a mother s reckoning pdf: The Media War on Black Male Youth in Urban Education Darius Prier, 2017-03-27 News media, film, and the music industry have become powerful sources of misrepresentation of Black male life in the social imagination of white society. The pedagogy of popular culture has important implications for educators and youth advocates who desire to challenge the myths and distortions that ultimately harm youth. This volume raises awareness of the media war on Black male youth in popular culture, and the impact this image battle has on the discriminatory treatment of the population in urban educational settings. Citing the recent controversial deaths of Trayvon Martin and Jordan Davis, the portrayal of black males in contemporary films, and the locus of hip-hop masculinities, this volume offers a unique framework for analyzing how contemporary image-making practices affect Black male youth in urban education.

It also offers ethical considerations for educators in their critique, consumption and reading of Black male subjectivity in media, and provides avenues for practical applications of critical media literacy on the ground.

a mother s reckoning pdf: *Aurora* Dr. Lynne Fenton, Kerrie Droban, 2022-07-19 A compelling look at violence and trauma from the psychiatrist who treated mass shooter James Holmes, perpetrator of the infamous movie theater massacre. As an expert and speaker on mass shootings and gun violence, Dr. Lynn Fenton knew it was impossible to “spot a killer.” But when she met her new patient, troubled grad student James Holmes, the hair on her arms stood up. She feared he was going to kill. Yet she could find no way to thwart him. A few months later, Holmes struck: he entered a packed movie theater and opened fire, killing twelve people and wounding seventy; some were left brain damaged, several were paralyzed for life. Immediately the familiar debates reignited: The crisis of mental health access. More restrictive gun laws vs more “good guys with guns.” The morality of the death penalty. The legitimacy of the insanity defense. But what about the victims and bystanders whose lives would never be the same? Dr. Fenton’s memoir is a voice for them. Her inability to thwart Holmes’s mass murder made her a scapegoat and elicited innumerable death threats. Her chilling account provides an intimate look at her life before and after the Aurora massacre, as well as alarming insight into the sinister patient who called himself “fear incarnate.” With unprecedented access to thousands of pages of documents, audio and video recordings, trial transcripts, medical records, and notes, *Aurora* attempts to answer the question Holmes himself posed in his infamous notebook: “Why? Why? Why?”

a mother s reckoning pdf: *After Gun Violence* Craig Rood, 2019-05-20 Mass shootings have become the “new normal” in American life. The same can be said for the public debate that follows a shooting: blame is cast, political postures are assumed, but no meaningful policy changes are enacted. In *After Gun Violence*, Craig Rood argues that this cycle is the result of a communication problem. Without advocating for specific policies, Rood examines how Americans talk about gun violence and suggests how we might discuss the issues more productively and move beyond our current, tragic impasse. Exploring the ways advocacy groups, community leaders, politicians, and everyday citizens talk about gun violence, Rood reveals how the gun debate is about far more than just guns. He details the role of public memory in shaping the discourse, showing how memories of the victims of gun violence, the Second Amendment, and race relations influence how gun policy is discussed. In doing so, Rood argues that forgetting and misremembering this history leads interest groups and public officials to entrenched positions and political failure and drives the public further apart. Timely and innovative, *After Gun Violence* advances our understanding of public discourse in an age of gridlock by illustrating how public deliberation and public memory shape and misshape one another. It is a search to understand why public discourse fails and how we can do better.

a mother s reckoning pdf: *Leading Mind* Peter Hey, 2019-02-14 With his blend of engineering and the fields of personal transformation, Peter Hey takes us on a deep, yet accessible journey into the inner recesses of our minds. He presents a unique model of the mind and the mechanisms that define our behavior. Based on his own personal experiences as the son of a Holocaust survivor, his sessions with his own clients and his background in computer design, he brings the concept of programs in our unconscious as the basic mechanism that determines our actions. Millions of programs operating below our everyday awareness, each of them associated with emotions that, in fact, are the actual power behind our decisions in daily life. *Leading Mind* explains how these programs are created from all our experiences, starting already at conception, through our time in the mother’s womb, all the way to full adulthood. It also shows how, when accessing our deep unconscious, we discover aspects in us that transcend our current physical life. Based on thousands and thousands of sessions done by practitioners around the world, with remarkably consistent results across cultures, education, social status and personal beliefs. *Leading Mind* shows how the current events that are impacting our civilization nowadays are the result of our emotional ignorance. It brings to light an urgent call to reform our educational curriculum to teach how our mind works and tools for personal transformation and conflict resolution. Understanding our minds

brings tolerance and compassion for all. It gives us the knowledge to change our limiting behaviors. The start of real personal power to direct our lives in the direction that is our authentic individual expression.

a mother s reckoning pdf: Stop Being Reasonable Eleanor Gordon-Smith, 2019-10-22 A thought-provoking exploration of how people really change their minds, and how persuasion is possible. In Stop Being Reasonable, Eleanor Gordon-Smith weaves a narrative that illustrates the limits of human reason. Here, she tells the stories of people who have radically altered their beliefs--from the woman who had to reckon with her husband's terrible secret to the man who finally left the cult he had been raised in since birth. Gordon-Smith shows how we can change the course of our own lives, and asks: what made someone change course? How should their reversals affect how we think about our own beliefs? And in an increasingly divided world, what do they teach us about how we might change the minds of others? Inspiring, perceptive, and moving, Stop Being Reasonable explores why resistance to evidence is often rooted in self-preservation and fear, why we feel shame in admitting we are wrong, and why what we believe is often more important than what we believe. This fascinating book will completely change the way you look at the power of persuasion.

a mother s reckoning pdf: After the Bloodbath James D. Diamond, 2019-11-01 As violence in the United States seems to become increasingly more commonplace, the question of how communities reset after unprecedented violence also grows in significance. After the Bloodbath examines this quandary, producing insights linking rampage shootings and communal responses in the United States. Diamond, who was a leading attorney in the community where the Sandy Hook Elementary School tragedy occurred, focuses on three well-known shootings and a fourth shooting that occurred on the Red Lake Indian Reservation in Minnesota. The book looks to the roots of Indigenous approaches to crime, identifying an institutional weakness in the Anglo judicial model, and explores adapting Indigenous practices that contribute to healing following heinous criminal behavior. Emerging from the history of Indigenous dispute resolution is a spotlight turned on to restorative justice, a subject no author has discussed to date in the context of mass shootings. Diamond ultimately leads the reader to a positive road forward focusing on insightful steps people can take after a rampage shooting to help their wounded communities heal.

a mother s reckoning pdf: The Minds of Mass Killers P. Shavaun Scott, 2021-11-12 Public mass killings are becoming more common. Though the chances of being harmed or killed in a mass shooting are slim, each incident affects the public's sense of safety. There are many myths and falsehoods concerning mass murderers. As a result, the public lacks reliable knowledge about the reasons behind such killings, preventing the development of comprehensive strategies to mitigate the violence. Written by a mental health therapist with thirty years of clinical experience in violence prevention, this book clarifies the realities of mass killings. Using research from forensic psychology, it provides a foundation for understanding the pathway to violence identified in the personal histories of many mass murderers. Drawing from criminology, neuroscience and developmental and social psychology, the author makes the case that we are all capable of creating a safer society.

a mother s reckoning pdf: Social Psychology Randal W. Summers, 2016-12-12 This book provides an introduction to social psychology that covers its history, theories, and core concepts. It explains intrapersonal (how others influence our views about ourselves) and interpersonal (how we think about and act toward other people) applications of this discipline in today's society. Human beings are social by nature. Because of this, the people around us have a profound impact on how we think about ourselves and others—from our sense of self esteem to our opinions and attitudes to our interactions in a group setting. Social Psychology: How Other People Influence Our Thoughts and Actions describes these subtle but powerful effects in our daily lives, offering a complete and balanced view of the topic. Readers will discover the history of social psychology, grasp its theories and core concepts, learn about important issues and debates related to this topic, and see how these ideas are directly applicable to therapy and other real-world situations. Chapters cover how an individual's self-concept is developed and the various social forces on it, how a social psychology

experiment may be conducted, and examples of social psychology in everyday life, such as group dynamics and cultural phenomena. Readers will also see how social psychology plays a role in our criminal justice system, including in the context of the prison system population; in the cultural issues associated with Latino and Native American populations; in our social collective concern about mass shootings, epidemics, and terrorism; and in the dynamics, processes, and tactics of a nationwide presidential election campaign seeking to influence the masses.

a mother s reckoning pdf: The Preacher's Guide to Suicide H. C. Johnson, 2022-03-18 This book makes the startling claim that the pulpit is the appropriate place to address suicide. In *A Preacher's Guide to Suicide* Johnson chisels through the rusty prison bars of cultural pretense and the oppressive myths of suicide. Using history, the social and behavioral sciences, and biblical inquiry over the centuries of varied Christian voices, Johnson demonstrates that suicide is part of the very fabric of Christian identity. And to preach suicide awareness is to preach life into the very act of dying. While grappling with the contemporary understanding of neuroscience, psychopathology, societal values, and individualism, Johnson seeks to present suicide in a hopeful light as we all approach death in those daily moments of confession, forgiveness, and prayer. Johnson hopes to provoke further conversation within the Christian community about the richness of suicide within the Scriptures and seeks to be a source of inspiration for preachers.

a mother s reckoning pdf: Our Biosocial Brains Michele K. Lewis, 2020-07-07 In *Our Biosocial Brains*, Michele Lewis underscores culture, brain, behavior, and social problems to advocate for a more inclusive cultural neuroscience. Traditional neuroscientists to date have not prioritized studying the impact of power, bias, and injustice on neural processing and the brain's perception of marginalized humans. Lewis explains current events, historical events, and scientific studies, in *Our Biosocial Brains*. Readers will be drawn to the relevancy of brain science to examples of injustices and social bias. Lewis also argues that incorporating non-western African-Centered Psychology is vital to diversifying research questions and diversifying interpretations of existing brain science, because African-Centered Psychology is not rooted in racist, classist, and exclusionary hegemonic methods. Lewis argues for attention to marginalized populations, regarding the impact of violence, disrespect, othering, slurs, environmental injustice, health, and general disregard on humans' brains and behavior. Using hundreds of peer-reviewed studies and original research, the author presents scientific studies that are integrated with sociocultural explanations to foster wider understanding of how our sociocultural world shapes our brains, and how our brains' responses influence how humans perceive and treat one another.

a mother s reckoning pdf: Care for the Sorrowing Soul Duane Larson, Jeff Zust, 2017-10-26 Moral Injury is now recognized as a growing major problem for military men and women. Operant conditioning can overwhelm moral convictions and yet the question of whether "to shoot or not to shoot" often will never have a settled answer. Certain theories and treatment models about MI have been well developed, but too often overlook root issues of religious faith. The authors propose a new model for understanding moral injury and suggest ways to mitigate its virtually inevitable occurrence in pre-combat training, and ways to resolve MI post-trauma with proven spiritual resources. People outside the military, too, among whom the incidence of MI also is a growing

threat, will benefit from this analysis. The stories of the injured—their shaping and their telling—are the key, and there are many illuminating stories of moral injury and recovery. Those who suffer MI, their families, and caregivers, including counselors, pastors, and faith communities, will find hope-giving first steps toward the healing of MI in this book.

a mother s reckoning pdf: Copycat Crime Jacqueline B. Helfgott, 2023-07-27 Details the new phenomena of copycat crime inspired by technology and the hyperreality fueled in some people by digital culture and video games. Across her 30-year career in criminology, author Jacqueline Helfgott has watched with fascination and fear as the world has shifted from a place where one-dimensional televised news each evening and newspapers bought each morning provided the only information on crimes and killings. Now, nonstop, instant global news coverage on 24-hour television and the internet enables people to see and replay not only crime, violence, terrorism, and murder coverage provided by journalists in real time, but also Facebook and YouTube feeds filmed by the criminals themselves while perpetrating the crimes. In this riveting text about the consequences of our technical, digital, and cultural changes, Helfgott focuses on how these advances are perpetuating this era's new and more massively deadly acts. The book intertwines vignettes from current events, perpetrator statements, police reports, and current research to show how copycat crimes are linked to media, technology, and our digital culture. Concluding with recommendations to reduce the criminogenic effects of media, technology, and digital culture, this book also includes an appendix listing technology- and media-influenced copycat crimes.

a mother s reckoning pdf: No Easy Answers Brown, Brooks, 2022-06-10 On April 20, 1999, Dylan Klebold and Eric Harris, two seniors at Columbine High School in Littleton, Colorado, walked into their school and shot to death twelve students and one teacher, and wounded many others. It was the worst single act of murder at a school in U.S. history. Few people knew Dylan Klebold or Eric Harris better than Brooks Brown. Brown and Klebold were best friends in grade school, and years later, at Columbine, Brown was privy to some of Harris and Klebold's darkest fantasies and most troubling revelations. After the shootings, Brown was even accused by the police of having been in on the massacre—simply because he had been friends with the killers. Brown with journalist Rob Merritt tells his full version of the story. He describes the warning signs that were missed or ignored, and the evidence that was kept hidden from the public after the murders. He takes on those who say that rock music or video games caused Klebold and Harris to kill their classmates and explores what it might have been that pushed these two young men, from supposedly stable families, to harbor such violent and apocalyptic dreams. Shocking as well as inspirational and insightful, *No Easy Answers* is an authentic wake-up call for all the psychologists, authorities, parents, and law enforcement personnel who have attempted to understand the murders at Columbine High School. As the title suggests, the book offers no easy answers, but instead presents the unvarnished facts about growing up as an alienated teenager in America today. This edition contains a new afterword that describes what has happened in the United States since Columbine, and provides updates on the aftermath of the massacre.

Klebold's story begins with the voicemail that changed her life. At lunchtime on April 20, 1999, in her office in Littleton, Colorado, she listened to a cryptic message from her husband, Tom. Though she intuited that something had happened to one of their two children, she had no way of knowing that Dylan was already a murderer.
