That sincere rhetoric of an angel is coined in this verses, I believe; help thou mine unbelief (Mark 9:24). aging with grace pdf free download: Cyber Zen Gregory Price Grieve, 2016-12-08 Cyber Zen ethnographically explores Buddhist practices in the online virtual world of Second Life. Does typing at a keyboard and moving avatars around the screen, however, count as real Buddhism? If authentic practices must mimic the actual world, then Second Life Buddhism does not. In fact, a critical investigation reveals that online Buddhist practices have at best only a family resemblance to canonical Asian traditions and owe much of their methods to the late twentieth-century field of cybernetics. If, however, they are judged existentially, by how they enable users to respond to the suffering generated by living in a highly mediated consumer society, then Second Life Buddhism consists of authentic spiritual practices. Cyber Zen explores how Second Life Buddhist enthusiasts form communities, identities, locations, and practices that are both products of and authentic responses to contemporary Network Consumer Society. Gregory Price Grieve illustrates that to some extent all religion has always been virtual and gives a glimpse of possible future alternative forms of religion.

aging with grace pdf free download: Dilemma in Politics Ravi Saxena, 2024-09-26 Dilemma in Politics underlines the major faults and fissures in the academic discourses around the themes emphasizing upon the prevalence of dichotomy between 'what ought to be' and 'what is' in the political sphere. How do political values get marginalized, if not compromised, in the name of ideological conflicts and alliances? This book highlights this dilemma across a range of themes which explore the gaps in the practice and the praxis of politics. The chapters in this volume present detailed analytical perspective on issues concerning environment, female empowerment and feminist discourses and identity-based politics and its limitations, among various other key themes. Further, it analyses the concept of rights in the neoliberal democratic context, caste and class politics and its inherent dilemmas, and it also illustrates the gaps in the political discourses to discussion on possible alternatives or solutions. With contributions by eminent political scientists working on Indian politics, this book would be an invaluable resource for scholars and researchers of political science, political philosophy, public administration, governance, public policy, political participation, democracy and South Asia studies, and will be of interest to bureaucrats, policymakers and the general reader.

aging with grace pdf free download: Logics of War Therese Feiler, 2019-12-12 The modern ethics of war is a field of disparate, competing voices based on often unexplored theological and metaphysical assumptions. Therese Feiler approaches them from the borderline area between systematics, philosophical theology and religious studies. With reference to G. W. F. Hegel's and like-minded thinkers' 'theo-logic' that negotiates Christ's mediation and immanent dialectics, Feiler identifies the logic and problem of mediation as the core concern of political ethics. Feiler unites five representative authors from now disparate strands of contemporary just war ethics, testing whether they offer a meaningful possibility of mediation and subsequent reconciliation: a sovereign realist and a cosmopolitan idealist; a rationalist individualist, an idealist Christian ethicist, and finally, an

evangelical theologian. Opening the just war debate for comparative critical engagement, Feiler creates a fascinating study that locates a “dynamic point” at which faithful, free political action can be wrestled from irony, tragedy, and melancholic inertia in the face of totalitarian suffocation.

This book is the first to offer academic examination of the theoretical contributions and practical applications of community philosophy. Bringing together voices from diverse contexts and subject areas, from activism and political action to religious environments, arts organisations and museums to maximum security prisons, this collection asks key questions about the point of making philosophy available for everyone: 'How do you “do philosophy” with the public?'; 'Is philosophy in the community the same as academic philosophy?'; 'Why is community philosophy important?' Including contributions from practitioners and researchers from professional philosophy, education, healthcare, and community philosophy, this collection offers perspectives on a growing area of study.
