Over the course of three sections, Routman provides numerous Take Action ideas for implementing authentic and responsive teaching, assessing, and learning. This book poses a key question: How do we rise to the challenge of providing an engaging, excellent, equitable education for all learners, including those from high poverty and underserved schools? Teaching for Engagement: Many high performing schools are characterized by a thriving school culture built on a network of authentic communication. Teachers can strengthen classroom engagement by building a trusting and welcoming environment where all students can have a safe and collaborative space to grow and develop. Pursuing Excellence: Routman identifies 10 key factors that describe an excellent teacher, ranging from intellectual curiosity to creativity, and explains how carrying yourself as a role model contributes to an inclusive, caring, empathic, and fair classroom. She also stresses the

importance for school leaders to make job-embedded professional development a top priority. Dismantling Unequal Education: The huge gap in the quality of education in high vs low income communities is the civil rights issue of the 21st century, according to Routman. She spells out specific actions educators can take to create more equitable schools and classrooms, such as diversifying texts used in curriculums and ensuring all students have access to opportunities to discuss, reflect, and engage with important ideas. From the author, I wrote Literacy Essentials, because I saw a need to simplify teaching, raise expectations, and make expert teaching possible for all of us. I saw a need to emphasize how a school culture of kindness, trust, respect, and curiosity is essential to any lasting achievement. I saw a need to demonstrate and discuss how and why the beliefs, actions, knowledge we hold determine the potential for many of our students. focus on grammar 4 pdf: Grammatical Categories in Linguistics and Education Holden Härtl, Katharina Zaychenko, 2024-11-04 This volume explores how grammatical categories, as defined by theoretical linguistics, are effectively implemented in language education. Essential for linguists, language educators, and researchers interested in the intersections of grammar, cognition, and pedagogy, the volume is organized into four engaging sections. focus on grammar 4 pdf: *The Syntax of Information-Structural Agreement* Johannes Mursell, 2021-09-15 In this research monograph, Johannes Mursell discusses the syntactic impact of information-structural features on agreement. So far, the syntactic contribution of this type of feature has mostly been reduced to movement of topics or foci clause-initial position. Here, the author looks at a different phenomenon, syntactic agreement, and how this process can be dependent on information-structural properties. Based partly on original fieldwork from a typologically diverse set of languages, including Tagalog, Swahili, and Lavukaleve, it is argued that for most areas for which information-structural features have been discussed, it is possible to find cases where these features influence phi-feature agreement. The analysis is then extended to cases of Association with Focus, which does not involve phi-features but can still be accounted for with agreement of information-structural features. The book achieves two main goals: first it provides a uniform analysis for different constructions in unrelated languages. Second, it also gives a new argument that information-structural features should be treated as genuine syntactic features.

focus on grammar 4 pdf: *Relative Clauses in Cameroonian Languages* Gratien Gualbert Atindogbé, Rebecca Grollemund, 2017-09-11 This volume is a series of nine (9) contributions to our understanding of relativization strategies in eleven (11) languages of Cameroon spread into the seven (7) sub-branches of the Niger-Congo phylum: Ekoid, Mambiloid, Mamfe, Mbam, Narrow Bantu, Wide Grassfields, Yemne-Kimbi. As a productive strategy in the world's languages, and considering the evidence that the African language are either under-described, poorly described or not described at all, investigations into the forms, structures and functions of relative clauses and relativization start filling the gap of the absence of analytical descriptive works on the topic. The papers dwelt on the construction of relative clauses, their structure and constraints, their morphosyntactic properties, how they are used to give prominence to topics or participants that are thematic in a given discourse, and to mark the boundaries of units of text, and the formal characteristics of restrictive relative clause constructions. The findings generated so far constitute an endless tank for many fields of hyphenated linguistics including general linguistics, cognitive linguist, applied psycholinguistics, psycholinguistics, neurolinguistics, cognitive psychology, linguistics and pragmatics.

focus on grammar 4 pdf: *Research Questions in Language Education and Applied Linguistics* Hassan Mohebbi, Christine Coombe, 2022-01-13 This volume encompasses the range of research questions on language-related problems that arise in language teaching, learning and assessment. The [150] chapters are written by experts in the field who each offer their insights into current and future directions of research, and who suggest several highly relevant research questions. Topics include, but are not limited to: language skills teaching, language skills assessment and testing, measurement, feedback, discourse analysis, pragmatics, semantics, language learning through technology, CALL, MALL, ESP, EAP, ERPP, TBLT, materials development, genre analysis, needs analysis, corpus, content-based language teaching, language teaching and learning strategies, individual differences, research methods, classroom research, form-focused instruction, age effects, literacy, proficiency, and teacher education and teacher development. The book serves as a reference and offers inspiration to researchers and students in language education. An important skill in reviewing the research literature is following a study's "plan of attack." Broadly, this means that before accepting and acting upon the findings, one considers a) the research question (Is it clear and focused? Measurable?), b) the subjects examined, the methods deployed, and the measures chosen (Do they fit the study's goal and have the potential to yield useful results?), and c) the analysis of the data (Do the data lead to the discussion presented? Has the author reasonably interpreted results to reach the conclusion?). Mohebbi and Coombe's book, *Research Questions in Language Education and Applied Linguistics: A Reference Guide*, helps budding researchers take the first step and develop a solid research question. As the field of

language education evolves, we need continual research to improve our instructional and assessment practices and our understanding of the learners' language learning processes. This book with its remarkable 150 topics and 10 times the number of potential research questions provides a wealth of ideas that will help early career researchers conduct studies that move our field forward and grow our knowledge base. Deborah J. Short, Ph.D., Director, Academic Language Research & Training, Past President, TESOL International Association (2021-22) As a teacher in graduate programs in TESOL I frequently come across the frustration of students at centering their research interests on a particular topic and developing research questions which are worth pursuing so as to make a contribution to the field. This frustration stems from the fact that our field is so vast and interrelated, that it is often impossible to properly address all that interests them. Hence, I wholeheartedly welcome this most relevant and innovative addition to the research literature in the field of TESOL and Applied Linguistics. Coombe and Mohebbi have created a real tour de force that stands to inform budding researchers in the field for many years to come. Additionally, the cutting-edge depiction of the field and all it has to offer will no doubt update the research agendas of many seasoned researchers around the world. The 150 chapters are organized in a most powerful, yet, deceptively simple way offering a positioning within the topic, suggesting questions that might direct inquiry and offering a basic set of bibliographic tools to start the reader in the path towards research. What is more, the nine sections in which the chapters are organized leave no area of the field unexplored. focus on grammar 4 pdf: The Greek Verb Revisited Steven E. Runge, Christopher J. Fresch, 2016-11-02 For the past 25 years, debate regarding the nature of tense and aspect in the Koine Greek verb has held New Testament studies at an impasse. The Greek Verb Revisited examines recent developments from the field of linguistics, which may dramatically shift the direction of this discussion. Readers will find an accessible introduction to the foundational issues, and more importantly, they will discover a way forward through the debate. Originally presented during a conference on the Greek verb supported by and held at Tyndale House and sponsored by the Faculty of Divinity of Cambridge University, the papers included in this collection represent the culmination of scholarly collaboration. The outcome is a practical and accessible overview of the Greek verb that moves beyond the current impasse by taking into account the latest scholarship from the fields of linguistics, Classics, and New Testament studies.

focus on grammar 4 pdf: Bilingualism in Schools and Society Sarah J. Shin, 2017-07-28 This revised edition of Bilingualism in Schools and Society is an accessible introduction to the sociolinguistic and educational aspects of and the political issues surrounding bilingualism, including code-switching in popular music, advertising, and online social spaces. It also addresses the personal aspect of the topic in a well-informed discussion of what it means to study and live with multiple languages in a globalized world and practical advice on raising bilingual children. Extensive new material has been added that deals with more holistic understandings of bilingual performance, including translanguaging, flexible bilingualism, and code-meshing; blending standard and vernacular languages/dialects in hybrid texts; and recent developments in policies surrounding the education of English Learners and EL assessment, including Common Core State Standards (CCSS), PARCC and SBAC testing, WIDA and ELPA21 language assessments, and Every Student Succeeds Act (ESSA). Updated and new discussions on community-based heritage language programs and 'super-diversity' further enhance this new edition, along with updated statistics on bilingual populations and the world's top languages. Each chapter includes lists of further readings, helpful digital resources and study questions, as well as student activities and boxed vignettes. Firmly grounded in the analysis of empirical work with bilingual children and adults in various multilingual settings throughout the world, Bilingualism in Schools and Society is the ideal text for courses on bilingualism in language education programs.
