weis iv administration and scoring manual pdf: Assessing Adolescent and Adult Intelligence Alan S. Kaufman, Elizabeth O. Lichtenberger, 2005-08-05 The classic text--now updated with a new interpretive approach to the WAIS?-III Assessing Adolescent and Adult Intelligence, the classic text from Alan Kaufman and Elizabeth Lichtenberger, has consistently provided the most comprehensive source of information on cognitive assessment of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS?-III. Augmenting the traditional sequential and simultaneous WAIS?-III interpretive methods, the authors present a new approach derived from Cattell-Horn-Carroll (CHC) theory. This approach combines normative assessment (performance relative to age peers) with ipsative assessment (performance relative to the person's own mean level). Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC?-IV, Kaufman and Lichtenberger have applied this system to the WAIS?-III profile of scores along with integrating recent WAIS?-III literature. Four appendices present the new

method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system, and norms tables for the new WAIS-III subtest combinations added in this approach. Assessing Adolescent and Adult Intelligence remains the premier resource for the field, covering not only the WAIS-III but also the WJ III, the KAIT, and several brief measures of intelligence, as well as laying out a relevant, up-to-date discussion of the discipline. The new, theory-based interpretive approach for the WAIS-III makes this a vital resource for practicing psychologists, as well as a comprehensive text for graduate students.

wais iv administration and scoring manual pdf: WISC-IV Advanced Clinical

Interpretation Lawrence G. Weiss, Donald H. Saklofske, Aurelio Prifitera, James A. Holdnack, 2006-05-18 For both experienced psychologists and graduate students, WISC-IV Advanced Clinical Interpretation moves quickly through the essentials of WISC-IV interpretation and onto an insightful analysis of the major cognitive domains assessed by WISC-IV. It is the intention of the editors to raise the standard of practice from a simplistic 'test-label-place' model to a clinical model of assessing to understand and intervene. In the first chapter, the reader is presented with a comprehensive array of societal and home environment factors for which there is empirical evidence indicating their impact on the development of children's cognitive abilities, and ultimately their scores on intelligence tests. Subsequent chapters address issues related to the assessment of cognitive abilities that compose 'g', with special emphasis on the clinical correlates of working memory and processing speed from both neuropsychological and cognitive information processing perspectives. Each new chapter builds on material presented in previous chapters and progresses the reader purposefully through deeper levels of understanding of WISC-IV and cognitive assessment in general. Two chapters explicate the processing approach to interpretation that is the corner stone of the WISC-IV Integrated. A further chapter addresses the interpretation of WISC-IV findings within the context of other instruments as part of a full psychological evaluation. The final chapter provides an extensive case example of how to write psychological evaluation reports from a child-centered rather than a score-centered perspective that can have transforming impact on parents and teachers approach to the child. Overall, these four authors are the architects of a masterful new book on advanced WISC-IV interpretation from a clinical perspective. Together with the complimentary book, WISC-IV Clinical Assessment and Intervention, Second Edition these books provide the complete spectrum of information needed by all psychologists who use the WISC-IV in clinical practice. - The Wechsler scale is the most widely used assessment of children's intelligence - Authored by assessment experts including Harcourt Assessment staff with exclusive data on the WISC-IV - Discusses interpretation of 4 index scores of WISC-IV - Examines the WISC-IV in relation to other frequently used psychological tests - Describes the importance of the WISC-IV integrated in clinical assessment - Predicts scholastic achievement based on WISC-IV subtest scores - Discusses modification of score interpretation based on culture, SES, & other contextual factors
