Philip Sloan, Willy Legrand, Clare Hindley, 2015-06-12 The issues surrounding the provision, preparation and development of food products is fundamental to every human being on the planet. jailhouse strong pdf: The Victimology of a Wrongful Conviction Nicky Ali Jackson, Kathryn M.

Campbell, Margaret Pate, 2022-07-07 This book exposes the myriad of victims of wrongful conviction by going beyond the innocent person who has been wrongfully incarcerated to include the numerous indirect victims who suffer collaterally. In no way overlooking the egregious effects on the wrongfully convicted, this book widens the net to also examine consequences for family, friends, co-workers, witnesses, the initial victims of the crime, and society in general—all indirect victims who are often forgotten in treatments of wrongful conviction. Utilizing interviews of exonerees and indirect victims, the authors capture the tangible and intangible costs of victimization across the board. The prison experience is examined through the lens of an innocent person, and the psychological impact of incarceration for the exoneree is explored. Special attention is given to the often-ignored experience of female exonerees and to the impact of race as a compounding factor in a vast number of miscarriages of justice. The book concludes with an overview of the victimization experiences that follow exonerees upon release. Unique to this book is its interdisciplinary approach to the troubling subject of wrongful conviction, combining perspectives from a number of fields, including criminal justice, criminology, victimology, psychology, sociology, social justice, history, political science, and law. Undergraduate and graduate students in these disciplines will find this book helpful in their respective areas of study, and professionals in the legal system will benefit from appreciation of the far-reaching costs of wrongful convictions.

jailhouse strong pdf: *Handbook of Ethnic Conflict* Dan Landis, Rosita D. Albert, 2012-02-14 Although group conflict is hardly new, the last decade has seen a proliferation of conflicts engaging intrastate ethnic groups. It is estimated that two-thirds of violent conflicts being fought each year in every part of the globe including North America are ethnic conflicts. Unlike traditional warfare, civilians comprise more than 80 percent of the casualties, and the economic and psychological impact on survivors is often so devastating that some experts believe that ethnic conflict is the most destabilizing force in the post-Cold War world. Although these conflicts also have political, economic, and other causes, the purpose of this volume is to develop a psychological understanding of ethnic warfare. More specifically, *Handbook of Ethnopolitical Conflict* explores the function of ethnic, religious, and national identities in intergroup conflict. In addition, it features recommendations for policy makers with the intention to reduce or ameliorate the occurrences and consequences of these conflicts worldwide.

jailhouse strong pdf: *Blood Profits* Vanessa Neumann, 2017-12-05 International smuggling has exploded, deepening and accelerating the collaboration of transnational organized crime and terrorist groups. Attacks like the Charlie Hebdo and Bataclan shootings in Paris, the kidnappings and murders by Boko Haram in Nigeria, and the San Bernardino shooting were partially funded by seemingly harmless illegal goods such as cheap cigarettes, smuggled oil, prostitution, fake Viagra, fake designer bags, and even bootleg DVDs. But how can this be? In *Blood Profits*, Vanessa Neumann, an expert on dismantling illicit trade, explains how purchasing illegal goods translates to supporting organized crime and terrorists. Neumann shows how the effects of the collapsed Iron Curtain, USSR scientists and intelligence agents left without work, regional trade pacts, the dissipation of the East-versus-West mentality, and new-age technology have all led to an intricate network of illegal trade. She leads the reader through a variety of cases, both by geography and by industry (selecting industries where illicit trade is generally poorly understood), before extracting lessons learned into some policy recommendations that we can all embrace.

jailhouse strong pdf: *Reconstructing Restorative Justice Philosophy* Theo Gavrielides, Vasso Artinopoulou, 2016-04-08 This book takes bold steps in forming much-needed philosophical foundations for restorative justice through deconstructing and reconstructing various models of thinking. relationship and convergence of restorative justice and human rights, some of the challenges of engagement with human rights, the need for the recognition of the teachings of restorative justice at both the theoretical and the applied level, the Aristotelian theory on restorative justice, the role of restorative justice in schools and in police practice and a discussion of the humanistic African philosophy of Ubuntu. With international contributions from various disciplines and through the use of value based research methods, the book deconstructs existing concepts and suggests a new conceptual model for restorative justice.
