In this volume, the sixth from the Africa Society of Evangelical Theology, contributors explore the question of Christ's identity - and its implications for the global church - from a distinctly African perspective. This results in the insufficient implementation of Universal Health Coverage in many countries and regions. Low and middle-income countries (LMICs) but also underserved regions and population groups in industrial countries achieve intensified focus since several years regarding knowledge exchange and support to overcome these inequalities. Research in global cancer care gained extended attention but still has limitations regarding comparability, methodology, and data quality. Therefore, the Research Topic "Universal Health Coverage and Global Health in Oncology" will focus on research approaches and results of cancer care implementation and its barriers that can be transferred to other countries.

who am i pdf: A Better Story Glynn Harrison, 2017-01-19 The architects of the sexual revolution won over the popular imagination because they knew the power of story. They drew together radical new ideologies, often complex and hard to grasp, and melded them into the simpler structure of narrative. Crucially, they cast narratives that appealed to the moral instincts of ordinary, decent people. This moral vision overwhelmed the church and silenced its faltering apologists. The author argues that if Christians still believe they have good news in the sphere of sexual ethics, then two big tasks lie ahead. Our first priority is to work out what has gone so badly wrong, both in our understanding and application of what the Bible teaches and the way we have presented our case to the non-churched. And then we must offer a better story, one that fires the imagination with such force that people will say, 'I want that to be true.' This book offers a confident, biblically rooted moral vision which needs to be shared with prayer and courage.
