A need therefore exists to develop and produce a job aid system of Combat Leaders' Guides. A prototype Combat Leaders' Guide: Rifle Platoon and Squad (CLG) was developed and produced using doctrinal materials relating to critical combat common tasks and tasks in skill levels 1-4 in the 11B and 11M Military Occupational Specialties (MOS). The CLG and a feedback form were distributed to over 1,100 active-duty and former active-duty soldiers with over 400 respondents returning their feedback forms. The CLG is also anticipated to be an important tool for soldiers to use when engaged in, and preparing for, combat missions through training and combat proficiency drills. Army, 2020-03 The platoon leader and platoon sergeant are two of the most important leaders in the U.S. Army. The way platoon leaders and sergeants work together as a team can cause the success or failure of companies, battalions, brigades, and divisions. They represent the leading edge of leadership on and off the battlefield. On the battlefield, platoon leaders and sergeants build their platoons, empower squad leaders, integrate outside elements, and use troop-leading procedures to plan and lead. Off the battlefield, platoon leaders and sergeants prepare their platoon for combat through tough training. The platoon leader and platoon sergeant's ability to coach, teach, and mentor their Soldiers leads directly to the readiness of our formations. World-wide, platoon leaders and sergeants are personally leading the U.S. Army at the lowest level. This handbook is a guide for new leaders to help prepare them for a critical crucible of leadership that will determine the U.S. Army's ability to fight and win our country's wars.

oer support form example platoon leader: Platoon Readiness as a Function of Leadership, Platoon, and Company Cultures Bernard M. Bass, 2000 The ultimate criterion of Army light infantry unit readiness is its performance in combat. A second criterion is the unit's readiness in peacekeeping missions. A close representation of requirements for peacekeeping is reflected in the unit's effectiveness in home station. A modified military version of the Multifactor leadership Questionnaire (MLQ) was used to profile the individual leadership style of platoon leaders (PLs) and platoon sergeants (PSGs). The Team Multifactor Leadership Questionnaire (TMLQ) was used to describe the platoon and company culture. Results for the MLQ were in line with expectations derived from Bass and Avolio's full range model of leadership. If leaders, particularly PLs, were transformational according to their superiors, peers, and subordinates, their platoons were seen by raters in home station as more effective both in home station and in simulated combat arenas. The most accurate predictions were made by the company cadres; the least accurate were made by the platoon members. Overall, the level of transformational leadership exhibited by platoon leaders in garrison predicted performance at the Joint Readiness Training Center (JRTC). Similarly the platoon sergeant's transformational leadership also predicted performance at JRTC.--DTIC.
