long distance real estate investing pdf: ABC to Real Estate Investing John King, 2023-08-03 Welcome to ABC to Real Estate Investing: Investing in Rental Properties for Beginners. If you've picked up this book, you're likely seeking a new, accessible way to build wealth-a path that can lead to financial freedom and pave the way for generations to come. But where does one start? The path I'm here to guide you on is one less trodden but nonetheless promising: the road to reclaiming wealth through low-priced neighborhoods. Some may scoff at the idea, envisioning dilapidated houses in neglected neighborhoods, but there's an untold opportunity here-one that can serve both you and the community. Think about it: wealth is not merely about accumulation but distribution as well. It's about investing in places that others overlook, and in doing so, uplifting the very fabric of our communities. This concept may seem revolutionary, yet it is one rooted in practicality and social responsibility. My name is Lisa Phillips. As a seasoned investor, I've helped thousands of investors achieve financial independence by guiding them through the world of low-cost real estate investments. The properties we're talking about range from \$30,000 to \$50,000, located in middle-class neighborhoods across the country. These are not luxury condos or beachfront homes, but they're safe, affordable, and-most importantly-they make a real difference. The homes we'll discuss offer an unprecedented opportunity to build wealth while giving back. They provide a chance to inject capital, life, and prosperity into areas that have been overlooked for too long. And guess what? They're not just beneficial for the community; these investments are also profitable. We're talking about high returns and a steady cash flow-the kind of financial stability you can't always find in the stock market or other volatile investment avenues. This book is not just about investing; it's about making an impact. It's about reclaiming the narrative and understanding that wealth is not just about where we put our money, but how we use it to shape our world. It's about leveraging the opportunity in the overlooked, the underappreciated, the low-priced neighborhoods, and transforming them into vibrant communities while securing a financial future for ourselves. So, if you're ready to dive into a world of investment that is as rewarding socially as it is financially, I invite you to turn the page. Let's embark on this journey to reclaim our wealth and reshape our neighborhoods together. You might have a few questions about the person guiding you through this adventure. Who am I? Why have I chosen this unconventional path to wealth? Let me introduce myself formally: I'm Lisa Phillips, an ordinary woman with an extraordinary passion for helping people like you unearth the opportunities in the often-ignored, low-cost real estate market. Before I found my footing in the realm of real estate, I was not much different from many of you reading this book. I was not born into wealth, and the real estate market seemed like an intimidating venture.

But through resilience, research, and a bit of trial and error, I found a niche that not only promised financial returns but also echoed my desire to make a positive societal impact. Over time, I have managed to aid thousands of investors in securing their financial future by investing in properties priced between \$30,000 to \$50,000 in middle-class neighborhoods all over the nation.

long distance real estate investing pdf: REAL ESTATE INVESTING STEP BY STEP

Michele Brizi, Roberto D'Addario, 2021-02-13 -Discount 55%- This book is the result of our first-hand experience in the field, which we wish we had when we set out in search of our first homes to buy to put to income. There are many opportunities in real estate in America. However, there are also risks that you need to be aware of, and somewhat calculate before buying a home in the USA. Often these risks are ignored if you rely solely and exclusively on real estate agencies. From the need to clearly understand the dynamics of this mode of investment and then to be able to control it directly was born the course *Income Houses in the USA* and then the book you are about to read. Our strength is that in addition to being real estate consultants, we do things for ourselves first. The *Investing in the United States* project was born out of our need to diversify what we had managed to build over years of work. We didn't want to create a second job for ourselves! We wanted to make money work for us, without using financial instruments that were difficult to control, and always remaining in the real estate sector. Studying, taking courses with the N.A.R. and the F.I.A.I.P. back in 2005, and experimenting first hand, we realized that we had to buy houses in the U.S. that in addition to having an excellent rental income could also have a prospect of revaluation in the medium to long term. Since we were all married, with children, living and working in Italy, the essential condition was to be able to work remotely so that we did not have to deal directly with the management of the house and the tenant. Our goal was to build an extra income, not dependent on our work. To understand a kind of pension. We wanted to invest in a country with a strong economy, a lively real estate market, and above all that had strong protection of property. A country that in addition to protecting tenants also protects homeowners. A country where houses can give much higher net returns than in Italy. A country with few but clear and precise rules. We found all this in the United States. Initially, we bought houses through organized structures. It all seemed fantastic but we realized that something wasn't right... So we took the plane to touch the American reality and we decided to invest time and money in training and direct experience in the field. We wanted to invest part of our resources to generate monthly income without our direct intervention but always having control over the investment made. I confess that sometimes we got burned, but every mistake we made us grow to find the best way to achieve our goal, which, if you're reading this, is also your goal. With this book, we've laid out the road to your goal of real estate investing in the USA. We are all different and there is no one-size-fits-all solution. But there is the best solution for you. Go deeper, understand the dynamics of this investment method, and then, once you get off on the right foot, you'll see that the road will be downhill and you too will discover the pleasure of collecting an extra paycheck every month without going to work... A pleasant feeling. Today more than ever creating a second or third economic income, disconnected from our main job is essential. We all discovered this during the recent lockdown. Work situations can change in a week!!! Having an income disconnected from your job can be a lifeline. Invest in your future and that of your family, invest in income-producing real estate in the USA.
