syndrome graphic novel pdf: Women in India Seemita Mohanty, Jalandhar Pradhan, Ipsita Roy, Debanjali Dutta, 2025-09-30 Women's lives in India have evolved significantly in the past few decades, particularly in the realms of health, education, economic security, and social standing - including media representation. The change is perceptible not only materially but also perceptually. Yet, at the cusp of India's eightieth year of Independence, the stories, or lack thereof, about the lives of women in the country don't cease to astound. *Women in India: Exploring Work, Life, and Freedom* critically traces the trajectory of these changes while also revealing the persistent blind spots and prejudices within systems that continue to scaffold their subordination and marginalisation. The book interrogates the extent to which these developments have improved lives of women in different parts of the country and questions whether persistent barriers like gender discrimination, underrepresentation, and unequal work prospects still prevent women from exercising their autonomy and agency in a modern and ever evolving society. Drawing on multidisciplinary perspectives, encompassing disciplines such as sociology, public health, economics, law, media, management, literature, and cultural studies, the book underscores the role of women as powerful agents of change despite the sociocultural barriers that continue to hinder their progress. Lives and life-stories of ordinary women form the crux of the chapters authored by an eclectic mix of young Indian scholars from diverse geographical locations. This book will provide essential reading to students and researchers working in the areas of gender studies, cultural studies, sociology, economics, media, management, literature, social movements, and South Asian studies. Policymakers and general readers interested in women's issues and well-being will also find the book to be of immense value.

syndrome graphic novel pdf: Living on the Spectrum Elizabeth Fein, 2020-07-07 Honorable Mention, 2020 Stirling Prize for Best Published Work in Psychological Anthropology, given by the Society for Psychological Anthropology Honorable Mention, New Millennium Book Award, given by the Society for Medical Anthropology How youth on the autism spectrum negotiate the contested meanings of neurodiversity Autism is a deeply contested condition. To some, it is a devastating invader, harming children and isolating them. To others, it is an asset and a distinctive aspect of an individual's identity. How do young people on the spectrum make sense of this conflict, in the context of their own developing identity? While most of the research on Asperger's and related autism conditions has been conducted with individuals or in settings in which people on the spectrum are in the minority, this book draws on two years of ethnographic work in communities that bring people with Asperger's and related conditions together. It can thus begin to explore a form of autistic culture, through attending to how those on the spectrum make sense of their conditions through shared social practices. Elizabeth Fein brings her many years of experience in both clinical psychology and psychological anthropology to analyze the connection between neuropsychological difference and culture. She argues that current medical models, which espouse a limited definition, are ill equipped to deal with the challenges of discussing autism-related conditions. Consequently, youths on the autism spectrum reach beyond medicine for their stories of difference and disorder, drawing instead on shared mythologies from popular culture and speculative fiction to conceptualize their experience of changing personhood. In moving and persuasive prose, *Living on the Spectrum* illustrates that young people use these stories to pioneer more inclusive understandings of what makes us who we are.

syndrome graphic novel pdf: Just drink the bleach; surviving one year of Covid, Lockdown and False-news tudor lomas, 2021-09-16 Millions died, health-care systems were overwhelmed and our deepest values challenged. The pandemic of 2020-21 took us to the edge, it destroyed our way of life and it undermined trust. On 8th March 2020 I shut myself away (a Brit in Amsterdam) before anyone else we know (we had co-morbidities and didn't want to die!) I searched for help from the victims of Spanish flu. I didn't find much so I wrote this warts-and-all 'lived experience' for my young grandson, so he'd know what we went through and how the world changed -- the chaos, the confusion, the fear and the frequent stupidities. The chapter titles summarise the shifting story of surviving the virus, the lockdown and the destabilising torrent of false-news. It's a day by day running journal of what happened, what we got wrong and what it means to us now, written with the author's young grandson in mind! Thirty-one chapters covering the key 15 months

to mid-summer 2021. . . . vivid, gripping first-hand account; essential reading -- Jonathan Burton . . .
. upbeat, lively; philosophical reflection of a pivotal year! -- Dr Kit Byatt The structure and
