, tribal loyalties, and a worldview that often prioritized honor and power. He describes how Christianity emerged as a transformative force, challenging these norms and establishing a new moral paradigm.

Key moments include:

- The spread of Christianity across the Roman Empire.
- The adoption of Christian doctrine by imperial authorities.
- The establishment of the Church as a central institution.
- The medieval synthesis of Christian theology with classical philosophy, particularly Aristotelian thought.

Holland emphasizes that this historical trajectory was not linear or inevitable but was shaped by complex theological debates, political power struggles, and cultural adaptations.

The Moral Revolution: From Sacrifice to Compassion

One of the most compelling sections of the book explores how Christian teachings redefined morality

in the West. Holland argues that Christianity shifted moral focus from external honor, shame, and retribution towards internal virtues like compassion, humility, and forgiveness.

The Concept of the Person

A cornerstone of Christian influence, according to Holland, is the doctrine of the individual's intrinsic worth. This idea challenged pagan and classical notions of hierarchy and communal identity, laying the groundwork for modern notions of human rights.

He traces this evolution through:

- The influence of Jesus' teachings on love and forgiveness.
- The development of the concept of conscience.
- The eventual integration of individual rights into legal systems.

Transformations in Justice and Law

Holland illustrates how Christian ideas gradually infiltrated legal thought, leading to:

- The abolition of practices like gladiatorial combat.
- The development of charity and social welfare institutions.
- The modern conception of justice as restorative rather than purely retributive.

He underscores that these moral shifts were revolutionary, often opposed by existing powers but ultimately shaping the ethos of Western governance.

Science, Reason, and the Christian Legacy

A significant aspect of Holland's investigation concerns the relationship between Christianity and the development of Western science and rationality. He challenges the stereotype that religion hindered scientific progress, instead proposing that Christian institutions fostered the intellectual environment necessary for scientific inquiry.

Christianity and the Scientific Revolution

Holland highlights figures like:

- Roger Bacon
- Isaac Newton
- Johannes Kepler

who operated within a Christian worldview that saw the universe as a rational, ordered creation of God. He argues that the belief in a rational Creator motivated many early scientists to seek understanding of the natural world.

The Enlightenment and Beyond

While acknowledging conflicts between religion and science, Holland suggests that the Enlightenment's emphasis on reason and empirical evidence was deeply rooted in Christian intellectual traditions. The secularization of science, he posits, was a gradual process that evolved from these Christian foundations rather than a rejection of faith.

Criticisms and Controversies

Despite the extensive scholarship, "Dominion" has sparked debate among historians, theologians, and cultural critics. Some critique Holland's thesis for emphasizing Christianity's positive influence at the expense of acknowledging its darker chapters.

Potential Overgeneralization

Critics argue that Holland's portrayal risks oversimplification, portraying Western history mainly through a Christian lens while downplaying:

- The influence of pagan, Jewish, Muslim, and secular thinkers.
- The conflicts and contradictions within Christian history, such as religious wars and persecutions.
- The diversity within Christianity itself.

Eurocentrism and Cultural Bias

Others point out that the book's focus on Western civilization may overlook the contributions of other cultures and the ways in which Christian dominance interacted with, and sometimes suppressed, other traditions.

Implications for Contemporary Western Identity

"Dominion" prompts reflection on how Christian ideas continue to shape contemporary Western societies. Holland suggests that understanding this history is essential for grasping current debates over morality, human rights, and secularism.

The Persistence of Christian Morality

Despite rising secularism, many Western institutions—such as legal systems, educational frameworks, and social norms—still bear Christian fingerprints. Questions about the source of moral authority, the role of religion in public life, and the meaning of human rights are, according to Holland, rooted in Christian moral vision.

Challenges to the Christian Legacy

Conversely, the book also explores how secular ideologies, like humanism and liberalism, have sought to redefine or even reject Christian influence. This ongoing tension raises questions about the future trajectory of Western identity and values.

Conclusion: A Critical Reflection

"Dominion: The Making of the Western Mind" is an ambitious and provocative work that seeks to trace the deep roots of Western civilization in Christian thought. Holland's narrative emphasizes the transformative power of Christianity in shaping moral, legal, scientific, and cultural domains. While the book offers compelling insights, it also invites critical engagement with its thesis, encouraging readers to consider both the contributions and contradictions of Christian influence.

Ultimately, Holland's exploration underscores that understanding the origins of Western ideas is essential for engaging thoughtfully with contemporary debates about religion, morality, and identity. Whether one agrees with his thesis or not, "Dominion" serves as a vital reminder that the complex tapestry of Western history cannot be fully appreciated without acknowledging the profound role Christianity has played in shaping the modern mind.

In summary:

- Christianity introduced revolutionary moral ideas that remain central to Western identity.
- The development of individual rights, compassion, and justice was deeply influenced by Christian theology.
- Scientific progress in the West was fostered within a Christian worldview valuing rational inquiry.
- The book has sparked debate about historical interpretation, cultural bias, and the ongoing influence of Christian ideas.
- Recognizing these roots is crucial in understanding current societal values and conflicts.

"Dominion" challenges us to reflect on how history, faith, and culture intertwine to forge the collective consciousness of the West—and how this legacy continues to evolve in the face of modern secular challenges.

Dominion The Making Of The Western Mind

dominion the making of the western mind: Dominion Tom Holland, 2019-10-29 A “marvelous” (Economist) account of how the Christian Revolution forged the Western imagination. Crucifixion, the Romans believed, was the worst fate imaginable, a punishment reserved for slaves. How astonishing it was, then, that people should have come to believe that one particular victim of crucifixion—an obscure provincial by the name of Jesus—was to be worshipped as a god. *Dominion* explores the implications of this shocking conviction as they have reverberated throughout history. Today, the West remains utterly saturated by Christian assumptions. As Tom Holland demonstrates, our morals and ethics are not universal but are instead the fruits of a very distinctive civilization. Concepts such as secularism, liberalism, science, and homosexuality are deeply rooted in a Christian seedbed. From Babylon to the Beatles, Saint Michael to #MeToo, *Dominion* tells the story of how Christianity transformed the modern world.

dominion the making of the western mind: *Opera: The Autobiography of the Western World (Illustrated Edition)* Simon Banks, 2022-07-28 Since the first performance of the first opera in 1600, operas have been telling stories from myth and history. This book - beginning with the Creation and ending in the present day - is a chronology of myth and history as told in opera. Over 260 paintings and photographs, most in colour, accompany the narrative. Why were particular myths and historical events important at particular times? Why were the same myths and historical events told in radically different ways? In seeking answers to these questions, this book charts how the modern West migrated from autocracy towards liberal democracy, from theocratic absolutism towards tolerant pluralism, from sexism towards gender equality. It traces growing scepticism about religiously inspired warfare and colonial empire building. Unlike anything previously published, this is a book for lovers of history and the arts, and for anyone interested in how the western world of today came into being. By exploring a bewitchingly beautiful art form, it chronicles a sequence of extraordinary transformations: the political, religious and social revolutions that created the modern West.

dominion the making of the western mind: Is He Out There? Paul Laffan, 2022-12-01 *Is He Out There?* is an interdisciplinary examination of the Christian reaction to Dawkins' *The God*

Delusion. That reaction has offered a wide range of counter-arguments, among them: that Dawkinss demonstration of how God almost certainly doesnt exist addresses an out-dated conception of God; that science and religion are not conflictual as Dawkins contends and indeed may well be converging upon an understanding of how God acts in the universe; that Dawkinss denigration of the Bible depends on an overly literal reading; and that Dawkins assumes a narrative of progress in which human beings take the place of God in controlling the course of history. *Is He Out There?* responds to these arguments in the context of current scientific understanding, biblical criticism and philosophy. Paul Laffan demonstrates how the desire to meet the challenge posed by Dawkinss viewpoint has led to the perversion of scientific theories and accepted positions in other important fields of inquiry. It suggests that Christianity is wedded to a God who is the cause of the universe a classical conception of cause that is anachronistic; that denying the Bible was read for most of the Christian era as offering a literal account of divine creation is a significant misrepresentation of doctrinal history; and that a complete dismissal of progress requires the dismissal of scientific achievement. The author considers the extent to which attractive, secular values like tolerance and freedom of opinion are Christian in source and whether moral systems require God to underwrite them. The wide-ranging nature of *Is He Out There?* not only provides a review of the state of contemporary Christian apology but is a measured address of the arguments put forward in *The God Delusion* and indeed of the substantive commentary on Dawkinss thesis.

dominion the making of the western mind: *A Mucky Business* Tim Farron, 2022-11-17 Many Christians are nervous about politics - isn't the political world murky and sleazy, a den of deceit and backstairs deals? At the same time, the image of Christians in politics isn't great either - often seen as judgemental hypocrites, intolerant and hateful control freaks... shouldn't this mean that faith and politics should be kept firmly apart? In *A Mucky Business*, Tim Farron, former Leader of the Liberal Democrats Party and friends, explore and defend why Christianity and politics should and must work together. If Christians are to love their neighbours, they need to engage with the issues that affect everyone. Why should Christians leave their beliefs at the door when they enter public life? No one else does! Tim Farron shares his experience as the UK's best known Christian MP and draws on case studies from across the political spectrum. Many of these case studies come from his successful *A Mucky Business* podcast. Demonstrating that it's possible to be both a Christian and to step into the political world with confidence. *A Mucky Business* will both inspired and better equip christians to care about politics, pray knowledgeably, and engage with politics effectively.

dominion the making of the western mind: *Changing Hearts Changing Communities* Karl Bretting, 2023-08-16 We live in a world of changing hearts and changing communities. Spiralling family violence and child abuse and neglect, often related to intergenerational trauma, are severely impacting many communities. On an international level threats from nuclear war, climate change, and artificial general intelligence in the hands of autocratic dictators, present disturbing challenges to our future. If we want to see change in families, communities, and nations it needs to begin in the motivational centre of our being. The scourge of insatiable approval-seeking, alienation from the Creator, intergenerational trauma, and the debilitating effects of a broken heart and spirit, simmers within us. How can we experience change? We need to identify what needs to change in what is motivating us and discover how we can be empowered to change deeply entrenched habits. As well as a change in the thought patterns of our minds, we need to experience a pervasive pivot in our attitudes. This publication draws from arguably the most significant change movement in history, exploring how we can discover the power to change and contribute toward transforming broken communities in an uncertain world of accelerating change.

dominion the making of the western mind: *Is Christianity Good for the World?* Sharon James, 2023-09-12 Exploring the Impact of Christianity throughout History In our increasingly secular world, many claim that Christianity is oppressive and toxic. Christians are accused of standing on the wrong side of history, failing to accept human dignity, freedom, and progress. Are these accusations valid? Is Christianity actually causing more harm than good in the world? In this concise booklet, author Sharon James shows that through history and across the globe, true

followers of Christ have challenged injustice and abuse, and provided care for the needy. This has had a beneficial and widespread impact on all areas of human life. Without the moral ideals given to us by God, humans would lack the ability and desire to pursue justice, freedom, and compassion altogether. When Christians follow the biblical worldview with integrity and align their actions with their self-giving God, that results in sacrificial service to others. dominion the making of the western mind: Being the People of God Paul Bradbury, Isabelle Hamley, Andy Smith, 2025-07-31 Drawn from a consultation instigated by the Church of England's Faith and Order Commission, this book seeks to offer a generative conversation involving theologians and practitioners across three key themes - the church's worship as a gathered community, its witness as a scattered community, and its walk as a pilgrim community. So often the church speaks as if there was a binary division between 'being' and 'doing', yet the contributors to this book collectively demonstrate that the situation is more complex.

dominion the making of the western mind: Subjugate the Earth Philipp Blom, 2024-11-05 Subjugate the Earth traces the biography of a strange idea: the idea that human beings can subdue nature and rule over it. Born in Mesopotamia at the dawn of civilization, the idea of subjugating the Earth was included in the Bible, reached Europe through Christianity, and spread to the entire world through colonialism. The Enlightenment gave a scientific appearance to the ambition of controlling nature but did not change the ambition itself. Yet every birth presages a death. Only with the climate crisis has it become apparent that the subjugation of nature must be a self-defeating ambition, because it alters and deregulates natural systems which humans depend on for their survival, precisely because they are part of nature and not separate from it. Subjugating the Earth is an idea that is dying around us. The polycrisis threatening to engulf humanity is inextricably linked to how humans see themselves and their relationship with nature. Based on developments in the natural sciences, a new understanding of this relationship looks not at individual phenomena but at systems, connections and entanglements between humans and other manifestations of nature. Is it possible to build a new understanding of humanity in nature by turning the traditional vision of free, rational individuals on its head and seeing humans as fascinating, irrational and system-dependent beings within the vast system of nature? Interlacing historical episodes, individual life stories, works of art and scientific discoveries, Subjugate the Earth tells the story of the rise and fall of an idea that has shaped our world, and weaves a rich tapestry that is as surprising as it is enriching.

dominion the making of the western mind: Whatever Became of Love? Thomas C. Pfizenmaier, 2023-07-21 This book is written for those who want growth in love. This book is written for those who long for a place to stand with confidence in a trembling world. This book is written for those who suspect our civilization is running on fumes and want to help. If you are one of these people, then this book is written for you. In discovering Jesus as he encounters us in the Scriptures, you will discover that his love is unimaginably powerful for those who will place themselves at its disposal—powerful enough to restore all things.

dominion the making of the western mind: The Routledge Handbook of Religious Literacy, Pluralism, and Global Engagement Chris Seiple, Dennis R. Hoover, 2021-12-27 This pioneering handbook proposes an approach to pluralism that is relational, principled, and non-relativistic, going beyond banal calls for mere tolerance. The growing religious diversity within societies around the world presents both challenges and opportunities. A degree of competition between deeply held

religious/worldview perspectives is natural and inevitable, yet at the same time the world urgently needs engagement and partnership across lines of difference. None of the world's most pressing problems can be solved by any single actor, and as such it is not a question of if but when you partner with an individual or institution that does not think, act, or believe as you do. The authors argue that religious literacy—defined as a dynamic combination of competencies and skills, continuously refined through real-world cross-cultural engagement—is vital to building societies and states of neighborly solidarity and civic fairness. Through examination, reflection, and case studies across multiple faith traditions and professional fields, this handbook equips scholars and students, as well as policymakers and practitioners, to assess, analyze, and act collaboratively in a world of deep diversity. dominion the making of the western mind: Towards Sustainable Well-Being Anders Hayden, Céofride Gaudet, Jeffrey Wilson, 2022-08-03 *Towards Sustainable Well-Being* examines existing efforts and emerging possibilities to improve upon gross domestic product as the dominant indicator of economic and social performance. Contributions from leading international and Canadian researchers in the field of beyond-GDP measurement offer a rich range of perspectives on alternative ways to measure well-being and sustainability, along with lessons from around the world on how to bring those metrics into the policy process. Key topics include the policy and political impacts of major beyond-GDP measurement initiatives; the most promising possibilities and policy applications for beyond-GDP measurement; key barriers to introducing beyond-GDP metrics; and complementary measures to ensure new measurements are not merely calculated but taken into account in policymaking. The book highlights a distinction between a reformist beyond-GDP vision, which seeks to improve policymaking and quality of life within existing political and economic institutions, and a transformative vision aiming for more fundamental change including a move beyond economic growth. Illustrating the many advances that have occurred in Canada and internationally, *Towards Sustainable Well-Being* proposes next steps for both the reformist and transformative visions, as well as possible common ground between them in the pursuit of sustainable well-being.

dominion the making of the western mind: Beyond Establishment Jonathan Chaplin, 2022-05-31 The Church of England finds itself colliding with society at large on regular occasion. Has the time come, therefore, where the advantages of being the established church are at last outweighed by the disadvantages? Is there a case for disestablishment, and if so, what might a fresh vision of the church's relationship with wider society be? Separating the question of establishment, from the question of presence in the community, Jonathan Chaplin argues that the time has come for the ending of privileged constitutional ties between the Church of England the British state. Rather than offering a smaller place for the Church of England within society, he suggests, such a separation would in fact enhance its ability to maintain an embedded presence in local parishes, and allow it the room to speak out about the deeper, bigger challenges which face society today.

The book uses primary documents from the US and British governments to examine the attitudes of politicians and officials in a variety contexts ranging from the 'War on Terror', the Iranian Revolution and the 'Trojan Horse' Scandal to the conversion of Alexander Russell Webb to Islam, Islamic Finance and Mosque-building. In so doing it provides a wide-angle lens on the diversity of issues and experiences which have shaped the views of officials and politicians about Islam.

dominion the making of the western mind: *War in Europe?* Thibault Muzergues, 2022-04-19 In this highly provocative and documented book, Thibault Muzergues describes how war in Europe is now more likely than it has been for at least the past 30 years, how it might come back

to Europe and what Europeans can do to avoid getting drawn again in fratricide conflicts. Many consider Europe a continent of peace, with NATO guaranteeing its security and the EU providing the political glue for a Europe Whole and Free. But what if this was not the case anymore? What if, after a decade of crisis, today's Europe was much more fragile than we thought? The author challenges our assumptions about peace in Europe and forces us to face the realities of a world that has become much more dangerous. Far from being apocalyptic, this book serves as an advance warning to the dangers, both internal and external that are now closing in on Europe – and suggests solutions to avoid them. This book will be key reading for those interested in European politics and history, the European Union, security, and strategic studies, and more broadly to current affairs and international relations.

dominion the making of the western mind: Faith in Democracy Jonathan Chaplin, 2021-04-30 What is the place of faith in public life in the UK? Beyond 'secularism' that seeks to relegate faith to the margins of public life, and a 'Christian nation' position that seeks to retain, or even regain, Christian public privilege, there is a third way. Faith in Democracy: Framing a Politics of Deep Diversity calls for an approach that maximises public space for the expression of faith-based visions within democratic fora while repudiating all traces of religious privilege. It argues for a truly conversational space, reflecting theologically on the contested concepts at the heart of the current debate about the place of faith in British public life: democracy, secularism, pluralism and public faith.

dominion the making of the western mind: Ten Ways to Weave the World: Matter, Mind, and God, Volume 1 Ross Thompson, 2022-12-20 The idea of an ideological war between science and religion, Thompson argues, is founded on a mistake. But this does not mean that there is nothing at stake. For behind the ill-conceived conflict lie complex issues about the nature of mind, consciousness, experience, subjectivity, quality, value, and the like, all of which need to be disentangled and assessed in their own right. Outgrowing Materialism leads the reader through a sequence of five Worlds, each of which offers a distinct way of understanding (or failing to understand) these issues, and where God might belong (or not). Writing accessibly, but with a sharp eye for detail, Thompson sheds new light on the familiar territory of materialism, dualism, and structural realism, and evaluates the growing attraction of the multiverse. He argues that dualism mechanized the material world; then materialism exorcised the mental ghost from the machine; and finally, this machine is evaporating into pure mathematics. Outgrowing Materialism is half of Ten Ways to Weave the World: Matter, Mind, and God. The sequel, Embodying Mind, discusses five Worlds that precede and follow those discussed here. However, Outgrowing Materialism stands in its own right as a critique of the modern science v. religion dilemma.

dominion the making of the western mind: The Logic of Love Andrew J. B. Cameron, 2022-12-29 Overlooking what makes the intersection between emotion and ethics so confusing, this book surveys an older wisdom in how to manage it, using a range of Christian theologians and sources. More important even than 'managing', we begin to see a vision for a better set of affections to grow within and among us. In this vision emerges a practical and nuanced account of what the Christian tradition sometime summarises as 'love'. How may we recover a deep affection for what matters, both within ourselves and together in groups? This book also dialogues with a new movement in moral psychology, 'social intuitionism'. Cameron argues that researchers in this discipline have interests and conclusions that sometimes overlap with Christian sources, even where their respective lenses differ. In this way, the book overviews recent trends in moral psychology

against a recent historical and contemporary cultural backdrop, whilst assaying major sources in Christian theology that offer guidance on moral psychology.
