born in blackness pdf: Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War Howard W. French, 2021-10-12 Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, Born in Blackness vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental

unearting of the “New World.” Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe’s dehumanizing engagement with the “dark” continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe’s yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloed and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day. “Capacious and compelling” (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on our present world.

born in blackness pdf: *Anti-Blackness at School* Joi Spencer, Kerri Ullucci, 2022 While schools often are framed as places of neutrality and fairness, many American schools have harmed Black children or been silent in the face of their struggles, under-education, and mistreatment. While there are undoubtedly adults in these spaces who support Black children, many others ignore Black families, minimize students’ concerns, and believe that colorblindness will solve the problem of inequity in education. Embedded in everyday realities, the authors outline the many ways anti-Blackness shows up in schools. Drawing on more than 44 years of equity work, they provide concrete, doable, and meaningful ways in which teachers and administrators can create Black-affirming spaces. Written for pre- and in-service teachers and others working with Black children and youth, *Anti-Blackness at School* explores both the scope of anti-Blackness and how teachers can reject racism. Book Features: Provides interracial perspectives from authors Joi Spencer, a Black woman from California, and Kerri Ullucci, a White woman from Rhode Island. Uses

case studies, activities, lessons, and techniques to talk about anti-Blackness, inventory its presence, and take steps to address the harm caused by it. Calls out how school policies, programs, belief systems, and customs are particularly hostile to Black youth. Explains why diversity work is not synonymous with antiracist work, offering a model focused on justice and equity. Directs practitioners to easily accessible resources that will allow them to challenge racism and uplift Black youth in their care.

born in blackness pdf: *The Paradox(es) of Diasporic Identity, Race and Belonging* Benjamin Maingwa, 2023-10-22 This book explores how questions about home and belonging have been framed in the discourses on race, migration, and social relationships. It does this with the aim of envisioning alternative modes of living and reimagining our political communities in ways that question the legacy of colonization and constructed identities which detract from our sense of obligation to each other and the planet. The book questions problematic categories of difference to transform human relations beyond the materialism of our global political economy. Questions addressed in the volume include: In what ways are combative colonial identities of difference manufactured within our national and global spaces of encounter? How can we expel the racialized and tribalized political identities that seek to purify and deny the complexities and sacredness of being human? How do we embrace the notion that everyone we encounter is a mirror reflecting our fears of suffering and our desires for happiness? The book is set in the context of re-emerging ultra-nationalists and anti-migrant politicians on the national and international stage, advancing various strands of extreme-right and protectionist ideology couched as redemptive-welfarist strategies. The adverse impacts of these strategies seem to be reifying a possessive idea of citizenship and identity, engendering a national fantasy that portrays communities as homogenous entities inhabiting enclosed borders. This is essentially a compendium of conversations across the intersection of the racial, national, ethnic, spiritual, and sexual boundaries in which we live.

born in blackness pdf: *Decolonizing the South African University* Oscar Koopman, Karen J. Koopman, 2023-05-23 This book offers an important contribution to the field of curriculum studies and higher education by examining the impacts of colonialism and neoliberalism in the South African education system and addressing ways to decolonise curriculum and teaching. Drawing on Pinar's work in curricular theory, the authors call for integrating self-reflective curriculum development into the national curriculum process to promote indigenous education and knowledge.

born in blackness pdf: *Born Again and Again* Megan K. Westra, 2020-08-11 Got salvation? What if salvation is not one more thing to acquire but an invitation to radical transformation? Christians often turn life—and faith—into one big quest for the good life. We expect to “get” a good job, loving spouse, a life of comfort, personal satisfaction—oh, and salvation with a cherry on top. Our acquisitive impulses aren’t limited to lattes and designer jeans; Christians in power throughout history have focused on getting people saved, possessing the land, and gaining dominance in government. But what if Christianity isn’t about striving for something more, but about renouncing the power and privilege that prevent us from receiving God’s abundant life? What if we are called not to treat salvation as one more thing to pursue but as an invitation to conform to Christ? *Born Again and Again* is the story of how a religion birthed on the margins of the Roman Empire became functionally the official religion of today’s largest military superpower. Pastor and blogger Megan K. Westra takes on the self-serving form of Christianity that has birthed the doctrine of discovery, planet-killing lifestyles, and civil religion. She leads readers into an encounter with the Jesus who gave up everything to come to us and invites us to give up everything to come to him. Conforming to Christ radically reorients our lives, priorities, and faith away from the pursuit of our own interests and toward a pattern of discipleship, setting us free from fear-based consumption and creating new possibilities for connection and belonging within the community of God’s people.

born in blackness pdf: *Nuances of Blackness in the Canadian Academy* Awad Ibrahim, Tamari Kitossa, Malinda S. Smith, Handel Kashope Wright, 2022-02-02 The essays in *Nuances of Blackness in the Canadian Academy* make visible the submerged stories of Black life in academia. They offer fresh historical, social, and cultural insights into what it means to teach, learn, research,

and work while Black. In daring to shift from margin to centre, the book's contributors confront two overlapping themes. First, they resist a singular construction of Blackness that masks the nuances and multiplicity of what it means to be and experience the academy as Black people. Second, they challenge the stubborn durability of anti-Black tropes, the dehumanization of Blackness, persistent deficit ideologies, and the tyranny of low expectations that permeate the dominant idea of Blackness in the white colonial imagination. Operating at the intersections of discourse and experience, contributors reflect on how Blackness shapes academic pathways, ignites complicated and often difficult conversations, and reimagines Black pasts, presents, and futures. This unique collection contributes to the articulation of more nuanced understandings of the ways in which Blackness is made, unmade, and remade in the academy and the implications for interrelated dynamics across and within post-secondary education, Black communities in Canada, and global Black diasporas.

born in blackness pdf: Latin Blackness in Parisian Visual Culture, 1852-1932 Lyneise E. Williams, 2019-02-21 Latin Blackness in Parisian Visual Culture, 1852-1932 examines an understudied visual language used to portray Latin Americans in mid-19th to early 20th-century Parisian popular visual media. The term 'Latinize' is introduced to connect France's early 19th-century endeavors to create "Latin America," an expansion of the French empire into the Latin-language based Spanish and Portuguese Americas, to its perception of this population. Latin-American elites traveler to Paris in the 1840s from their newly independent nations were denigrated in representations rather than depicted as equals in a developing global economy. Darkened skin, etched onto images of Latin Americans of European descent mitigated their ability to claim the privileges of their ancestral heritage. Whitened skin, among other codes, imposed on turn-of-the-20th-century Black Latin Americans in Paris tempered their Blackness and rendered them relatively assimilatable compared to colonial Africans, Blacks from the Caribbean, and African Americans. After identifying mid-to-late 19th-century Latinizing codes, the study focuses on shifts in latinizing visuality between 1890-1933 in three case studies: the depictions of popular Cuban circus entertainer Chocolat; representations of Panamanian World Bantamweight Champion boxer Alfonso Teofilo Brown; and paintings of Black Uruguayans executed by Pedro Figari, a Uruguayan artist, during his residence in Paris between 1925-1933.

born in blackness pdf: Conflict Minerals, Inc. Christoph N. Vogel, 2022-07-06 In the twenty-first century, the relationship between violent conflict and natural resources has become a matter of intense public and academic debate. As a result of fervent activism and international campaigning, the flagship case of 'conflict minerals' has captured global attention. This term groups together the artisanal tin, tantalum (coltan), tungsten and gold originating from war zones in Central Africa. Known as 'digital minerals' for their use in high-end technology, their exploitation and trade has been singled out in numerous media and United Nations reports as a key driver of violence, provoking an unprecedented popular outcry and prompting transnational efforts to promote 'conflict-free', ethical mining. Focusing on the eastern Democratic Republic of the Congo, Conflict Minerals, Inc. is the first comprehensive analysis of this phenomenon. Based on meticulous investigation and long-term fieldwork, this book analyses why the campaign against 'unethical' mining went awry, and radically disrupted eastern Congo's political economy. It dissects the evolution of the conflict minerals paradigm, the policy responses it triggered and their impact on artisanal miners. Vogel demonstrates how Western advocacy and policy have relied on colonial frames to drive change, and how White Saviourism perpetuates structural violence and inequality across global supply and value chains.

born in blackness pdf: Foreign Aid and Its Unintended Consequences Dirk-Jan Koch, 2023-09-27 Foreign aid and international development frequently bring with it a range of unintended consequences, both negative and positive. This book delves into these consequences, providing a fresh and comprehensive guide to understanding and addressing them. The book starts by laying out a theoretical framework based on complexity thinking, before going on to explore the ten most prevalent kinds of unintended effects of foreign aid: backlash effects, conflict effects, migration and resettlement effects, price effects, marginalization effects, behavioural effects, negative spillover effects, governance effects, environmental effects, and ripple effects. Each chapter revolves around a set of concrete case studies, analysing the mechanisms underpinning the unintended effects and proposing ways in which policymakers, practitioners, and evaluators can tackle negative side effects and maximize positive side effects. The book also includes personal testimonies, a succinct overview of unintended effects, and suggestions for further reading. Providing a clear overview of what side effects to anticipate when planning, executing, and evaluating aid, this book will be an important resource for students, development practitioners, and policymakers alike. born in blackness pdf: Black Politics in Transition Candis Watts Smith, Christina Greer, 2018-10-17 Black Politics in Transition considers the impact of three transformative forces—immigration, suburbanization, and gentrification—on Black politics today. Demographic changes resulting from immigration and ethnic blending are dramatically affecting the character and identity of Black populations throughout the US. Black Americans are becoming more ethnically diverse at the same time that they are sharing space with newcomers from near and far. In addition, the movement of Black populations out of the cities to which they migrated a generation ago—a reverse migration to the American South, in some cases, and in other cases a movement from cities to suburbs shifts the locus of Black politics. At the same time, middle class and white populations are returning to cities, displacing low income Blacks and immigrants alike in a renewal of gentrification. All this makes for an important laboratory of discovery among social scientists, including the diverse range of authors represented here. Drawing on a wide array of disciplinary perspectives and methodological strategies, original chapters analyze the geography of opportunity for Black Americans and Black politics in accessible, jargon-free language. Moving beyond the Black-white binary, this book explores the tri-part relationship among Blacks, whites, and Latinos as well. Some of the most important developments in Black politics are happening at state and local levels today, and this book captures that for students, scholars, and citizens engaged in this dynamic milieu.

born in blackness pdf: All the Colors We Will See Patrice Gopo, 2018-08-07 Patrice Gopo grew up in Anchorage, Alaska, the child of Jamaican immigrants who had little experience being black in America. From her white Sunday school classes as a child, to her early days of marriage in South Africa, to a new home in the American South with a husband from another land, Patrice's life is a testament to the challenges and beauty of the world we each live in, a world in which cultures overlap every day. In *All the Colors We Will See*, Patrice seamlessly moves across borders of space and time to create vivid portraits of how the reality of being different affects her quest to belong. In this poetic and often courageous collection of essays, Patrice examines the complexities of identity in our turbulent yet hopeful time of intersecting heritages. As she digs beneath the layers of immigration questions and race relations, Patrice also turns her voice to themes such as marriage and divorce, the societal beauty standards we hold, and the intricacies of living out our faith. With an eloquence born of pain and longing, Patrice's reflections guide us as we consider our own journeys toward belonging, challenging us to wonder if the very differences dividing us might bring us together after all.

born in blackness pdf: Uncommodified Blackness Mandisi Majavu, 2017-03-14 This book is a study of the lived experience of African men in Australia and New Zealand. The author employs a

relational account of racism which foregrounds how the colonial shaped the contemporary, with the settler states of contemporary Australia and New Zealand having been moulded by their colonial histories. *Uncommodified Blackness* examines the changing racial conditions in Australia and New Zealand, inspired by the view that as racial conditions change globally, prevailing racial modalities in these two countries must be reexamined and theory must be developed or revised as appropriate. Students and scholars across a range of social science disciplines will find this book of interest, particularly those with an interest in refugees, immigration, race and masculinity.

born in blackness pdf: *Hidden in Blackness* Chrystal A. George and Adaurennaya C. Onyewuenyi Mwangi, 2025 *Hidden in Blackness* analyzes the experiences, perspectives, and development of Black immigrant students, while also complicating how race, ethnicity, nativity, and nationality are understood across the P-20 education landscape. The authors unpack how Blackness and anti-Black racism in the United States can foster Black immigrants becoming hidden in Blackness in schools and education research—meaning their Black identity is homogenized into a U.S. construction of Blackness while their ethnicity, nationality, and nativity go unacknowledged or is weaponized to subjugate other people of Color. The book culminates by offering the Black Diasporic Illumination (BDI) framework with recommendations for supporting these students with a positive sense of self and abilities in the face of racial realities. BDI bridges sociocultural ecology, ethnic-racial identity and socialization scholarship, asset orientations, and critical constructions of race and racism into a transdisciplinary approach for understanding the experiences of Black immigrants in U.S. education. “At a time when the importance of diversity, equity, and inclusion and social justice are being debated, this book strikes at the heart of how these issues are both present and absent in the research narratives related to Black immigrant students.” —From the Foreword by Janice B. Fournillier, Georgia State University “Essential insights for better seeing and serving the rich diversity of the Black immigrant student population. A groundbreaking contribution!” —Carola Suárez-Orozco, Harvard Graduate School of Education

born in blackness pdf: *African American Artists and the New Deal Art Programs* Mary Ann Calo, 2023-05-16 This book examines the involvement of African American artists in the New Deal art programs of the 1930s. Emphasizing broader issues informed by the uniqueness of Black experience rather than individual artists’ works, Mary Ann Calo makes the case that the revolutionary vision of these federal art projects is best understood in the context of access to opportunity, mediated by the reality of racial segregation. Focusing primarily on the Federal Art Project (FAP) of the Works Progress Administration (WPA), Calo documents African American artists’ participation in community art centers in Harlem, in St. Louis, and throughout the South. She examines the internal workings of the Harlem Artists’ Guild, the Guild’s activities during the 1930s, and its alliances with other groups, such as the Artists’ Union and the National Negro Congress. Calo also explores African American artists’ representation in the exhibitions sponsored by WPA administrators and the critical reception of their work. In doing so, she elucidates the evolving meanings of the terms race, culture, and community in the interwar era. The book concludes with an essay by Jacqueline Francis on Black artists in the early 1940s, after the end of the FAP program. Presenting essential new archival information and important insights into the experiences of Black New Deal artists, this study expands the factual record and positions the cumulative evidence within the landscape of critical race studies. It will be welcomed by art historians and American studies scholars specializing in early twentieth-century race relations.

born in blackness pdf: *Sixty Years of Service in Africa* Julius A. Amin, 2023-10-06 Based on previously unused primary sources obtained from both sides of the Atlantic, this study provides a more fundamental, consistent, and balanced source-based assessment of the role of the U.S. Peace Corps across its entire existence in Africa. The study sheds light on a new and intriguing historical perspective of the Peace Corps’ meaning and significance. Though the main trust is Cameroon, the study offers a window to understanding Peace Corps performance in all of Africa, and the larger global community. It examines Volunteers’ service in countries including Nigeria, Ghana, Togo, and Guinea, showing how the agency transitioned from a Cold War agency to the Post-Cold War era,

while asking important questions about the continuous relevance of Peace Corps in Africa. In addressing the topic, the book goes beyond the Peace Corps and delves into America's Achilles heels, which was the culture of anti-black racism, showing how it impacted U.S. foreign policy in the post-World War II era. The book interrogates modernization theories showing how those ideas shaped the creation of the Peace Corps, but ultimately contributed to the agency's problems. The book questions the Peace Corps' effectiveness as a development organization and much more. Yet for all the agency's problems, the Peace Corps served as a rite of passage for returned Volunteers to make everlasting contributions to American life and society. This book contributes to modern African and American studies, and to diplomatic history.
