ars moriendi english pdf: Medieval English Theatre 46 Meg Twycross, Sarah Carpenter, Elisabeth Dutton, Gordon Kipling, 2025-06-24 Newest research into drama and performance from the Middle Ages and the Tudor period. *Medieval English Theatre* is the premier journal in early theatre studies. Its name belies its wide range of interest: it publishes articles on theatre and pageantry from across the British Isles up to the opening of the London playhouses and the suppression of the civic religious plays, and also includes contributions on European and Latin drama, together with analyses of modern survivals or equivalents, and of research productions of medieval plays. This volume is testament to the lively range of current research across the field of medieval theatre. It investigates different traditions of performance, through a variety of theatrical, theological, and material approaches. It opens with an analysis of a fascinating Dutch rhetoricians play-text, revealing how its engagingly disruptive female character, *Everyday Chitchat*, proves central to a serious discussion of censorship - in a play which was itself censored. Although no play-text survives from medieval Beverley, the next contribution shows how local records of its *Corpus Christi* plays offer rich details of a range of pageants and organisation not dissimilar from its

more famous neighbour, York. The two following articles investigate theological issues. A nuanced re-reading of *The Treatise of Miracles Playing* considers how priestly involvement in performance raised anxieties about the role and authority of priests, including at the Mass. Attitudes to dread, revealed through the taxonomies of fear developed by medieval theologians, then illuminate the didactic role of fear, engendered in the protagonists and audiences of the Macro morality plays. The volume closes with the second part of an investigation into John Blanke's Hat. Following the first part's demonstration, in the previous volume of *METH*, that the Black trumpeter's headgear was not a marker of his faith, this uncovers the true identity of the hat, asking how far it can offer evidence for his history. The present volume thus throws new light on familiar texts and questions, offering important contributions to newly developing fields of study.

ars moriendi english pdf: A Companion to Death, Burial, and Remembrance in Late Medieval and Early Modern Europe, c. 1300-1700 Philip Booth, Elizabeth Tingle, 2020-11-23 This companion volume seeks to trace the development of ideas relating to death, burial, and the remembrance of the dead in Europe between ca. 1300 and 1700. Examining attitudes to death from a range of disciplinary perspectives, it synthesises current trends in scholarship, challenging the old view that the Black Death and the Protestant Reformations fundamentally altered ideas about death. ars moriendi english pdf: Understanding Italian Opera Tim Carter, 2015-09-16 Opera is often regarded as the pinnacle of high art. A Western genre with global reach, it is where music and drama come together in unique ways, supported by stellar singers and spectacular scenic effects. Yet it is also patently absurd -- why should anyone break into song on the dramatic stage? -- and shrouded in mystique. In this engaging and entertaining guide, renowned music scholar Tim Carter unravels its many layers to offer a thorough introduction to Italian opera from the seventeenth to the early twentieth centuries. Eschewing the technical musical detail that all too often dominates writing on opera, Carter begins instead where the composers themselves did: with the text. Walking readers through the relationship between music and poetry that lies at the heart of any opera, Carter then offers explorations of five of the most enduring and emblematic Italian operas: Monteverdi's *The Coronation of Poppea*; Handel's *Julius Caesar in Egypt*; Mozart's *The Marriage of Figaro*; Verdi's *Rigoletto*; and Puccini's *La Bohème*. Shedding light on the creative collusions and collisions involved in bringing opera to the stage, the various, and varying, demands of the text and music, and the nature of its musical drama, Carter also shows how Italian opera has developed over the course of music history. Complete with synopses, cast lists, and suggested further reading for each work discussed, *Understanding Italian Opera* is a must-read for anyone with an interest in and love for this glorious art.

ars moriendi english pdf: A Cultural History of the Human Body in the Medieval Age

Linda Kalof, 2012-03-01 The Christian, Jewish and Muslim communities of medieval Western Europe conceived of the human body in manifold ways. The body was not a fixed or unmalleable mass of flesh but an entity that changed its character depending on its age, its interactions with its environment and its diet. For example, a slave would have been marked by her language, her name, her religion or even by a sign burned onto her skin, not by her color alone. Covering the period from 500 to 1500 and using sources that range across the full spectrum of medieval literary, scientific, medical and artistic production, this volume explores the rich variety of medieval views of both the real and the metaphorical body. *A Cultural History of the Human Body in the Medieval Age* presents an overview of the period with essays on the centrality of the human body in birth and death, health and disease, sexuality, beauty and concepts of the ideal, bodies marked by gender, race, class and age, cultural representations and popular beliefs and the self and society.

David McKitterick's lively and wide-ranging study explores how old books have been represented and interpreted from the eighteenth century to the present day. Conservation of these texts has taken many forms, from early methods of counterfeiting, imitation and rebinding to modern practices of microfilming, digitisation and photography. Using a comprehensive range of examples, McKitterick reveals these practices and their effects to address wider questions surrounding the value of printed books, both in terms of their content and their status as historical objects. Creating a link between historical approaches and the emerging technologies of the future, this book furthers our understanding of old books and their significance in a world of emerging digital technology.

ars moriendi english pdf: Defective Institutions Jacques Lezra, 2024-03-05 *Defective Institutions* overturns the basis of institutionalism. Faith in classic institutions—exposed as clamorously inadequate by the failure of governance under neoliberalism—does not result in greater democracy, greater horizontality, or more equitable living. Nor does trust in the standing of decisions, in the authority of antecedent cases, in the coherence, strength, continuity, or solidity of the institutions that frame and render legitimate these decisions and the rules they buttress. To the contrary: the classically-imagined institution and our faith in it lie at the heart of neoliberal unfreedom and racialized violence. Working at the point of contact and conflict between socialist and anarcho-philosophical traditions, *Defective Institutions* offers an alternative, which is also an alternative to the figures of governance associated with the liberal conception of the state: an aberrant republicanism comprised of defective institutions, run through with the necessity of their abolition. Lezra's book moves from the primitive scenes of Western political institution—the city; the family; the university; the first person; "race"—through recent work in the philosophy of translation, decolonial studies, abolitionism, Afropessimism and its critiques, psychoanalysis, and musicology. To offer an original wedding of abolition and institution, Lezra brings together genealogies of contemporary institutionalism (from Durkheim and Hauriou to Searle); post-Marxist accounts of the state (Balibar, Abensour); philosophical and anthropological anarchism (Wolff, Malabou, Graeber,

Scott); critical legal theory (analyses of *Marbury v. Madison* as well as *Dobbs v. Jackson*); continental and analytic versions and critiques of foundationalism (Heidegger, Lyotard and Butler; Quine, Searle and Fine); and political and sociological abolitionism (Lewis, O'Brien). At a time when some call for strengthening institutions and for defending liberties ostensibly protected by such institutions, and others long for the destruction of institutions that have long been oppressive, Lezra's book offers today's Left a new framework for confronting institutions' necessity and their necessary abolition.

ars moriendi english pdf: Impossible Recovery Hannah Lucas, 2025-01-14 The medieval mystic Julian of Norwich (1342–after 1416) is the first known woman to author a book in the English language, recognized today for her strikingly optimistic claim that “all shall be well.” Her visionary text *Revelations of Divine Love* is the product of many years of contemplation, written and revised after a life-changing event of near-fatal illness and divine revelation. Hannah Lucas explores the entanglement of illness and revelation in Julian's writings, illuminating the unexpected commonalities between the medical and the mystical and their significance for philosophies of health. Framed by an original application of post-Heideggerian philosophy, *Impossible Recovery* offers a vivid new interpretation of the medieval mystic as crafting a proto-phenomenological theology of well-being. Lucas's careful readings pay close attention to Julian's mystical language and poetics, revealing the surprising resonances of her writings with modern and postmodern thought. Refracted through Julian's *Revelations*, this book advances a powerful existential query about the possibilities of recovery—of well-being, and of medieval history.
