in the realm of the hungry ghosts pdf: Enforcing Freedom Kerwin Kaye, 2019-12-17 In 1989, the first drug-treatment court was established in Florida, inaugurating an era of state-supervised rehabilitation. Such courts have frequently been seen as a humane alternative to incarceration and the war on drugs. *Enforcing Freedom* offers an ethnographic account of drug courts and mandatory treatment centers as a system of coercion, demonstrating how the state uses notions of rehabilitation as a means of social regulation. Situating drug courts in a long line of state projects of race and class control, Kerwin Kaye details the ways in which the violence of the state is framed as beneficial for those subjected to it. He explores how courts decide whether to release or incarcerate participants using nominally colorblind criteria that draw on racialized imagery. Rehabilitation is defined as preparation for low-wage labor and the destruction of community ties with “bad influences,” a process that turns participants against one another. At the same time, Kaye points toward the complex ways in which participants negotiate state control in relation to other forms of constraint in their lives, sometimes embracing the state’s salutary violence as a means of countering their impoverishment. Simultaneously sensitive to ethnographic detail and theoretical implications, *Enforcing Freedom* offers a critical perspective on the punitive side of criminal-justice reform and points toward alternative paths forward.

in the realm of the hungry ghosts pdf: Good Morning, I Love You Shauna Shapiro, PhD, 2020-01-28 Discover the Transformative Effects of Being Kind to Yourself “This brilliant book offers us both the science and practice of how self-kindness is the secret sauce of fulfillment, transformation, and joy.” —Lorin Roche, meditation teacher and author of *The Radiance Sutras* Many of us yearn to feel a greater sense of inner calm, ease, joy, and purpose. We have tried meditation and found it too difficult. We judge ourselves for being no good at emptying our minds (as if one ever could) or compare ourselves with yogis who seem to have it all together. We live in a steady state of “not good enough.” It does not have to be this way. In *Good Morning, I Love You*, Dr. Shauna Shapiro brings alive the brain science behind why we feel the way we do—about ourselves, each other, and the world—and explains why we get stuck in thinking that doesn’t serve us. It turns out that we are hardwired to be self-critical and negative! And this negativity is constantly undermining our experience of life. “It is never too late to rewire your brain for positivity—for calm, clarity, and joy,” writes Dr. Shapiro. “I know this is possible because I experienced it. Best of all, you can begin wherever you are.” In short, lively chapters laced with science, wisdom, and story, Shapiro, one of the leading scientists studying the effects of mindfulness on the brain, shows us that acting with kindness and compassion toward ourselves is the key. With her roadmap to guide you, including her signature “Good Morning, I Love You” practice, in which you deliberately greet yourself each day with these simple words, you can change your brain’s circuitry and steady yourself in feelings of deep calm, clarity, and joy. For good.

in the realm of the hungry ghosts pdf: *Christ Returns from the Jungle* Marc G. Blainey, 2021-06-01 After more than 450 years of European intrusions into South America's rainforest, small groups of people across Europe now gather discreetly to participate in Amazonian ceremonies their local governments consider a criminal act. As devotees of a new Brazil-based religion called Santo Daime, they claim that they contact God by way of ayahuasca, a potent psychoactive beverage first developed by native communities in pre-Columbian Amazonia. This bitter, brown liquid is a synergy of plants containing DMT, a mind-altering chemical classified as an illicit hallucinogen in most countries. By contrast, Santo Daime members (daimistas) revere ayahuasca as a sacrament, combining it with rituals and theologies borrowed from Christian mysticism, indigenous shamanism, Afro-Brazilian spiritualism, and Western esotericism. The Santo Daime religion was founded in 1930 by an Afro-Brazilian rubber tapper named Raimundo Irineu Serra, now known as Mestre (Master) Irineu. Presenting results from more than a year of fieldwork with Santo Daime groups in Europe, Marc G. Blainey contributes new understandings of contemporary Westerners' search for existential well-being on an increasingly interconnected planet. As a thorough exploration of daimistas' beliefs about the therapeutic potentials of ayahuasca, this book takes readers on an ethnographic journey into the deepest recesses of the human psyche.

in the realm of the hungry ghosts pdf: *Medical Humanities, Sociology and the Suffering Self* Wendy Lowe, 2020-12-22 Following criticisms of the traditionally polarized view of understanding suffering through either medicine or social justice, Lowe makes a compelling argument for how the medical humanities can help to go beyond the traditional biographical and epistemic breaks to see into the nature and properties of suffering and what is at stake. Lowe demonstrates through analysis of major healthcare workforce issues and incidence of burnout how key policies and practices influence healthcare education and experiences of both patients and health professionals. By including first person narratives from health professionals as a tool and resource, she illustrates how dominant ideas about the self enter practice as a refusal of suffering. Demonstrating the relationship between personal experience, theory and research, Lowe argues for a pedagogy of suffering that shows how the moral anguish implicit in suffering is an ethical response of the emergent self. This is an important read for all those interested in medical humanities, health professional education, person-centred care and the sociology of health and illness.

in the realm of the hungry ghosts pdf: *Uncovering the Act of Maternal Infanticide from a Psychological, Political, and Jungian Perspective* Brooke Laufer, 2024-07-02 Using a wide range of disciplinary backgrounds, Laufer examines the topic of maternal infanticide through the lens of Jungian theory and presents an integrated and forensic view of this issue as an aggregate of personal and political moments, and as a feminine and feminist outcry urging human evolution. The first part of the book will dissect the identity of the infanticidal mother and the Death Mother archetype, with the author providing firsthand accounts of patients that she has worked with in her professional career. The second part of the book focuses on interpreting that act of maternal infanticide, and these chapters will look to the construct of patriarchal Motherhood as a way of explaining the drive and actions of an infanticidal mother. The third and final section of the book takes the concept of evolution and transmutation a step further and addresses what is required in

our modern state for the event of maternal infanticide. This is an important new book for Jungian and analytic clinicians and scholars with an interest in maternal archetypes, as well as psychologists and psychiatrists who specialize in perinatal mental health. It would also be appropriate for forensic psychologists and legal analysts, and academics and clinicians in the fields of women's health and studies.

in the realm of the hungry ghosts pdf: *Trauma and Human Rights* Lisa D. Butler, Filomena M. Critelli, Janice Carello, 2019-07-17 Human rights violations and traumatic events often come in victims' experiences; however, the human rights framework and trauma theory are rarely deployed together to illuminate such experiences. This edited volume explores the intersection of trauma and human rights by presenting the development and current status of each of these frameworks, examining traumatic experiences and human rights violations across a range of populations and describing efforts to remediate them. Individual chapters address these topics among Native Americans, African Americans, children, women, lesbian/gay/bisexual/transgender individuals, those with mental disabilities, refugees and asylees, and older adults, and also in the context of social policy and truth and reconciliation commissions. The authors demonstrate that the trauma and human rights frameworks each contribute invaluable and complementary insights, and that their integration can help us fully appreciate and address human suffering at both individual and collective levels.

in the realm of the hungry ghosts pdf: *Red Zones* Marie-Eve Sylvestre, Nicholas Blomley, Céline Bellot, 2020-01-02 In *Red Zones*, Marie-Eve Sylvestre, Nicholas Blomley, and Céline Bellot examine the court-imposed territorial restrictions and other bail and sentencing conditions that are increasingly issued in the context of criminal proceedings. Drawing on extensive fieldwork with legal actors in the criminal justice system, as well as those who have been subjected to court surveillance, the authors demonstrate the devastating impact these restrictions have on the marginalized populations - the homeless, drug users, sex workers and protesters - who depend on public spaces. On a broader level, the authors show how red zones, unlike better publicized forms of spatial regulation such as legislation or policing strategies, create a form of legal territorialization that threatens to invert traditional expectations of justice and reshape our understanding of criminal law and punishment.

in the realm of the hungry ghosts pdf: *Our Chemical Selves* Dayna Nadine Scott, 2015-02-25 Chemicals found in homes, schools, and workplaces are having devastating consequences on human health and the environment. *Our Chemical Selves* examines the gender

dynamics associated with these everyday toxic exposures. Written by leading researchers in science, law, and public policy, the chapters in *Our Chemical Selves* reveal that while exposures to chemicals are pervasive and widespread, people from low-income, racialized, and Indigenous communities face a far greater risk of exposure. At the same time, the risks associated with these exposures (and the burdens of managing them) rest disproportionately on the shoulders of women. This collection hones in on the “political economy of pollution” by critically examining the system that manufactures the chemicals and the social, political, and gender relations that enable harmful chemicals to continue being produced and consumed. It also demonstrates the urgent need to revise existing approaches to the regulation of toxics, including Canada’s current Chemicals Management Plan.

With contributions from leading scholars including Dennis Raphael, this book addresses the need for systemic change both in and outside of the Canadian health care system and will engage students in health studies, nursing, and social work in crucial topics like health promotion, social inequality, and community health.

in the realm of the hungry ghosts pdf: Trauma Proof Benjamin Perks, 2025-04-22 Lucid, clear, visionary—Bessel van der Kolk, author of *The Body Keeps The Score* An expert's inspiring, deeply personal account of how childhood trauma can be overcome. From the moment they're born, babies seek a loving parental attachment. When that connection is absent, it derails childhood development in ways that can last a lifetime. The annual health costs of illness related to child trauma for North America and Europe alone are 1.3 trillion dollars. Child trauma is much more widespread than previously thought and passes from one generation to the next. But that's not the end of the story—there is overwhelming evidence that this intergenerational transmission can be disrupted. So why isn't the eradication of childhood trauma a tier-one public priority, like defense or growth? In *Trauma Proof*, Benjamin Perks argues that it must be, and that we can tackle it as a public health problem like COVID-19, by 1) Making sure everyone is aware of the risk; 2) Preventing transmission; and 3) Opening pathways to healing. Perks shows we have the tools to make these three things happen, and the evidence to show they work. The fields of psychology, neuroscience, and medicine have made huge leaps in the past 25 years. We now know what causes Adverse Childhood Experiences (ACEs), how to reduce them, and how to address them. For the first time in history, we know child mistreatment is not inevitable. Combining expert interviews and intensive reportage from Jamaica to Scotland, from Brooklyn to Birmingham, Perks shows the steps we can take to stem the epidemic of childhood trauma. He also shares his personal story of growing up in violent group homes, fathering a child at fifteen and finding his way, in his thirties to healing. *Trauma Proof* is a rallying call to address child trauma as the public health crisis it is—because we can do better for kids, and we should.

in the realm of the hungry ghosts pdf: Men and Loss Kerry Jones, Martin Robb, 2024-07-19 This important book draws together new research and theories about bereavement, on the one hand, and men and masculinities on the other, to increase our understanding of men's experience of loss and contribute towards improving support services for men following bereavement. Bereavement and loss are unavoidable events in life and can be challenging experiences for anyone, regardless of gender. However, in contemporary western cultures, men's experience of bereavement continues to be framed by socially constructed ideas surrounding masculinity, which dictate that men must be stoic following a loss, with grief manifesting in either anger or despair. Men who do not grieve in accepted 'masculine' ways can feel judged, alienated or disenfranchised. This interdisciplinary and interprofessional collection presents theoretical analysis, reports of research findings, reviews of

support and interventions, and a wealth of personal accounts. It includes chapters discussing partner loss, childhood bereavement, perinatal loss and bereavement through suicide, as well as bereavement at all stages of the life course. *Men and Loss* is an essential read for advanced students and researchers with an interest in men's health and bereavement studies from a range of disciplinary backgrounds, including nursing, medicine, counselling, sociology, social work and psychology.

in the realm of the hungry ghosts pdf: *Opioid Reckoning* Amy C. Sullivan, 2021-10-19 Examines the complexity and the humanity of the opioid epidemic America's opioid epidemic continues to ravage families and communities, despite intense media coverage, federal legislation, criminal prosecutions, and harm reduction efforts to prevent overdose deaths. More than 450,000 Americans have died from opioid overdoses since the late 1990s. In *Opioid Reckoning*, Amy C. Sullivan explores the complexity of the crisis through firsthand accounts of people grappling with the reverberating effects of stigma, treatment, and recovery. Nearly everyone in the United States has been touched in some way by the opioid epidemic, including the author and her family. Sullivan uses her own story as a launching point to learn how the opioid epidemic challenged longstanding recovery protocols in Minnesota, a state internationally recognized for pioneering addiction treatment. By centering the voices of many people who have experienced opioid use, treatment, recovery, and loss, Sullivan exposes the devastating effects of a one-size-fits-all approach toward treatment of opioid dependency. Taking a clear-eyed, nonjudgmental perspective of every aspect of these issues—drug use, parenting, harm reduction, medication, abstinence, and stigma—*Opioid Reckoning* questions current treatment models, healthcare inequities, and the criminal justice system. Sullivan also imagines a future where anyone suffering an opioid-use disorder has access to the individualized care, without judgment, available to those with other health problems. *Opioid Reckoning* presents a captivating look at how the state that invented “rehab” addresses the challenges of the opioid epidemic and its overdose deaths while also taking readers into the intimate lives of families, medical and social work professionals, grassroots activists, and many others impacted by the crisis who contribute their insights and potential solutions. In sharing these stories and chronicling their lessons, Sullivan offers a path forward that cultivates empathy, love, and hope for anyone affected by chaotic drug use and its harms.

in the realm of the hungry ghosts pdf: *Small Cities, Big Issues* Christopher Walmsley, Terry Kading, 2018-07-20 Small Canadian cities confront serious social issues as a result of the neoliberal economic restructuring practiced by both federal and provincial governments since the 1980s. Drastic spending reductions and ongoing restraint in social assistance, income supports, and the provision of affordable housing, combined with the offloading of social responsibilities onto municipalities, has contributed to the generalization of social issues once chiefly associated with Canada's largest urban centres. As the investigations in this volume illustrate, while some communities responded to these issues with inclusionary and progressive actions others were more exclusionary and reactive—revealing forms of discrimination, exclusion, and “othering” in the implementation of practices and policies. Importantly, however their investigations reveal a broad range of responses to the social issues they face. No matter the process and results of the proposed solutions, what the contributors uncovered were distinctive attributes of the small city as it struggles to confront increasingly complex social issues. If local governments accept a social agenda as part of its responsibilities, the contributors to *Small Cities, Big Issues* believe that small cities can succeed in reconceiving community based on the ideals of acceptance, accommodation, and inclusion.
