Key historical points include:

- The British Mandate Period: Haifa grew as an industrial hub with diverse communities.

For many Palestinians, returning to Haifa is not just a physical act but a deeply emotional and cultural one.

It embodies:

- The longing to reconnect with lost homes and communities.
- The desire to reclaim cultural heritage.
- The hope for justice and acknowledgment of historical grievances.

returning to haifa pdf: Routledge Handbook on Middle East Cities Haim Yacobi, Mansour Nasasra, 2019-07-01 Presenting the current debate about cities in the Middle East from Sana'a, Beirut and Jerusalem to Cairo, Marrakesh and Gaza, the book explores urban planning and policy, migration, gender and identity as well as politics and economics of urban settings in the region. This handbook moves beyond essentialist and reductive analyses of identity, urban politics, planning, and development in cities in the Middle East, and instead offers critical engagement with both historical and contemporary urban processes in the region. Approaching Cities as multi-dimensional sites, products of political processes, knowledge production and exchange, and local and global visions as well as spatial artefacts. Importantly, in the different case studies and theoretical approaches, there is no attempt to idealise urban politics, planning, and everyday life in the Middle East -- which (as with many other cities elsewhere) are also situations of contestation and violence -- but rather to highlight how cities in the region, and especially those which are understudied, revolve around issues of housing, infrastructure, participation and identity, amongst other concerns. Analysing a variety of cities in the Middle East, the book is a significant contribution to Middle East Studies. It is an essential resource for students and academics interested in Geography, Regional and Urban Studies of the Middle East.

returning to haifa pdf: *Home, History and Possession in Israel-Palestine* Tovi Fenster, 2024-09-05 Taking a micro-geographical approach to Israeli-Palestinian relations, this book analyses the history of space and place in West Jerusalem and Jaffa in the context of specific addresses. Based on the unique and innovative 'archaeology of addresses' methodology, the book provides an in-depth analysis of 11 specific sites. This 'micro' perspective - paying particular attention to the history and past ownership of an individual property - allows the author to draw new insights into the process of 'population exchange' that took place in 1948 when Jewish people began to populate Palestinian deserted homes after the Nakba. By looking at archival planning documents, the histories of addresses as 'contact zones' between previous and current owners are revealed. Moreover, the research on each address highlights new theoretical understandings, encompassing: the micro-politics of the contact zone; mediated agonism; ruinations and beginnings; creative destruction in urban planning; the right to the city and the right to return; the violence of property; and fragmented settler colonialism. The book concludes by proposing practical applications of the research in teaching and planning practice. The book will prove important reading for students and researchers interested in urban planning, Middle Eastern geography, and the history of the Israeli-Palestinian conflict.

returning to haifa pdf: *Traces of Racial Exception* Ronit Lentin, 2018-08-09 Positioning race front and centre, this book theorizes that political violence, in the form of a socio-political process that differentiates between human and less-than-human populations, is used by the state of Israel in racializing and ruling the citizens of occupied Palestine. Lentin argues that Israel's rule over Palestine is an example of Agamben's state of exception, Goldberg's racial state and Wolfe's settler colony; the Israeli racial settler colony employs its laws to rule besieged Palestine, while excluding itself and its Jewish citizen-colonists from legal instruments and governmental technologies. Governing through emergency legislation and through practices of exception, emergency, necessity and security, Israel positions itself outside domestic and international law. Deconstructing Agamben's Eurocentric theoretical position Lentin shows that it occludes colonialism, settler colonialism and anti-colonialism and fails to specifically foreground race; instead she combines the

work of Wolfe, who proposes race as a trace of settler colonialism, and Weheliye, who argues that Agamben's western-centric understanding of exception fail to speak from explicitly racialized and gendered standpoints. Employing existing media, activist, and academic accounts of racialization this book deliberately breaks from white, Western theorizations of biopolitics, exception, and bare life, and instead foregrounds race and gender in analysing settler colonial conditions in Israel.
