Plays help us understand ourselves, others, and the world around us. By learning from the past, and the present, the playwrights of tomorrow can create new, vivid, theatrical drama for the future. one man two guvnors script: *Good Nights Out* Aleks Sierz, 2019-12-12 London's West End is a global success story, staging phenomenal hit shows that have delighted millions of spectators and generated billions of pounds in revenue. In *Good Nights Out*, Aleks Sierz provides a thematic survey of such popular theatre shows that were enormous commercial successes over the past 75 years. He argues that these outstanding hits have a lot to say about the collective cultural, social and political attitudes and aspirations of the country, and about how our national identity - and theatre's role in creating it - has evolved over the decades. The book spans a range of work from almost forgotten plays, such as R. F. Delderfield's *Worm's Eye View* and Hugh Hastings's *Seagulls Over Sorrento*, to well-known mega-hits, such as *The Mousetrap* and *The Phantom of the Opera*. Such popular work has tended to be undervalued by some critics and commentators mainly because it has not been thought to be a suitable subject for inclusion in the canon of English Literature. By contrast, Sierz demonstrates that genres such as the British musical, light comedy, sex farce or murder mystery are worth appreciating not only for their intrinsic theatrical qualities, but also as examples of the dream life of the British people. The book challenges the idea that mega-hits are merely escapist entertainments and instead shows how they contribute to the creation of powerful myths about our national life. The analysis of such shows also points towards the possibility of creating an alternative history of postwar British theatre.

one man two guvnors script: Mindset Matters Daniel R. Porterfield, 2024-06-25 How colleges can foster growth mindsets among students—and why this approach matters. We live in an era of escalating, tech-fueled change. Our jobs and the skills we need to work and thrive are constantly evolving, and those who can't keep up risk falling behind. That's where college comes in. In *Mindset Matters*, Daniel R. Porterfield advances a powerful new argument about the value of residential undergraduate education and its role in developing growth mindsets among students. The growth mindset, according to Porterfield, is the belief that we can enhance our core qualities or talents through our efforts, strategies, and education, and with assistance from others. People with growth mindsets have faith in self-improvement. They tend to be goal oriented and optimistic, confident that they can master new challenges because they've done so in the past. Feedback is their friend, errors their opportunities to begin again. For students like this, college is a multiyear process of self-creation and self-emergence, a becoming that unfolds because they are applying themselves in a place rich with stimulating people, happenings, resources, and ideas. America's colleges and universities help students build the skills and self-confidence they need for lifelong discovery, creativity, mentorship, teamwork, and striving. These five mindsets, the book argues, are critical for thriving in disruptive times, and students who develop them will reap the rewards long after they graduate. To show how college activates these mindsets and why it matters, Porterfield shares the personal stories of thirty recent graduates—many the first in their families to attend college. Their growth was both self-powered and supported by involved faculty, engaged peers, and opportunity-rich campuses. Porterfield also outlines how colleges and universities can do more to foster cultures of mentoring and personalized learning that help students become leaders of their own learning.
