love at the time of cholera pdf: The Persistence of Violence Toby Miller, 2020-07-17 Colombia's headline story, about the peace process with guerrilla and its attendant controversies, does not consider the fundamental contradiction of a nation that spans generosity and violence, warmth and hatred—products of its particular pattern of invasion, dispossession, and enslavement. The Persistence of Violence fills that gap in understanding. Colombia is a place that is two countries in one—the ideal and the real—summed up in the idiomatic expression, not unique to Colombia, but particularly popular there, *Hecha la ley, hecha la trampa* (When you pass a law, you create a loophole). Less cynically, and more poetically, the Nobel Laureate Gabriel García Márquez deemed Colombians capable of both the most noble acts and the most abject ones, in a world where it seems anyone might do anything, from the beautiful to the horrendous. The Persistence of Violence draws on those contradictions and paradoxes to look at how violence—and resistance to it—characterize Colombian popular culture, from football to soap opera to journalism to tourism to the environment.

love at the time of cholera pdf: The Vital Dead Alison Bell, Alison, Kay Bell, 2022 This book builds on recent anthropological work to explore the social and cultural dynamics of cemetery practice and its transformation over generations in Virginia's Shenandoah Valley. Anthropologist Alison Bell finds that people are using material culture—images and epitaphs on grave markers, as well as objects they leave on graves—to assert and maintain relationships and fight against alienation. She draws on fieldwork, interviews, archival sources, and disciplinary insights to show how cemeteries both reveal and participate in the grassroots cultural work of crafting social connections, assessing the transcendental durability of the deceased person, and asserting particular cultural values. The book's chapters range across cemetery types, focusing on African American burials, grave sites of institutionalized individuals, and modern community memorials--

love at the time of cholera pdf: The Vortex Frank Uekötter, 2024-04-18 Environmental challenges are defining the twenty-first century. To fully understand ongoing debates about our current crises—climate change, loss of biological diversity, pollution, extinction, resource woes—means revisiting their origins, in all their complexity. With this ambitious, highly original contribution to the environmental history of global modernity, Frank Uekötter considers the many ways humans have had an impact on their physical environment throughout history. Ours is not a one-way trajectory to sudden collapse, he argues, but rather death by a thousand cuts. The many

paths we've forged to arrive in our current predicament, from agriculture to industry to infrastructure, must be considered collectively if we are to stay afloat in what Uekötter describes as a vortex: a powerful metaphor for the flow of history, capturing the momentum and the many crosscurrents that swept people and environments along. His book invites us to look at environmental challenges from multiple perspectives, including all the twists and turns that have helped to create the mess we find ourselves in. Uekötter has written a world history for an age where things are falling apart: where we know what lies ahead and are equipped with the right tools—technological and otherwise—and plenty of experience to deal with environmental challenges, but somehow fail to get our affairs in order.

The essays cover a wide range of topics such as an individual's right to privacy in a digital age, freedom to practise one's religion and the right to redress, and make a compelling and detailed argument for the on-going importance and significance of the Declaration and human rights in our rapidly changing world.

love at the time of cholera pdf: Love and Liberation Lauren Carruth, 2021-10-15 Lauren Carruth's *Love and Liberation* tells a new kind of humanitarian story. The protagonists are not volunteers from afar but rather Somali locals caring for each other: nurses, aid workers, policymakers, drivers, community health workers, and bureaucrats. The contributions of locals are often taken for granted, and the competencies, aspirations, and effectiveness of local staffers frequently remain muted or absent from the planning and evaluation of humanitarian interventions structured by outsiders. Relief work is traditionally imagined as politically neutral and impartial, and interventions are planned as temporary, extraordinary, and distant. Carruth provides an alternative vision of what humanitarian response means in practice—not driven by International Humanitarian Law, the missions of Western relief organizations, or trends in the aid industry or academia but instead by what Somalis call *samafal*. *Samafal* is structured by the cultivation of lasting relationships of care, interdependence, kinship, and ethnic solidarity. *Samafal* is also explicitly political and potentially emancipatory: humanitarian responses present opportunities for Somalis to begin to redress histories of colonial partitions and to make the most out of their political and economic marginalization. By centering *Love and Liberation* around Somalis' understanding and enactments of *samafal*, Carruth offers a new perspective on politics and intervention in Africa.

love at the time of cholera pdf: Globalization and Urbanization James H. Spencer, 2014-06-26

During the past decade, the world reached the point of becoming more urban than not, as the majority of people on the planet now live not in small towns or villages but in provincial, national, and global cities. Scholars have long been fascinated by so-called global cities, world cities, and the urban engines of the global economy. James H. Spencer argues, however, that such an emphasis misses the central fact that urbanization goes well beyond the usual suspects of New York, Tokyo, London, and Shanghai. The author charts urbanization across the Global South and North, resulting in what he describes as a planetary global urban ecosystem. This concept that challenges us to realize that in daily life, their similar physical and social ecosystems that make cities more understandable to each other than to their own rural hinterlands. Spencer's vivid case studies of Addis Ababa, Ho Chi Minh City, Honolulu, and New York draw out the commonalities of our intertwined built and social environments and how they express a shared humanity across continents and cultures.

love at the time of cholera pdf: *Math in the Time of Corona* Alice Wonders, 2021-11-08 The title of this book, *Math in the Time of Corona*, has been drawn from the highly acclaimed novel by Gabriel García Márquez, *Love in the Time of Cholera*. The volume editor, Alice Wonders, holds a fictitious name that represents the mathematics publishing group at Springer Nature. Undeterred by disasters, so many mathematical and scientific discoveries have been made during times of duress or confinement. Unlike most any other subject, mathematics may be researched from anywhere. Covid-19, like Cholera, implementation of vaccinations have been uneven throughout the globe since the beginning of 2021. However, there has been a renewed hope for a return to normalcy though the timing will no doubt vary worldwide. Essays in this volume vary in topic and are written by members of the greater mathematics community, hence the use of "Math" in the book title. They recount or describe significant or noteworthy discoveries, musings, award winnings, eureka moments, challenges, solutions, inspirations, etc. that have resulted from, or have occurred during, an unprecedented global pandemic. Several of the authors have been involved in starting new research and devising new methodologies related to society's response to the outbreak and its ability to self-organize during a dramatic and complex situation. Some contributions describe how mathematical models and the management of big data have proved to be fundamental tools for the interpretation of epidemic activity and development of coping mechanisms.
