matthew desmond evicted pdf: After the Projects Lawrence J. Vale, 2019 America is in the midst of a rental housing affordability crisis. More than a quarter of those that rent their homes spend more than half of their income for housing, even as city leaders across the United States have been busily dismantling the nation's urban public housing projects. In *After the Projects*, Lawrence

Vale investigates the deeply-rooted spatial politics of public housing development and redevelopment at a time when lower-income Americans face a desperate struggle to find affordable rental housing in many cities. Drawing on more than 200 interviews with public housing residents, real estate developers, and community leaders, Vale analyzes the different ways in which four major American cities implemented the federal government's HOPE VI program for public housing transformation, while also providing a national picture of this program. Some cities attempted to minimize the presence of the poorest residents in their new mixed-income communities, but other cities tried to serve as many low-income households as possible. Through examining the social, political, and economic forces that underlie housing displacement, Vale develops the novel concept of governance constellations. He shows how the stars align differently in each city, depending on community pressures that have evolved in response to each city's past struggles with urban renewal. This allows disparate key players to gain prominence when implementing HOPE VI redevelopment. A much-needed comparative approach to the existing research on public housing, *After the Projects* shines a light on the broad variety of attitudes towards public housing redevelopment in American cities and identifies ways to achieve more equitable processes and outcomes for low-income Americans.

matthew desmond evicted pdf: The ^AGreat Risk Shift Jacob S. Hacker, 2019-02-27 Well before the late-2000s financial crisis, economic risk was shifting from the broad shoulders of government and business onto the fragile backs of American families. In this fully revised second edition, Jacob Hacker presents startling new evidence of Americans' increasing insecurity in the post-financial crash era and compelling new ideas to restore the American Dream.

matthew desmond evicted pdf: Homelessness in America Stephen Eide, 2022-06-02 The last thirty years have witnessed an urban renaissance in America. Major cities have managed to drive down the murder rate, improve the schools, restore the built environment, and revitalize their economies. Middle class families are putting down roots in neighborhoods once given up for dead. But solutions to homelessness have eluded even the most successful cities. While the South Bronx was once synonymous across the globe for "slum," now, San Francisco and Los Angeles are just as internationally notorious for their homelessness crises. Indeed, the same cities with the worst homelessness crises rank among America's most successful. One of the crisis' more perplexing features is how cities that have met with so much success with respect to economic development, crime and public education have failed to even ease their homelessness crisis, much less end it. In *Homelessness in America*, Stephen Eide examines the history, governmental and private responses, and future prospects of this intractable challenge. The "chronic" nature of the challenge should be understood, he argues, by reference to American history and American ideals. The history of homelessness is bound up with industrialization and urbanization, the closing of the West, the Great Depression, and the post WWII decline and subsequent revival of great American cities. Though we've used different terms ("tramp" "hobo" "bum") at other times, something like homelessness has always been with us and the debate over causes and solutions has always involved conflicts over fundamental values. After explaining why homelessness persists in America and correcting popular misconceptions about the issue, Eide offers concrete recommendations for how we can do better for the homeless population. *Homelessness in America* engages readers by answering the most common questions their audience brings to the topic and exploring other questions that are no less important for being not as commonly asked. Homelessness intersects with multiple other policy areas: education, urban development, criminal justice reform, mental health. By exploring the intersection of homelessness with so many other policy areas, this book aspires to provide a comprehensive account of the challenge.

matthew desmond evicted pdf: When We Walk By Kevin F. Adler, Donald W. Burnes, 2023-11-07 How to end homelessness in America: a must-read guide to understanding housing instability, supporting our unhoused neighbors, and reclaiming our humanity. A deeply humanizing analysis that will change the way you think about poverty and homelessness—for the socially engaged reader of Isabel Wilkerson's *Caste* and Matthew Desmond's *Evicted*. Think about the last

time that you saw or interacted with an unhoused person. What did you do? What did you say? Did you offer money or a smile, or did you avert your gaze? *When We Walk By* takes an urgent look at homelessness in America, showing us what we lose—in ourselves and as a society—when we choose to walk past and ignore our neighbors in shelters, insecure housing, or on the streets. And it brilliantly shows what we stand to gain when we embrace our humanity and move toward evidence-based people-first, community-driven solutions, offering social analysis, economic and political histories, and the real stories of unhoused people. Authors Kevin F. Adler and Donald W. Burnes, with Amanda Banh and Andrijana Bilbija, recast chronic homelessness in the U.S. as a byproduct of twin crises: our social services systems are failing, and so is our humanity. Readers will learn: Why our brains have been trained to overlook our unhoused neighbors The social, economic, and political forces that shape myths like “all homeless people are addicts” and “they’d have a house if they got a job” What conservative economics gets wrong about housing insecurity What relational poverty is, and how to shift away from “us versus them” thinking That for many Americans, housing insecurity is just one missed paycheck away Who “the homeless” really are—and why that might surprise you What you can do to help, starting today A necessary, deeply humanizing read that goes beyond theory and policy analysis to offer engaged solutions with compassion and heart, *When We Walk By* is a must-read for anyone who cares about homelessness, housing solutions, and their own humanity.

matthew desmond evicted pdf: Poverty and Power Edward Royce, 2022-06-09 Poverty is a serious problem in the United States, more so than commonly imagined, and more so than in other industrialized nations. Most Americans adhere to an individualistic perspective: they believe poverty is largely the result of people being deficient in intelligence, determination, education, and other personal traits. *Poverty and Power*, Fourth Edition challenges this viewpoint, arguing that poverty arises from the workings of four key structural systems—the economic, the political, the cultural, and the social—and ten obstacles to economic justice, including unaffordable housing, inaccessible health care, and racial and gender discrimination. The author argues that a renewed war on poverty can be successful, but only through a popular movement to bring about significant change in the workings of American economic, political, and cultural institutions. New to this Edition Enhanced conversation on why the cultural theory of poverty has such a strong appeal to the American public develops students’ critical thinking skills (Chapter 3) New segment on the influence of job seekers’ physical appearance on hiring decisions showing that success is not simply a matter of education, skills, and training (Chapter 4) New data on the “job availability problem” explains in detail why the monthly headline unemployment number is misleading, and new content on the 2021 upsurge of quits on the part of American workers portrays efforts on the part of ordinary people to improve their lives (Chapter 5) New content on how corporations have become increasingly assertive political players explores the dramatic increase in corporate lobbying efforts, the rise of billionaire political activists, and the creation of a powerful conservative political infrastructure in the United States (Chapter 6) Greater attention to racially segregated and resource-deprived Black communities covers the extraordinary hardships experienced by the residents of these areas, while a new section on the geographical isolation of the affluent discusses how isolation affects wealthy people’s beliefs and perceptions about poverty and what policies they deem acceptable (Chapter 8)

Patrick Johnson, 2016-10-13 The follow-up to the groundbreaking *Black Queer Studies*, the edited collection *No Tea, No Shade* brings together nineteen essays from the next generation of scholars, activists, and community leaders doing work on black gender and sexuality. Building on the foundations laid by the earlier volume, this collection's contributors speak new truths about the black queer experience while exemplifying

the codification of black queer studies as a rigorous and important field of study. Topics include raw sex, pornography, the carceral state, gentrification, gender nonconformity, social media, the relationship between black feminist studies and black trans studies, the black queer experience throughout the black diaspora, and queer music, film, dance, and theater. The contributors both disprove naysayers who believed black queer studies to be a passing trend and respond to critiques of the field's early U.S. bias. Deferring to the past while pointing to the future, *No Tea, No Shade* pushes black queer studies in new and exciting directions. Contributors: Jafari S. Allen, Marlon M. matthew desmond evicted pdf: *Plundered* Bernadette Atuahene, 2025-01-28 Clear.

Accessible. Compelling. —Ibram X. Kendi, MacArthur Genius fellow and author of *Stamped from the Beginning* and *How to Be an Antiracist* In the spirit of *Evicted*, a property law scholar uses the stories of two grandfathers—one white, one Black—who arrived in Detroit at the turn of the twentieth century to reveal how racist policies weaken Black families, widen the racial wealth gap, and derive profit from pain. When Professor Bernadette Atuahene moved to Detroit, she planned to study the city's squatting phenomenon. What she accidentally found was too urgent to ignore. Her neighbors, many of whom had owned their homes for decades, were losing them to property tax foreclosure, leaving once bustling Black neighborhoods blighted with vacant homes. Through years of dogged investigation and research, Atuahene uncovered a system of predatory governance, where public officials raise public dollars through laws and processes that produce or sustain racial inequity—a nationwide practice in no way limited to Detroit. In this powerful work of scholarship and storytelling, Atuahene shows how predatory governance invites complicity from well-meaning people, eviscerates communities, and widens the racial wealth gap. Using a multigenerational narrative, Atuahene tells a riveting tale about racist policies, how they take root, why they flourish, and who profits.

matthew desmond evicted pdf: *Sunbelt Blues* Andrew Ross, 2021-10-26 An eye-opening investigation of America's rural and suburban housing crisis, told through a searing portrait of precarious living in Disney World's backyard. Today, a minimum-wage earner can afford a one-bedroom apartment in only 145 out of 3,143 counties in America. One of the very worst places in the United States to look for affordable housing is Osceola County, Florida. Once the main approach to Disney World, where vacationers found lodging on their way to the Magic Kingdom, the fifteen-mile Route 192 corridor in Osceola has become a site of shocking contrasts. At one end, global investors snatch up foreclosed properties and park their capital in extravagant vacation homes for affluent visitors, eliminating the county's affordable housing in the process. At the other, underpaid tourist industry workers, displaced families, and disabled and elderly people subsisting on government checks cram themselves into dilapidated, roach-infested motels, or move into tent camps in the woods. Through visceral, frontline reporting from the motels and encampments dotting central Florida, renowned social analyst Andrew Ross exposes the overlooked housing crisis sweeping America's suburbs and rural areas, where residents suffer ongoing trauma, poverty, and nihilism. As millions of renters face down evictions and foreclosures in the midst of the COVID-19 recession, Andrew Ross reveals how ineffective government planning, property market speculation, and poverty wages have combined to create this catastrophe. Urgent and incisive, *Sunbelt Blues* offers original insight into what is quickly becoming a full-blown national emergency.

matthew desmond evicted pdf: Building a Solidarity Society Marianne T. Hill, 2022-08-12 BUILDING A SOLIDARITY SOCIETY Is it the impossible dream: a caring and sustainable society that fosters the flourishing of people and planet? Many are deeply skeptical about whether such a transformative change is a goal worth pursuing. But pursuit of this goal may be our only realistic choice; the misuse of power then is the obstacle to be overcome. This book leads the skeptical reader — whether college student or underpaid worker — on an exploration of the priorities of the powerful, the economic theories that justify their decisions, and the alternative world views that are firing the imagination and efforts of activists across the globe. Economist Marianne Hill speaks to those who worry that switching from a capitalist to a democratic economy would kill the goose that lays the golden eggs. Drawing on cutting-edge scholarship, she explores why people accept a status quo in which the few have the right to control the labor of the many, and the right to distribute the wealth collectively created. Research findings, data and stories drawn from the COVID-19 pandemic and other recent crises are used to explain why plutocrats show little concern for the economic distress and insecurity suffered by so many. Steps can be taken to move us towards a more humane and sustainable way of living. Exciting possibilities are presented, based on recent manifestos, party platforms, books and documents. Advocates for a caring solidarity society are many and, once united, can be the force that redistributes power in firms, families and society. This book aims to foster the clarity, cohesion and courage that can ensure their success.

matthew desmond evicted pdf: Lean Semesters Sekile M. Nzinga, 2020-10-13 Addressing in depth the reality that women of color, particularly Black women, face compounded exploitation and economic inequality within the neoliberal university. More Black women are graduating with advanced degrees than ever before. Despite the fact that their educational and professional opportunities should be expanding, highly educated Black women face strained and worsening economic, material, and labor conditions in graduate school and along their academic career trajectory. Black women are less likely to be funded as graduate students, are disproportionately hired as contingent faculty, are trained and hired within undervalued disciplines, and incur the highest levels of educational debt. In *Lean Semesters*, Sekile M. Nzinga argues that the corporatized university—long celebrated as a purveyor of progress and opportunity—actually systematically indebts and disposes of Black women's bodies, their intellectual contributions, and their potential en masse. Insisting that shifts in higher education must recognize such unjust dynamics as intrinsic, not tangential, to the operation of the neoliberal university, Nzinga draws on candid interviews with thirty-one Black women at various stages of their academic careers. Their richly varied experiences reveal why underrepresented women of color are so vulnerable to the compounded forms of exploitation and inequity within the late capitalist terrain of this once-revered social institution. Amplifying the voices of promising and prophetic Black academic women by mapping the impact of the current of higher education on their lives, the book's collective testimonies demand that we place value on these scholars' intellectual labor, untapped potential, and humanity. It also illuminates the ways past liberal feminist victories within academia have yet to become accessible to all women. Informed by the work of scholars and labor activists who have interrogated the various forms of inequity produced and reproduced by institutions of higher education under neoliberalism, *Lean Semesters* serves as a timely and accessible call to action.

matthew desmond evicted pdf: City, State Ran Hirschl, 2020-06-12 More than half of the

world's population lives in cities; by 2050, it will be more than three quarters. Projections suggest that megacities of 50 million or even 100 million inhabitants will emerge by the end of the century, mostly in the Global South. This shift marks a major and unprecedented transformation of the organization of society, both spatially and geopolitically. Our constitutional institutions and imagination, however, have failed to keep pace with this new reality. Cities have remained virtually absent from constitutional law and constitutional thought, not to mention from comparative constitutional studies more generally. As the world is urbanizing at an extraordinary rate, this book argues, new thinking about constitutionalism and urbanization is desperately needed. In six chapters, the book considers the reasons for the constitutional blind spot concerning the metropolis, probes the constitutional relationship between states and (mega)cities worldwide, examines patterns of constitutional change and stalemate in city status, and aims to carve a new place for the city in constitutional thought, constitutional law and constitutional practice.

matthew desmond evicted pdf: Grace Can Lead Us Home Kevin Nye, 2022-08-09 On any given night, more than half a million Americans and Canadians find themselves sleeping on the streets, in shelters, cars, and other places not meant for human habitation. Yet as this crisis continues to grow, it remains one of the least talked about—especially in churches. Even where compassion and empathy exist, the complexities around homelessness can make us feel stuck, overwhelmed, or numb to the existence of unhoused people in our cities and neighborhoods. Reporting back from his work in homeless services, minister and advocate Kevin Nye introduces readers to the Christ he's met in tents, shelters, and drop-in centers. He demystifies homelessness by journeying into complex issues like affordable housing, mental illness, addiction, and more, while reimagining our theological approach to these matters and educating us on how they intersect with homelessness. This thorough and intimate book shows us that from the margins, Jesus has something to teach us all about grace—something that could change the landscape of homelessness entirely if we're ready to hear it.

matthew desmond evicted pdf: The Presidency of Barack Obama Julian E. Zelizer, 2018-03-13 Barack Obama's election as the first African American president seemed to usher in a new era, and he took office in 2009 with great expectations. But by his second term, Republicans controlled Congress, and, after the 2016 presidential election, Obama's legacy and the health of the Democratic Party itself appeared in doubt. In *The Presidency of Barack Obama*, Julian Zelizer gathers leading American historians to put President Obama and his administration into political and historical context. These writers offer strikingly original assessments of the big issues that shaped the Obama years, including the conservative backlash, race, the financial crisis, health care, crime, drugs, counterterrorism, Iraq and Afghanistan, the environment, immigration, education, gay rights, and urban policy. Together, these essays suggest that Obama's central paradox is that, despite effective policymaking, he failed to receive credit for his many achievements and wasn't a party builder. Provocatively, they ask why Obama didn't unite Democrats and progressive activists to fight the conservative counter-tide as it grew stronger. -- Publisher's description

matthew desmond evicted pdf: Property and Human Flourishing Gregory S. Alexander, 2018-02-26 Many people assume that what morally justifies private ownership of property is either individual freedom or social welfare, defined in terms of maximizing personal preference-satisfaction. This book offers an alternative way of understanding the moral underpinning of private ownership of property. Rather than identifying any single moral value, this book argues that human flourishing, understood as morally pluralistic and objective, is property's moral foundation. The book goes on to develop a theory that connects ownership and human flourishing with obligations. Owners have obligations to members of the communities that enabled the owners to live flourishing lives by cultivating in their community members certain capabilities that are essential to leading a well-lived life. These obligations are rooted in the interdependence that exists between owners and their community members, and inherent in the human condition. Obligations have always been inherent in ownership. Owners are not free to inflict nuisances upon their neighbors, for example, by operating piggeries in residential neighborhoods. The human flourishing theory explains why owners at times have obligations that enable their fellow community

members to develop certain necessary capabilities, such as health care and security. This is why, for example, farm owners may be required to allow providers of health care and legal assistance to enter their property to assist employees who are migrant workers. Moving from the abstract and theoretical to the practical, this book considers implications for a wide variety of property issues of importance both in the literature and in modern society.

Lessons from Eviction Court goes behind the disturbing statistics of evictions and homelessness to provide the first-hand experience of a lawyer who is in eviction court each week, standing alongside people who are losing their homes. Fran Quigley provides a clear and emphatic prescription for how we can end evictions and homelessness in the United States, with the stories of struggling clients serving as the introduction for discussions of the reforms needed. Homelessness does not need to happen, nor do widespread evictions. They do not occur in other nations like in ours, and they did not used to not be the norm here in the US. Lessons from Eviction Court explains how we can end this national crisis.

matthew desmond evicted pdf: Food Insecurity on Campus Katharine M. Broton, Clare L. Cady, 2020-05-12
The hidden problem of student hunger on college campuses is real. Here's how colleges and universities are addressing it. As the price of college continues to rise and the incomes of most Americans stagnate, too many college students are going hungry. According to researchers, approximately half of all undergraduates are food insecure. Food Insecurity on Campus—the first book to describe the problem—meets higher education's growing demand to tackle the pressing question How can we end student hunger? Essays by a diverse set of authors, each working to address food insecurity in higher education, describe unique approaches to the topic. They also offer insights into the most promising strategies to combat student hunger, including • utilizing research to raise awareness and enact change; • creating campus pantries, emergency aid programs, and meal voucher initiatives to meet immediate needs; • leveraging public benefits and nonprofit partnerships to provide additional resources; • changing higher education systems and college cultures to better serve students; and • drawing on student activism and administrative clout to influence federal, state, and local policies. Arguing that practice and policy are improved when informed by research, Food Insecurity on Campus combines the power of data with detailed storytelling to illustrate current conditions. A foreword by Sara Goldrick-Rab further contextualizes the problem. Offering concrete guidance to anyone seeking to understand and support college students experiencing food insecurity, the book encourages readers to draw from the lessons learned to create a comprehensive strategy to fight student hunger.
