the future of an illusion pdf: *The Future of Identity in the Information Society* Simone Fischer-Hübner, Penny Duquenoy, Albin Zuccato, Leonardo Martucci, 2008-06-11 The increasing diversity of Information Communication Technologies and their equally diverse range of uses in personal, professional and official capacities raise challenging questions of identity in a variety of contexts. Each communication exchange contains an identifier which may, or may not, be intended by the parties involved. What constitutes an identity, how do new technologies affect identity, how do we manage identities in a globally networked information society? From the 6 to the 10 August 2007, IFIP (International Federation for Information Processing) working groups 9. 2 (Social Accountability), 9. 6/11. 7 (IT Misuse and the Law) and 11. 6 (Identity Management) hold their 3 International Summer School on The Future of Identity in the Information Society in cooperation with the EU Network of Excellence FIDIS at Karlstad University. The Summer School addressed the theme of Identity Management in relation to current and future technologies in a variety of contexts. The aim of the IFIP summer schools has been to introduce participants to the social implications of Information Technology through the process of informed discussion. Following the holistic approach advocated by the involved IFIP working groups, a diverse group of participants ranging from young doctoral students to leading researchers in the field were encouraged to engage in discussion, dialogue and debate in an informal and supportive setting. The interdisciplinary, and international, emphasis of the Summer School allowed for a broader understanding of the issues in the technical and social spheres.

the future of an illusion pdf: *The Oceanic Feeling* Isabella Lövin, Isabella Lövin's *The Oceanic Feeling: On the Need for a New Narrative*, is a unique document of a life spent on the front lines of the climate battle, and at the negotiating tables where the future of our planet is decided. The Swedish investigative journalist who became a member of the European Parliament and then served for seven years in government, five of those as Deputy Prime Minister and Climate Minister, takes us on a journey behind the scenes of climate and global ocean policy making. Some may remember the viral picture of her signing the Swedish climate law in 2017. As Donald Trump just had signed a regressive executive order limiting women's sexual and reproductive rights surrounded by only men, she by contrast signed progressive climate legislation surrounded by women. Deeply concerned about the shrinking confidence in democracy Lövin offers a pedagogic and hopeful account of the fact that change can happen, if there is a will and a vision. But she also recognizes the main reason why humanity is not acting on the many global crises: a narrative of egoism and individualism. A truer and much more positive story can be found when we recognize "The Oceanic Feeling"; a deep connection with nature, people and the miraculous web of life on the planet; putting empathy, responsibility and awe at the center of what it is to be human. How, Lövin asks us, can we convert the world to this new, healthier narrative?

the future of an illusion pdf: *The Future of Responsible Management Education* Christian Hauser, Wolfgang Amann, 2023-03-25 Business schools have been criticized for several things, such as lacking relevance, a too weak ethics orientation, dated paradigms, or commercialization. This book outlines how to better understand and master the digital transformation challenge. It is essential that business school deans, program directors, and faculty members embrace new opportunities to bring the UN-backed Principles of Responsible Management Education (PRME) to life successfully. Part of the Humanism in Business series, this book constitutes a valuable resource for leaders in universities and business schools, as well as individual faculty members aspiring to optimize how they respond to digital transformation. It can also be of use to those studying responsible management education, leadership and business ethics more generally.

By asking the question -What do you see as the most significant challenges for the development of the law? What developments are we likely to see in the coming two to three decades? What do those developments mean for national legal systems as a whole?- the Hague Institute for the Internationalisation of Law (HiiL) has canvassed the views of a large number of renowned experts in particular areas of law. This volume was prepared as part of the Law of the Future Joint Action Programme and as the basis of the Law of the Future Conference on 23 and 24 June 2011. The Law of the Future Joint Action Programme is based on the premise that prospective thinking about law is not only desirable but also required in order to ensure that law and legal systems do not become obsolete, ineffective or unjust. The aim is to set a world standard in thinking ahead, to guide decision makers today. For more information, visit www.lawofthefuture.org.
