cracking the code book pdf: Multimodal Mediation Through Picturebooks and Graphic Narratives Sandie Mourão, Karen Bennett, 2025-02-27 This collection critically examines the notion of mediation as it manifests itself at the intersection of multimodal literature, education, and translation studies, bringing together perspectives from established and early career scholars. The volume seeks to synthesize the fields of education and translation by exploring points of difference and commonality through multimodal communication, which has grown increasingly crucial in both fields, and how these intersect in picturebooks and graphic narratives, including graphic novels, illustrated books, and other related genres. The book begins with considerations on the multimodal as mediator and how multimodal forms mediate their messages for educational contexts. Next, the exploration of translation as mediation and mediation as translation contemplates the ways in which picturebooks serve as intersemiotic translations of previously verbal texts and as a means of translating abstract concepts into tangible forms. Finally, there is a showcase of empirical research on the mediation of multimodal literature in diverse education settings from around the world. Taken together, the collection makes the case for further study of mediation and multimodality as a valuable concept for advancing research in translation and education. This book will be of particular interest to students and scholars in multimodality, children's literature, translation studies, and educational research.

cracking the code book pdf: Fictions of Integration Naomi Lesley, 2017-03-03 This book examines how children's and young adult literature addresses and interrogates the legacies of American school desegregation. Such literature narrates not only the famous battles to implement desegregation in the South, in places like Little Rock, Arkansas, but also more insidious and less visible legacies, such as re-segregation within schools through the mechanism of disability diagnosis. Novelizations of children's experiences with school desegregation comment upon the politics of getting African-American children access to white schools; but more than this, as school stories, they also comment upon how structural racism operates in the classroom and mutates, over the course of decades, through the pedagogical practices depicted in literature for young readers. Lesley combines approaches from critical race theory, disability studies, and educational philosophy in order to investigate how the educational market simultaneously constrains how racism in schools can be presented to young readers and also provides channels for radical critiques of pedagogy and visions of alternative systems. The volume examines a range of titles, from novels that directly engage the Brown v. Board of Education decision, such as Sharon Draper's *Fire From the Rock* and Dorothy Sterling's *Mary Jane*, to novels that engage less obvious legacies of desegregation, such as Cynthia Voigt's *Dacey's Song*, Sharon Flake's *Pinned*, Virginia Hamilton's *The Planet of Junior Brown*, and Louis Sachar's *Holes*. This book will be of interest to scholars of American studies, children's literature, and educational philosophy and history.

These novels represent the voices of popular conversations, as Americans considered issues of family, class, racism and sexism, feminism, economic ambition, sexual violence, war, law, religion and science. Through the windows of fiction, the book surveys the Cold War and anti-communism, the prefeminist era of the 1950s and the sexual revolution of the 1970s, forms of corporate power in the 1960s and 1980s, the traumatic legacies of slavery and Vietnam, the American fascination with lawyers, cops and criminals, alternate styles of romance in the era of late capitalism, our abiding distrust of science, and our steadfast wonder about the Great Mysteries.
