pdf curious incident of the dog in the nighttime: *Crime Fiction Migration* Christiana Gregoriou, 2017-07-27 Crime narratives form a large and central part of the modern cultural landscape. This book explores the cognitive stylistic processing of prose and audiovisual fictional crime 'texts'. It also examines instances where such narratives find themselves, through popular demand, 'migrating' - meaning that they cross languages, media formats and/or cultures. In doing so, *Crime Fiction Migration* proposes a move from a monomodal to a multimodal approach to the study of crime fiction. Examining original crime fiction works alongside their translations, adaptations and remakings proves instrumental in understanding how various semiotic modes interact with one another. The book analyses works such as *We Need to Talk About Kevin*, *The Killing* trilogy and the reimaginings of plays such as *Shear Madness* and films such as *Funny Games*. Crime fiction is consistently popular and 'on the move' - witness the spate of detective series exported out of Scandinavia, or the ever popular exporting of these shows from the USA. This multimodal and semiotically-aware analysis of global crime narratives expands the discipline and is key reading for students of linguistics, criminology, literature and film.

Featuring a foreword by renowned neuroscientist Joseph E. LeDoux, *The Elusive Brain* is an illuminating, comprehensive survey of contemporary literature's engagement with neuroscience. This fascinating book explores how literature interacts with neuroscience to provide a better understanding of the brain's relationship to the self. Jason Tougaw surveys the work of contemporary writers—including Oliver Sacks, Temple Grandin, Richard Powers, Siri Hustvedt, and Tito Rajarshi Mukhopadhyay—analyzing the way they experiment with literary forms to frame new views of the immaterial experiences that compose a self. He argues that their work offers a necessary counterbalance to a wider cultural neuromania that seeks out purely neural explanations for human behaviors as varied as reading, economics, empathy, and racism. Building on recent scholarship, Tougaw's evenhanded account will be an original contribution to the growing field of neuroscience and literature.

pdf curious incident of the dog in the nighttime: *The Disabled Child* Amanda Apgar, 2023-01-10
When children are born with disabilities or become disabled in childhood, parents often experience bewilderment: they find themselves unexpectedly in another world, without a roadmap, without community, and without narratives to make sense of their experiences. *The Disabled Child: Memoirs of a Normal Future* tracks the narratives that have emerged from the community of parent-memoirists who, since the 1980s, have written in resistance of their children's exclusion from culture. Though the disabilities represented in the genre are diverse, the memoirs share a number of remarkable similarities; they are generally written by white, heterosexual, middle or upper-middle class, able-bodied parents, and they depict narratives in which the disabled child overcomes barriers to a normal childhood and adulthood. Apgar demonstrates that in the process of telling these stories, which recuperate their children as productive members of society, parental memoirists write their children into dominant cultural narratives about gender, race, and class. By reinforcing and buying into these norms, Apgar argues, "special needs" parental memoirs reinforce ableism at the same time that they're writing against it.

It contains contributions from psychologists, performance scholars, therapists and healthcare professionals, who offer multiple perspectives on working through performance-based media. pdf curious incident of the dog in the nighttime: Fearlessly Different Mickey Rowe, 2022-03-15 ... powerfully renders what it's like to live life to the fullest. Publishers Weekly Starred Review My name is Mickey Rowe. I am an actor, a theatre director, a father, and a husband. I am also a man with autism. You think those things don't go together? Let me show you that they do. Growing up, Mickey Rowe was told that he couldn't enter the mainstream world. He was iced out by classmates and colleagues, infantilized by well-meaning theatre directors, barred from even earning a minimum wage. Why? Because he is autistic. Fearlessly Different: An Autistic Actor's Journey to Broadway's Biggest Stage is Mickey Rowe's story of growing up autistic and pushing beyond the restrictions of a special education classroom to shine on the stage. As an autistic and legally blind person, living in a society designed by and for non-disabled people, it was always made clear to Mickey the many things he was apparently incapable of doing. But Mickey did them all anyway—and he succeeded because of, not in spite of, his autism. He became the first autistic actor to play the lead role in the play The Curious Incident of the Dog in the Night-Time, landed the title role in the play Amadeus, co-created the theatre/philanthropy company Arts on the Waterfront, and founded the National Disability Theatre. Mickey faced untold obstacles along the way, but his story ends in triumph. Many people feel they are locked out of the world of autism—that it's impossible to even begin to understand. In Fearlessly Different, Mickey guides readers to that world while also helping those with autism to feel seen and understood. And he shows all people—autistic and non-autistic alike—that the things that make us different are often our biggest strengths.

pdf curious incident of the dog in the nighttime: Language, Autonomy and the New Learning Environments Douglas Allford, Norbert Pachler, 2007 The emergence of new learning environments, technological and institutional, implies a need for language understanding and autonomous learning. What do they mean? Why are they necessary? How do they interrelate? This book looks at these questions. The authors consider mother tongue and second/foreign language education in relation to 'language understanding', which includes formal knowledge and an ability to use language communicatively, and should cover the 'new' literacies. Autonomous language learning has been interpreted in various ways, and setting language understanding as a goal allows some of these (such as 'training' models) to be challenged and others endorsed. Some implications of the information society for education are considered. Learning increasingly takes place outside educational establishments, and the authors examine changes from face-to-face teacher-student interaction to mixed-mode and distance learning. The new environments create new possibilities, such as knowledge construction through computer-mediated interaction and learner autonomy in online networks, and these are explored. Throughout the book, the centrality of the teacher's role is affirmed, as educator and guide on autonomous second/foreign language programmes, and as a moderator of online discussions and a designer of online materials.

pdf curious incident of the dog in the nighttime: From Alice to Algernon Holly Blackford, 2024-01-12 During the late Victorian period, Charles Darwin's theories took the world by storm, and the impact of evolution on research into the developing human mind was impossible to overlook. Thereafter the study of children and childhood became a means to theorize, imagine, and apply the concept of evolution in a broad range of cultural productions. Beginning with the watershed Victorian era, *From Alice to Algernon: The Evolution of Child Consciousness in the Novel* examines the creative transformation these theories underwent as they filtered through the modern novel, especially those that examined the mind of the child. By examining the connection between authors and trends in child psychology, author Holly Blackford explains why many modern novels began to focus on child cognition as a site for intellectual and artistic exploration. In each chapter of this book, select novels of the late-nineteenth or twentieth century are paired with a specific moment or

movement from the history of developmental psychology. Novels such as Mark Twain's Huckleberry Finn and Henry James's What Maisie Knew, or Radclyffe Hall's less-canonical The Well of Loneliness and even Mark Haddon's The Curious Incident of the Dog in the Night-Time, showcase major questions about human epistemology through their child characters. From Lewis Carroll's Alice and her looking-glass to Richard Wright's Bigger Thomas and the murder of Mary Dalton to the chaotic Neverland—symbolizing the unmappable child's brain—a literary tradition of child consciousness has emerged as an experimental site for the unstable concepts of evolution, civilization, and development. By situating literature about children within concurrent psychological discourses, Blackford demonstrates how the modern novel contributed to the world's understanding of the boundless wonders and discernible limits of child consciousness.

pdf curious incident of the dog in the nighttime: A Companion to Wittgenstein on Education Michael A. Peters, Jeff Stickney, 2017-05-03 This book, bringing together contributions by forty-five authors from fourteen countries, represents mostly new material from both emerging and seasoned scholars in the field of philosophy of education. Topics range widely both within and across the four parts of the book: Wittgenstein's biography and style as an educator and philosopher, illustrating the pedagogical dimensions of his early and late philosophy; Wittgenstein's thought and methods in relation to other philosophers such as Cavell, Dewey, Foucault, Hegel and the Buddha; contrasting investigations of training in relation to initiation into forms of life, emotions, mathematics and the arts (dance, poetry, film, and drama), including questions from theory of mind (nativism vs. initiation into social practices), neuroscience, primate studies, constructivism and relativity; and the role of Wittgenstein's philosophy in religious studies and moral philosophy, as well as their profound impact on his own life. This collection explores Wittgenstein not so much as a philosopher who provides a method for teaching or analyzing educational concepts but rather as one who approaches philosophical questions from a pedagogical point of view. Wittgenstein's philosophy is essentially pedagogical: he provides pictures, drawings, analogies, similes, jokes, equations, dialogues with himself, questions and wrong answers, experiments and so on, as a means of shifting our thinking, or of helping us escape the pictures that hold us captive.

Are atheists smarter or more rational than religious believers? Do our genes determine who we are and what we believe? Can our very creaturely cognitive equipment help us discover truth and meaning in life? Are atheists any different from Mother Teresa? Clark's surprising answers both defend the rationality of religious belief and contribute to the study of cognitive science. God and the Brain explores complicated questions about the nature of belief and the human mind. Scientifically minded, philosophically astute, and reader-friendly, God and the Brain provides an accessible overview of some new cognitive scientific approaches to the study of religion and evaluates their implications for both theistic and atheistic belief.
