the palestine laboratory pdf: *The Walls Have Eyes* Petra Molnar, 2024-05-21 With a Foreword by E. Tendayi Achiume A chilling exposé of the inhumane and lucrative sharpening of borders around the globe through experimental surveillance technology Finalist for the Governor General's Literary Award for Nonfiction In 2022, the U.S. Department of Homeland Security announced it was training “robot dogs” to help secure the U.S.-Mexico border against migrants. Four-legged machines equipped with cameras and sensors would join a network of drones and automated surveillance towers—nicknamed the “smart wall.” This is part of a worldwide trend: as more people are displaced by war, economic instability, and a warming planet, more countries are turning to AI-driven

technology to “manage” the influx. Based on years of researching borderlands across the world, lawyer and anthropologist Petra Molnar’s *The Walls Have Eyes* is a truly global story—a dystopian vision turned reality, where your body is your passport and matters of life and death are determined by algorithm. Examining how technology is being deployed by governments on the world’s most vulnerable with little regulation, Molnar also shows us how borders are now big business, with defense contractors and tech start-ups alike scrambling to capture this highly profitable market. With a foreword by former UN Special Rapporteur E. Tendayi Achiume, *The Walls Have Eyes* reveals the profound human stakes of the sharpening of borders around the globe, foregrounding the stories of people on the move and the daring forms of resistance that have emerged against the hubris and cruelty of those seeking to use technology to turn human beings into problems to be solved.

the palestine laboratory pdf: *The Palestine Laboratory* Antony Loewenstein, 2023-05-23 How Israel makes a killing from the occupation of Palestine **WINNER OF THE 2023 WALKLEY NON FICTION JOURNALISM PRIZE** **Shortlisted for the 2023 Moore Prize for Human Rights Writing** Israel’s military industrial complex uses the occupied, Palestinian territories as a testing ground for weaponry and surveillance technology that they then export around the world to despots and democracies. For more than 50 years, occupation of the West Bank and Gaza has given the Israeli state invaluable experience in controlling an “enemy” population, the Palestinians. It’s here that they have perfected the architecture of control. Best-selling journalist Antony Loewenstein, author of *Disaster Capitalism*, uncovers this largely hidden world in a global investigation with secret documents, revealing interviews and on-the-ground reporting. This book shows in-depth, for the first time, how Palestine has become the perfect laboratory for the Israeli military-techno complex: surveillance, home demolitions, indefinite incarceration and brutality to the hi-tech tools that drive the 'Start-up Nation'. From the Pegasus software that hacked Jeff Bezos' and Jamal Khashoggi's phones, the weapons sold to the Myanmar army that has murdered thousands of Rohingyas and drones used by the European Union to monitor refugees in the Mediterranean who are left to drown. Israel has become a global leader in spying technology and defence hardware that fuels the globe's most brutal conflicts. As ethno-nationalism grows in the 21st century, Israel has built the ultimate model.

the palestine laboratory pdf: *Theology After Gaza* Mitri Raheb, Graham McGeoch, 2025-08-14 This is a book about genocide and Gaza. Gaza has become the moral compass of our world today. In this war, theology was weaponized against the Palestinian people by both Israeli politicians and Christian Zionists. It is a book inspired by Palestinian liberation theologies. The book foregrounds scholarly and practical responses to the Israeli invasion of a part of the occupied Palestinian territories widely referred to as Gaza in the media and popular discourse. However, the book also situates Gaza and Palestine in the *longue durée* of settler colonialism, colonialities of power, and the underside of modernity. *Theology After Gaza: A Global Anthology* is fruit of the urgency of the time. Inspired by Palestinian liberation theologies, it articulates some of the “death of God,” and the moral and ethical outrage familiar to those versed in Western Christianity and theology. It also explores Gaza as an exteriority—an exteriority to Western Christianity and theology, to the international system, and as a counter witness to Zionism. This anthology is the first-of-its-kind, timely, and relevant contribution that tackles a relevant issue of global importance with well-known authors and prolific writers, including Jewish and Muslim scholars.

the palestine laboratory pdf: *The Palestine Strategic Report 2018-2019* Prof. Dr. Mohsen Mohammad Saleh, 2021-04-19 This annual referential report, has become an essential classic in the academic realm of Palestinian Studies. It includes the latest and most recent statistical and analytic data on the various developments related to the Palestinian issue. ** Al-Zaytouna Centre is pleased to present to its readers the Palestine Strategic Report (PSR) 2018-2019, the 11th PSR to be published. With an academic methodology and comprehensive, and objective approach, the report comprehensively details developments concerning the Palestine issue and provides the latest information and data available at the end of 2019, along with analyses and forecasts running into 2020-2021. This report is the result of collaborative work between 14 experts and researchers. In

eight chapters, it addresses the internal Palestinian scene; Palestinian demographic and economic indicators; the situation in Jerusalem and the holy sites; the specifics of Israeli aggression, Palestinian resistance and the peace process; the complexities of Israeli-Palestinian dynamics, including the internal situation in Israel; and Palestine's Arab, Islamic and international relations. The PSR now occupies a prominent position as an indispensable reference document, integral to Palestine studies and research. Al-Zaytouna Centre hopes the PSR will continue to make valuable contributions in this field.

the palestine laboratory pdf: Suppressing Dissent Zaha Hassan, H. A. Hellyer, 2024-12-12 Civic space worldwide is shrinking – nowhere is this plainer than in Palestine-Israel Suppressing Dissent brings together leading experts of shrinking civic space and transnational repression concerning Palestine-Israel to show how failing to address the phenomenon has impacts in the United States, the Middle East and beyond.

the palestine laboratory pdf: AI, Sacred Violence, and War—The Case of Gaza Chris Hables Gray, 2025-01-31 This open access book is about how Israel is using Algorithmic Intelligence (AI) and other computer technology in military operations in the Gaza Strip to achieve goals based on ancient religious entitlements. Changes in Israel Defense Force (IDF) ethical codes and innovation policies have not led to victory, but have resulted in a wide range of War Crimes and Crimes Against Humanity in a strategy focused on The Torture of Gaza, which includes ethnic cleansing and is approaching genocide. It covers the history of using AI in war, and current U.S. and Israeli military AI technologies such as Maven, Iron Dome, Pegasus, the Alchemist, Gospel, Lavender, and Where's Daddy, all tested and perfected in the Palestinian Laboratory and marketed as such. This book also places the current data-driven and AI-directed assault on Palestine in the context of Postmodern War, which precludes military victories and enshrines the profits and power of the U.S.-Israeli military-industrial complex in a system of perpetual war and militarized technological innovation. Through an analysis of Israeli military policies, AI, sacred texts, and the basic tenets of postmodern war, the book ultimately reveals the limits of the IDF's embrace of illusions about new technologies producing actual victory. War today is about winning hearts and minds, not body counts. As fundamentalist politics achieve more and more power around the world in the context of new information technologies, there is growing danger to the future of all of us.

the palestine laboratory pdf: The Politics and Power of Tourism in Palestine Rami K. Isaac, C. Michael Hall, Freya Higgins-Desbiolles, 2015-12-14 Tourism in Palestine has been receiving an increasingly important profile given its economic and religious importance and the significant role it plays in Israeli-Palestinian relations, representation of Palestinian statehood and identity, and wider Middle Eastern politics. Nevertheless, Palestine, like much of the Middle East as a whole, remains extremely underrepresented in tourism literature. This title aims to fill this void by being the first book dedicated to exploring the significance of tourism in relationship to Palestine. The book examines the role of tourism in Palestine at three main levels. First, it provides an overview of destination management and marketing issues for the tourism industry in Palestine and addresses not only the visitor markets and the economic significance of tourism but also the realities of the difficulties of destination management, marketing and promotion of the Palestinian state. Second, it provides a series chapters and case studies that interrogate not only the various forms of tourism in Palestine but also its economic, social, environmental and spiritual importance. This section also conveys a dimension to tourism in Palestine that is not usually appreciated in the Western mainstream media. The third section indicates the way in which tourism in Palestine highlights broader questions and debates in tourism studies and the way in which travel in the region is framed in wider discourses. A significant dimension of the book is the attention it gives to the different voices of stakeholders in Palestinian tourism at varying levels of scale. This timely volume will offer the reader significant insight into the challenges and issues of tourism in this area now and in the future. It will benefit those interested in tourism, Middle East studies, politics, economics, development studies and geography.

the palestine laboratory pdf: Chasing Shadows Ronald J. Deibert, 2025-02-04 In this real-life

espionage thriller, cyber security expert Ronald Deibert uncovers the unseemly marketplace for high-tech surveillance, professional disinformation, and computerized malfeasance and reveals how his team of digital sleuths at the Citizen Lab have lifted the lid on dozens of spy cases targeting innocent citizens around the world. He recounts how the Lab exposed the world's pre-eminent cyber-mercenary firm, Israel-based NSO Group-the creators of the phone-hacking marvel Pegasus-in a series of human rights abuses, from domestic spying scandals in Spain, Poland, Hungary, and Greece to its implication in the murder of Washington Post journalist Jamal Khashoggi in 2018. Today, NSO Group, once valued at over a billion dollars, faces plummeting worth and an irretrievably tarnished reputation. *Chasing Shadows* provides a front-row seat to a dark underworld of digital espionage, sabotage, and subversion where autocrats and dictators peer into their targets' lives with the mere press of a button, spreading their tentacles of authoritarianism through a digital ecosystem that is insecure, invasive by design, poorly regulated, and prone to abuse. The brave activists, opposition figures, and journalists who dare to advocate for basic political rights and freedoms are hounded, arrested, tortured, and sometimes murdered.--

the palestine laboratory pdf: *Feeding the Machine* Callum Cant, James Muldoon, Mark Graham, 2024-08-06 For readers of Naomi Klein and Nicole Perlroth, a myth-dissolving exposé of how artificial intelligence exploits human labor, and a resounding argument for a more equitable digital future. Silicon Valley has sold us the illusion that artificial intelligence is a frictionless technology that will bring wealth and prosperity to humanity. But hidden beneath this smooth surface lies the grim reality of a precarious global workforce of millions laboring under often appalling conditions to make A.I. possible. This book presents an urgent, riveting investigation of the intricate network that maintains this exploitative system, revealing the untold truth of A.I. Based on hundreds of interviews and thousands of hours of fieldwork over more than a decade, *Feeding the Machine* describes the lives of the workers deliberately concealed from view, and the power structures that determine their future. It gives voice to the people whom A.I. exploits, from accomplished writers and artists to the armies of data annotators, content moderators and warehouse workers, revealing how their dangerous, low-paid labor is connected to longer histories of gendered, racialized, and colonial exploitation. A.I. is an extraction machine that feeds off humanity's collective effort and intelligence, churning through ever-larger datasets to power its algorithms. This book is a call to arms that details what we need to do to fight for a more just digital future.

the palestine laboratory pdf: *The State of Social Progress of Islamic Societies* Habib Tiliouine, Richard J. Estes, 2016-04-08 This handbook addresses the historical background of the Islamic world and reviews its basic past intellectual achievements. It studies social progress of these regions and sub-regions in comparison with other parts of the world. It uses large data sets and well established statistically weighted Indexes in order to assess the nature and pace of the multiple facets of social change in member states of the Organization of Islamic Cooperation (OIC). The handbook extensively discusses the main challenges confronting the Islamic nations in the social, economic, political, and ideological fields. Though it is recognizable that social change in the Islamic World is generally positive, it remains highly variable in pace and there is room to speed it up to the benefit of millions of deprived Muslim people. Hence, the book studies the different propositions and programs of action, such as the United Nations' Millennium Development Campaign and the OIC's Ten-Year Programme of Action to present an integrated and comprehensive agenda of action to help improve the situation in the Islamic World.

the palestine laboratory pdf: *Surveillance and Control in Israel/Palestine* Elia Zureik, David Lyon, Yasmeen Abu-Laban, 2010-12-13 Surveillance is always a means to an end, whether that end is influence, management or entitlement. This book examines the several layers of surveillance that control the Palestinian population in Israel and the Occupied Territories, showing how they operate, how well they work, how they are augmented, and how in the end their chief purpose is population control. Showing how what might be regarded as exceptional elsewhere is here regarded as the norm, the book looks not only at the political economy of surveillance and its technological

and military dimensions, but also at the ordinary ways that Palestinians in Israel and the occupied territories are affected in their everyday lives. Written in a clear and accessible style by experts in the field, this book will have large appeal for academic faculty as well as graduate and senior undergraduate students in sociology, political science, international relations, surveillance studies and Middle East studies.

the palestine laboratory pdf: *Palestina sitiada* Rodrigo Karmy Bolton, 2025-05-19 Karmy, filósofo de vocación interdisciplinaria, asume aquí el reto de recoger los hechos y contextualizarlos. Palestina no es solo una tierra devastada por la colonización sionista, sino un paradigma desde el cual podemos contemplar el presente.

the palestine laboratory pdf: Theorising Future Conflict Mark Lacy, 2023-12-15 This book explores the changing tactics, technologies and terrains of twenty-first century war. It argues that the world in 2049 is unlikely to look like the climate change/artificial intelligence (AI) dystopia depicted in *Blade Runner 2049*, but nor will it be a world where conflict and war has been transformed by a 'civilising process' that eradicates violence and conflict from the human condition. 2049 is also the year that the US Department of Defense has suggested China will become a world-shaping military power. All states will be engaged in 'arms races' across a variety of new tools and technologies—from drones, robotics, AI and quantum computing—that will transform politics, economy, society and war. Drawing on thinkers such as Zygmunt Bauman and Paul Virilio, the book suggests that future war will be shaped by three broad tendencies that include a broad range of tactics, technologies and trends; the impure, the granular and the machinic. Through discussions of cybersecurity, urban war, robotics, AI, climate change, science fiction and new strategic concepts, it examines how these tendencies might evolve in the different geopolitical futures and types of war ahead of us. The book provides a thought-provoking and distinctive framework through which to think about the changing character of war. It concludes that for all the novel and dangerous challenges ahead, the futuristic possibilities of warfare will likely continue to be shaped by problems familiar to students of international relations and the history of war—albeit problems that will play out in geopolitical and technological contexts that we have never encountered before. This book will be of much interest to students of critical war studies, security studies, science and technology studies, and International Relations in general.

the palestine laboratory pdf: A Lab for All Seasons Sharon E. Kingsland, 2023-01-01 The first book to chronicle how innovation in laboratory designs for botanical research energized the emergence of physiological plant ecology as a vibrant subdiscipline. Laboratory innovation since the mid-twentieth century has powered advances in the study of plant adaptation, evolution, and ecosystem function. The phytotron, an integrated complex of controlled-environment greenhouse and laboratory spaces, was invented by Frits W. Went at the California Institute of Technology in the 1950s, setting off a worldwide laboratory movement, and transforming the plant sciences. Sharon Kingsland explores this revolution through a comparative study of work in the United States, France, Australia, Israel, the USSR, and Hungary—in the latter two, offering new interpretations of the response to Lysenkoism in Communist states. These advances in botanical research energized physiological plant ecology. Case studies explore the development of phytotron spin-offs such as mobile laboratories, rhizotrons, and ecotrons. Scientific problems include the significance of plant emissions of volatile organic compounds, symbiosis between plants and soil fungi, and the discovery of new pathways for photosynthesis as an adaptation to hot, dry climates. The advancement of knowledge through synthesis is a running theme: linking disciplines, combining laboratory and field research, and moving across ecological scales from leaf to ecosystem. The book also charts the history of modern scientific responses to the emerging crisis of food insecurity in the era of global warming.

the palestine laboratory pdf: Elastic Empire Lisa Bhungalia, 2023-12-12 The United States integrated counterterrorism mandates into its aid flows in the West Bank and Gaza Strip during the early years of the global war on terror. Some two decades later, this securitized model of aid has become normalized across donor intervention in Palestine. *Elastic Empire* traces how foreign aid, on

which much of the Palestinian population is dependent, has multiplied the sites and means through which Palestinian life is regulated, surveilled, and policed—this book tells the story of how aid has also become war. Drawing on extensive research conducted in Palestine, *Elastic Empire* offers a novel accounting of the US security state. The US war chronicled here is not one of tanks, grenades, and guns, but a quieter one waged through the interlacing of aid and law. It emerges in the infrastructures of daily life—in a greenhouse and library, in the collection of personal information and mapping of land plots, in the halls of municipal councils and in local elections—and indelibly transfigures lives. Situated in a landscape where the lines between humanitarianism and the global war on terror are increasingly blurred, *Elastic Empire* reveals the shape-shifting nature of contemporary imperial formations, their realignments and reformulations, their haunted sites, and their obscured but intimate forms.

the palestine laboratory pdf: Energy Saving at Cities Francisco Manzano Agugliaro, Alberto Jesús Perea Moreno, 2021-01-20 Climate change is increasing due to the anthropogenic emission of greenhouse gases. The majority of these are due to the production and consumption of energy. According to the latest estimates, global energy demand could triple by 2050, and by then, 70% of the world’s population will live in cities. The challenge for future cities is the implementation of a mechanism that minimizes the need for injection of new energy resources in them, so that a high level of self-sufficiency can be achieved through the concept of circular economy, thus partially mitigating the impacts of climate change. Using solar energy today is considered to be one of the best solutions that can be installed in buildings to help with this issue. This book addresses several relevant aspects related to energy saving at cities, including a deep survey of research topics and scientific collaborations in energy saving. The main research topics carried out are related to sustainability, solar energy, the use of rooftops for energy generation, energy conversion from urban biomass or residues, wind energy, and public and private urban energy saving.

River to the Sea: Palestine and Israel in the Shadow of 'Peace' provides original analyses of how different coping strategies were developed as well as new forms of political expression, interaction, and mobilization since the 1993 peace deal between the Palestine Liberation Organization and Israel. Its premise is that an historical realism is essential in order to develop a route out of the post-Oslo impasse that extended and solidified the power imbalance under the auspices of 'peace'. The book includes chapters from experts across the disciplines of anthropology, economics, law, political science and sociology to map out and critically assess the impacts and responses to this 'peace' in different geographical and political settings. These innovative analyses also investigate processes that might enable a future to be built based on greater equality and an end to the oppression and violence that currently exists between the Jordan River and the Mediterranean Sea (and beyond).
