indian depository receipts pdf: Infrastructure Financing in India Kumar V. Pratap, Manshi Gupta, 2023-11-10 Governments the world over want to spend more on infrastructure (the benchmark for developing countries is 7-8% of GDP per annum) to lay the foundation for sustained and inclusive growth. India is no exception. It realizes that more needs to be spent on infrastructure for the country to regain its position as the fastest growing large economy in the world. While India spent about 7.2% of its GDP on infrastructure during the Eleventh Plan period (2008-12), this number has recently come down to approximately 5%. The backdrop of the book is the ambitious National Infrastructure Plan (NIP); the Task Force report on the NIP was finalized in April 2020. Since infrastructure investment is crucial to faster and inclusive growth, it is timely that the NIP is actioned now, given that the Indian economy contracted to 7.3% in the financial year 2020-21. This book discusses various aspects of infrastructure financing in detail, with a major section devoted to green financing of infrastructure.

indian depository receipts pdf: The Political Economy of Covid-19 Jonathan Michie, Maura Sheehan, 2022-08-18 This comprehensive book brings together research published during 2021 analysing the impact of the Covid-19 pandemic on the economy – on output and employment, on inequality, and on public policy responses. The Covid-19 pandemic has been the greatest public health crisis for a century – since the ‘Spanish Flu’ pandemic of 1919. The economic impact has been equally seismic. While it is too early to measure the full economic cost – since much of this will continue to accumulate for some time to come – it will certainly be one of the greatest global economic shocks of the past century. Some chapters in this edited volume report on specific countries, while some take a comparative look between countries, and others analyse the impact upon the global economy. Even before the Covid-19 pandemic, there had been calls for a ‘great reset’ in face of the climate crisis, the increased income and wealth inequality, and the need to avoid further global financial crisis. With the devastating Covid-19 pandemic – a harbinger for further such pandemics – there is an even greater need for a reset, and for the reset to be that much greater. The chapters in this book were originally published as special issues in the journal International Review of Applied Economics.
