healing the mother wound pdf: Discovering the Inner Mother Bethany Webster, 2021-01-05 Sure to become a classic on female empowerment, a groundbreaking exploration of the personal, cultural, and global implications of intergenerational trauma created by patriarchy, how it is passed down from mothers to daughters, and how we can break this destructive cycle. Why do women keep themselves small and quiet? Why do they hold back professionally and personally? What fuels the uncertainty and lack of confidence so many women often feel? In this paradigm-shifting book, leading feminist thinker Bethany Webster identifies the source of women's trauma. She calls it the Mother Wound—the systemic disenfranchisement of women by the patriarchy—and reveals how this cycle is perpetuated by wounded mothers who unconsciously pass on damaging beliefs and behaviors to their daughters. In her workshops, online courses, and talks, Webster has helped countless women re-examine their lives and their relationships with their mothers, giving them the vocabulary to voice their pain, and encouraging them to share their experiences. In this manifesto and self-help guide, she offers practical tools for identifying the manifestations of the Mother Wound in our daily life and strategies we can use to heal ourselves and prevent our daughters from enduring the same pain. In addition, she offers step-by-step advice on how to reconnect with our inner child, grieve the mother we didn't have, stop people-pleasing, and, ultimately, transform our heartache and anger into healing and self-love. Revealing how women are affected by the Mother Wound, even if they don't personally identify as survivors, *Discovering the Inner Mother* revolutionizes how we view mother-daughter relationships and gives us the inspiration and guidance we need to improve our lives and ultimately create a more equitable society for all.

healing the mother wound pdf: Love Is Fierce Kerri Hummingbird Sami, 2021-01-20 The current state of our world demonstrates clearly that we have all been touched by the Mother Wound. For thousands of years, mothers have been disempowered, shamed, belittled, and abused. As a result, many mothers have become victims and been unloving, neglectful, and competitive with their children. A woman with the Mother Wound cannot help but pass it on to her children through her womb. Being infected by the Mother Wounds shows up as lack of confidence, self-doubt, stagnation toward desires, repressed sexuality, lack of focus, difficulty with intimacy, financial struggle, mean shaming self-talk, and a hard time asking for what you need. To heal the Mother Wound, we need to courageously break the sacred vow that each of us takes upon entering the human realms: the vow

not to speak of the Mother Wound. This sacred vow causes self-harm and internal turmoil because we are not able to express the truth of what we have received through our mothers. When we cannot express our own truth, we become self-sabotaging. If you are reading this, YOU are the one chosen by your ancestry to break the pattern. As part of a sacred circle of women restoring connection to the Divine Mother with support of White Buffalo Calf Woman, you will courageously see the truth, heal the Mother Wound within you, and make a new sacred vow that honors your mother by first honoring yourself. What the world needs now is the fierce love and courageous truth of healed women and whole earth mamas. Together, White Buffalo Women will mend the Sacred Hoop and restore balance between humanity and Mother Earth. Join us.

healing the mother wound pdf: Healing after Parent Loss in Childhood and Adolescence Phyllis Cohen, K. Mark Sossin, Richard Ruth, 2014-01-31 In *Healing after Parent Loss in Childhood and Adolescence: Therapeutic Interventions and Theoretical Considerations*, experts explore the varied, often complex, and always tragic circumstances under which young people face losing a parent. Profound grief and feelings of powerlessness may accompany loss of a parent at any age, but distinctly so when such loss is experienced during formative years. Whenever these individuals seek help, therapists must be psychically prepared to enter into arenas of trauma, bereavement, and mourning. The children, teens, and adults presented are diverse in age, culture/ethnicity, and socioeconomic status. A diverse group of contributors showcase a wide range of effective approaches—from traditionally structured short- and long-term psychotherapies and psychoanalysis, to psycho-educational, supportive, and preventive interventions. The writers in this volume do not shy away from tough matters such as urban violence, AIDS, and war; they address concerns practicing clinicians face, such as when to work with children, adolescents, and adults individually, and when and how to involve their surviving parents and families. Included in this book are issues related to the self-care and professional development needs of therapists who take on this difficult but essential work, including peer support and supervision. This volume is likely to spark important re-examinations across all fields of mental health practice. It will equip and empower clinicians of all kinds who undertake work with those who are grieving. *Healing after Parent Loss in Childhood and Adolescence* promises to be a vital and stimulating read for supervisors, teachers, and trainers of child, adolescent, and family clinicians.

healing the mother wound pdf: She Has Her Mother's Laugh Carl Zimmer, 2019-06-04 2019 PEN/E.O. Wilson Literary Science Writing Award Finalist Science book of the year—*The Guardian* One of *New York Times* 100 Notable Books for 2018 One of *Publishers Weekly's* Top Ten Books of 2018 One of *Kirkus's* Best Books of 2018 One of *Mental Floss's* Best Books of 2018 One of *Science Friday's* Best Science Books of 2018 “Extraordinary”—*New York Times* Book Review Magisterial—*The Atlantic* Engrossing—*Wired* Leading contender as the most outstanding nonfiction work of the year—*Minneapolis Star-Tribune* Celebrated *New York Times* columnist and science writer Carl Zimmer presents a profoundly original perspective on what we pass along from generation to generation. Charles Darwin played a crucial part in turning heredity into a scientific question, and yet he failed spectacularly to answer it. The birth of genetics in the early 1900s seemed to do precisely that. Gradually, people translated their old notions about heredity into a

language of genes. As the technology for studying genes became cheaper, millions of people ordered genetic tests to link themselves to missing parents, to distant ancestors, to ethnic identities... But, Zimmer writes, "Each of us carries an amalgam of fragments of DNA, stitched together from some of our many ancestors. Each piece has its own ancestry, traveling a different path back through human history. A particular fragment may sometimes be cause for worry, but most of our DNA influences who we are—our appearance, our height, our penchants—in inconceivably subtle ways." Heredity isn't just about genes that pass from parent to child. Heredity continues within our own bodies, as a single cell gives rise to trillions of cells that make up our bodies. We say we inherit genes from our ancestors—using a word that once referred to kingdoms and estates—but we inherit other things that matter as much or more to our lives, from microbes to technologies we use to make life more comfortable. We need a new definition of what heredity is and, through Carl Zimmer's lucid exposition and storytelling, this resounding tour de force delivers it. Weaving historical and current scientific research, his own experience with his two daughters, and the kind of original reporting expected of one of the world's best science journalists, Zimmer ultimately unpacks urgent bioethical quandaries arising from new biomedical technologies, but also long-standing presumptions about who we really are and what we can pass on to future generations.
