Yet there is little training on how to do so. Various advising strategies exist, each of which has its own proponents. To serve increasingly complex higher education institutions around the world and their diverse student cohorts, academic advisors must understand multiple advising approaches and adroitly adapt them to their own student populations. Academic Advising Approaches outlines a wide variety of proven advising practices and strategies that help students master the necessary skills to achieve their academic and career goals. This book embeds theoretical bases within practical explanations and examples advisors can use in answering fundamental questions such as: What will make me a more effective advisor? What can I do to enhance student success? What conversations do I need to initiate with my colleagues to improve my unit, campus, and profession? Linking theory with practice, Academic Advising Approaches provides an accessible reference useful to all who serve in an advising role. Based upon accepted theories within the social sciences and humanities, the approaches covered include those incorporating developmental, learning-centered, appreciative, proactive, strengths-based, Socratic, and hermeneutic advising as well as those featuring advising as teaching, motivational interviewing, self-authorship, and advising as coaching.
