schaefer sociology a brief introduction pdf: Handbook of Disaster and Emergency

Management. First Edition Amir Khorram-Manesh, 2017-10-10 We propose here a comprehensive educational program, based on the best available evidence to date drawn from recent publications intended to impart the knowledge, skills, and abilities necessary for the role of crisis manager. We expect this program to enhance the intercultural and interagency performance across the Disaster Management (DM) cycle. Here "Intercultural" does not refer to different nations and cultural backgrounds but rather to working cultures within diverse agencies. Since communication and information shortcomings are the most common reason for failed DM, this educational program focuses heavily on collaboration and interoperability between trained professionals involved in disaster response to ensure that they understand the need for collaboration and are aware of each other's limitations and possibilities. The aim of programs such as this is not to re-educate people in respect to their profession/area of expertise, but rather to train them in elements specific to DM and ways in which they can apply their existing knowledge and professional expertise in the disaster context. Such multidisciplinary programs cover all disaster phases, accommodate the needs of each organization, and offer a safe environment where participants are able to learn by doing in an interactive environment--vertically within their own organization and horizontally together with other organizations--by focusing on shared training, cooperation, and intercultural understanding. Such programs bring some degree of standardization and offer a thorough evaluation of participants

and the program by using evidence-based scientific methods. One important part of the program is to offer a standardized handbook in which all necessary information is gathered. This is not intended as a substitute for reference books, but it is intended to make the information accessible and easy to learn so that the information can be combined with the practical parts of the education

schaefer sociology a brief introduction pdf: The Political Economy of the Spectacle and Postmodern Caste John Asimakopoulos, 2019-10-01 In *The Political Economy of the Spectacle and Postmodern Caste*, John Asimakopoulos analyzes the political economy of the society of the spectacle, a philosophical concept developed by Guy Debord and Jean Baudrillard. Using the analytical tools of social science, while historicizing, Asimakopoulos reveals that all societies in every epoch have been and continue to be caste systems legitimized by various ideologies. He concludes there is no such thing as capitalism (or socialism)—only a caste system hidden behind capitalist ideology. Key features of the book include its broad interdisciplinary-nonsectarian approach with quantitative and qualitative data. *The Political Economy of the Spectacle and Postmodern Caste* is well written and clear, making it accessible to the general public.

schaefer sociology a brief introduction pdf: Hyper Sexual, Hyper Masculine? Brittany C. Slatton, Kamesha Spates, 2016-05-13 This book provides critical insights into the many, often overlooked, challenges and societal issues that face contemporary black men, focusing in particular on the ways in which governing societal expectations result in internal and external constraints on black male identity formation, sexuality and black 'masculine' expression. Presenting new interview and auto-ethnographic data, and drawing on an array of theoretical approaches methodologies, *Hyper Sexual, Hyper Masculine?* explores the formation of gendered and sexual identity in the lives of black men, shedding light on the manner in which these are affected by class and social structure. It examines the intersecting oppressions of race, gender and class, while acknowledging and discussing the extent to which black men's social lives differ as a result of their varying degrees of cumulative disadvantage. A wide-ranging and empirically grounded exploration of the intersecting roles of race, masculinity, and sexuality on the lives of black men, this volume will appeal to scholars across the social sciences with interests in race and ethnicity, gender and sexuality, social stratification and intersectionality.

schaefer sociology a brief introduction pdf: Culture at the Crossroads Asma Hichri, Samira Mechri, 2021-06-02 This collection explores the interfaces of culture, gender, and power from politico-religious, linguistic, legal and historiographic perspectives. More importantly, the contributions gathered here examine culture's manifestations in different socio-economic, political, theoretical, and discursive contexts. Being aware of "the crisis in humanities," researchers, scholars and experts seek to relocate culture and cultural studies within academia and analyze the epistemological relationship between culture and education, while also trying to eschew and refashion the stale conventional methodologies of approaching culture as an academic subject. Is it possible to go beyond the "crisis in humanities" by valorizing culture in social and human sciences, on the one hand, and natural and exact sciences, on the other, especially when we take into consideration the escalation of fundamentalist, extremist and xenophobic tendencies all over the globe? How can we approach the issues of ethics and teaching humanities and sciences? This book moves beyond conventional conceptions of culture that associate it with knowledge and enlightenment to suggest a holistic view of culture that enacts the dialectics of power, nationality, class, gender, and ethnicity in an ever-shifting transnational context. Engaging readers in a lively intellectual and cultural debate, this volume is essential reading for undergraduate and graduate students, teachers, critics, and scholars from various academic fields and disciplines, including historiography, cultural studies, anthropology, political science, literature and critical theory.

schaefer sociology a brief introduction pdf: Handbook of Research on Enhancing Innovation in Higher Education Institutions Babić, Verica, Nedelko, Zlatko, 2020-03-27 Innovation in higher education is a process of institutional adaptation to changes in the environment that enables higher education institutions to improve their existing practice and to be innovative at different levels and in different forms. Moreover, innovativeness is also related to internal characteristics of higher

education institutions. Innovation in higher education can be observed as a result of the changing contexts in which higher education institutions function. Adjacent, a comprehensive approach to considering innovativeness is needed in order to enable the examination of different elements of innovativeness in higher education, that is, to identify the key factors that (de)stimulate innovations and affect their interactions with other relevant stakeholders at the national level and beyond. The Handbook of Research on Enhancing Innovation in Higher Education Institutions is a critical scholarly book that examines innovativeness in higher education and its complications and diversity. Starting from the view that higher education is currently confronted by global forces that require new research ideas, the publication suggests that comprehensive understanding of innovativeness is imperative for higher education's institutions in the 21st century. Analyzing the recognized trends within the publication and concluding which aspects should be taken to improve innovativeness in higher education, this reference book outlines quality and innovation in teaching, innovative university-business cooperation, institutional framework and governance of higher education institutions, knowledge management, and leadership and organizational culture. schaefer sociology a brief introduction pdf: Cross-cultural Deception in Polish and American English in Computer-Mediated Communication Anna Kuzio, 2018-09-30 Deception is omnipresent throughout the evolution of life, inseparable from the development of various modes of communication. By effectively manipulating the behavior of others, apparently by taking advantage of recipients' own rules, communicators are able to gain an advantage while negotiating meaning in a cross-cultural environment. Even though much research related to deceptive behavior and its detection has been conducted in recent years, little of it has concentrated on deception outside of a North American context. This monograph addresses that lacuna. Consistently, most research on deception has examined face-to-face verbal communication and ignored computer-mediated communication. In response, this book also provides detailed insights into how computer-mediated communication and adopted cultural values affect deceptive communication and deception detection across cultures, namely in Poland and the USA. It focuses on discussing theories about why cues to deception exist, theories specific to verbal cues to deception, and theories about computer mediation in communication. The book also proposes a research model postulating relationships between computer-mediated communication media, cue detection, media familiarity, national culture, espoused cultural values, veracity judgment success, and deceptive communicative behavior.

schaefer sociology a brief introduction pdf: Strategies and Methods for Implementing Trauma-Informed Pedagogy Bernadowski, Carianne, 2021-09-10 Twenty-first century classrooms are diverse in nature and everchanging. Students enter classrooms with many experiences, both positive and negative, that influence and affect their ability to learn. More specifically, children who have experienced trauma often struggle socially, emotionally, and academically. Unfortunately, many educators are not adequately trained to identify the signs of trauma in children. In fact, they may misinterpret the outward behavioral manifestations of trauma as other conduct disorders. Strategies and Methods for Implementing Trauma-Informed Pedagogy is a critical reference book that helps teachers and administrators identify manifestations of trauma in children and explain the characteristics and classroom interventions and resources that can aid educators in supporting students who have experienced trauma. This text explains the effects of trauma and the ways in which it manifests in children, explores resources and community options to support children who have experienced trauma, presents strategies to help students who have experienced trauma to learn in the classroom, and teaches the management of behaviors in positive ways to cultivate a community of learners. Covering topics such as positive behavioral interventions and supports (PBIS), racial trauma, and student classroom behavior, this text is essential for classroom teachers, teachers in training, school counselors, school psychologists, preservice teachers, administrators, researchers, and academicians.

schaefer sociology a brief introduction pdf: Statistics and Data Analysis for Social Science Eric J. Krieg, 2019-07-11 Apply statistics to your everyday life. Statistics and Data Analysis for Social Science helps students to build a strong foundational understanding of statistics by providing clarity around when and why statistics are useful. Rather than focusing on the how-to of statistics, author Eric J. Krieg simplifies the complexity of statistical calculations by introducing only what is necessary to understanding each concept. Every chapter is written around and applied to a different social problem or issues—enabling students to broaden their imagination about the statistical tools that can be used to make sense of our world and, maybe, to make the world a better place. In addition to updating all the tables and examples with new data, the Second Edition has replaced the section on SPSS with three new sets of exercises at the end of each chapter: Chapter Exercises for students complete during their reading and bring questions to class, In-Class Exercises that focus on the areas that students struggled with during their reading, and Homework Exercises that can be assigned if students need extra practice with the concepts.

schaefer sociology a brief introduction pdf: Blessing La Política Carlos Vargas-Ramos, Anthony M. Stevens-Arroyo, 2012-04-23 An essential guide to the new face of electoral politics in America, this book provides an examination of the political mobilization of Latinos and Latinas through the churches and the influence of being of the Catholic faith, enabling an understanding of

the social and cultural dynamics at play. *Blessing La Política: The Latino Religious Experience and Political Engagement in the United States* presents a corrective challenge to the authoritative conclusion by the book *Voice and Equality: Civic Voluntarism in American Politics* that Latinos are less likely to become involved in politics because of the predominant Catholic beliefs of this demographic. Through comprehensive analysis of the political tendencies of Latinos and Latinas of faith, the findings in this work consistently counterpoint those conclusions from a variety of perspectives and methodologies. The research presented in the book comprises surveys that are national in scope—both of elites, and at the mass level—as well as localized in cities. The authors have also collected ethnographies that are localized in U.S. cities and transnational in nature. The result is both a broad view of Latino politics and religion, and detailed information that provides far more context that is possible in national-level quantitative studies.

schaefer sociology a brief introduction pdf: *Cohabitation among Students in Higher-Learning Institutions in Tanzania* Elia Shabani Mligo, Jael Omanga Otieno, 2018-02-28
Colleges and universities have been meeting places of students for the sake of studies all over the world. As students transcend from secondary level education to tertiary level, the degree of freedom increases; they become free to live the style of life they choose. This freedom is mainly caused by their advance in age—from childhood to youth ages. Cohabitation is one of the styles of life that students in most higher-learning institutions choose to live. However, cohabitation is not the style of life that emerges in the recent time. In the industrialized world, for example, cohabitation among youth started a long time ago. By the 1970s and 1980s its rate increased greatly due to secularization and increase in freedom. Being aware of this growing trend in cohabitation, this book surveys the extent of cohabitation among students in higher-learning institutions in Tanzania and how it affects the academic performance of the cohabiting partners. It means that the book assesses both positive and negative effects for this style of life among the surveyed students. Therefore, this book is important to both university and college students so that they can be aware of the positive and negative effects of cohabitation, especially in terms of academic performance.

schaefer sociology a brief introduction pdf: *Creating a Culture of Mindful Innovation in Higher Education* Michael Lanford, William G. Tierney, 2022-06-01
Higher education institutions have traditionally nurtured artistic and scientific development and served as catalysts for innovative ideas and products. However, contemporary discourse too often relegates the concept of innovation to the private sector, where the rhetoric of disruption frequently reduces innovation to economic terms. As a result, innovations that could benefit society instead exacerbate existing inequities, and the environmental factors that stimulate long-term innovative progress are neglected. *Creating a Culture of Mindful Innovation in Higher Education* offers a different vision by identifying the conditions that enable college and university administrators, faculty, and staff to promote an innovative institutional culture. Mindful innovation is defined through six central tenets: societal impact; the necessity of failure; creativity through diversity; respect for autonomy and expertise; thoughtful consideration for the dimensions of time, efficiency, and trust; and the incentivization of intrinsic motivation and progress over scare tactics and disruption. Michael Lanford and William G. Tierney offer a clearheaded analysis of the challenges and opportunities in creating a culture of mindful innovation and argue that the institutions that do so will be poised to lead entrepreneurial endeavors, scientific progress, and greater social equity in the twenty-first century.

schaefer sociology a brief introduction pdf: *Terrorism in Kenya and Uganda* Anneli Botha, 2016-11-02
This book analyzes some of the commonly accepted causes of radicalization within the context of four organizations in eastern Africa. It identifies and discusses the facilitating agents needed to enable radicalization and recruitment, and answers one of the most fundamental questions the public and scholars alike are confronted with: Why are all people confronted with the same external circumstances not being radicalized? Practitioners and policymakers will realize that although one can learn from the experiences of others, developing and implementing effective counter-radicalization strategies should be shaped around the unique circumstances of the specific organization.

schaefer sociology a brief introduction pdf: God Is Not a Republican Daniel Korie, 2024-04-09 This book explores the intersections of partisan politics and Christianity in contemporary society. It examines how biblical values, such as equitable justice, honesty, love of other people, and help to the poor, have been compromised for partisan politics, which presents an unprecedented danger to the integrity of the Christian faith. The book presents compelling biblical teachings that contradict the misinformation promoted by some evangelical preachers to give the impression that the Republican Party's political agendas represent God's values. To demystify such misconceptions and present clarifications concerning significant political and social issues, the book draws parallel comparisons of the practices and policies of the Republican Party and Democratic Party and contrasts them with biblical teachings.
