city of glass paul auster pdf: Paul Auster's Writing Machine Evija Trofimova, 2014-08-28 Paul Auster is one of the most acclaimed figures in American literature. Known primarily as a novelist, Auster's films and various collaborations are now gaining more recognition. Evija Trofimova offers a radically different approach to the author's wider body of work, unpacking the fascinating web of relationships between his texts and presenting Auster's canon as a rhizomatic facto-fictional network produced by a set of writing tools. Exploring Auster's literal and figurative use of these tools – the typewriter, the cigarette, the doppelgänger figure, the city – Evija Trofimova discovers Auster's “writing machine”, a device that works both as a means to write and as a construct that manifests the emblematic writer-figure. This is a book about assembling texts and textual networks, the writing machines that produce them, and the ways such machines invest them with meaning. Embarking on a scholarly quest that takes her from between the lines of Auster's work to between the streets of his beloved New York and finally to the man himself, Paul Auster's *Writing Machine* becomes not just a critical investigation but a critical collaboration, raising important questions about the ultimate meaning of Auster's work, and about the relationship between texts, their authors, their readers and their critics.

city of glass paul auster pdf: The Rise of the Graphic Novel Alexander Dunst, 2023-07-20 Bringing digital humanities methods to the study of comics, this monograph traces the emergence of the graphic novel at the intersection of popular and literary culture. Based on a representative corpus of over 250 graphic novels from the United States, Canada, and Great Britain, it shows how the genre has built on the visual style of comics while adopting selected features of the contemporary novel. This argument positions the graphic novel as a crucial case study for our understanding of twenty-first-century culture. More than simply a niche format, graphic novels demonstrate how contemporary literature reworks elements of genre narrative, reconfiguring rather than abolishing distinctions between high and low. The book also puts forward a new historical periodization for the graphic novel, centered on integration into the literary marketplace and leading to an explosive growth in page length and a diversification of aesthetic styles.

Their range of expression contains a tremendous variety of forms, genres and modes – from high to low, from serial entertainment for children to complex works of art. This has led to a growing interest in comics as a field of scholarly analysis, as comics studies has established itself as a major branch of criticism. This handbook combines a systematic survey of theories and concepts developed in the field alongside an overview of the most important contexts and themes and a wealth of close readings of seminal works and authors. It will prove to be an indispensable handbook for a large readership, ranging from researchers and instructors to students and anyone else with a general interest in this fascinating medium.

city of glass paul auster pdf: *Chronotopes of the Uncanny* Petra Eckhard, 2014-03-15 Using the theoretical frameworks of Freud, Todorov, and Bakhtin, this book explores how American writers of the late 20th century have translated the psychoanalytical concept of »the uncanny« into their novelistic discourses. The two texts under scrutiny – Paul Auster's »City of Glass« and Toni Morrison's »Jazz« – show that the uncanny has developed into a crucial trope to delineate personal and collective fears that are often grounded on the postmodern disruption of spatio-temporal continuities and coherences.

city of glass paul auster pdf: *Irish Urban Fictions* Maria Beville, Deirdre Flynn, 2018-11-01 This collection is the first to examine how the city is written in modern Irish fiction. Focusing on the multi-faceted, layered, and ever-changing topography of the city in Irish writing, it brings together studies of Irish and Northern Irish fictions which contribute to a more complete picture of modern Irish literature and Irish urban cultural identities. It offers a critical introduction to the Irish city as it represented in fiction as a plural space to mirror the plurality of contemporary Irish identities north and south of the border. The chapters combine to provide a platform for new research in the field of Irish urban literary studies, including analyses of the fiction of authors including James Joyce, Roddy Doyle, Kate O'Brien, Hugo Hamilton, Kevin Barry, and Rosemary Jenkinson. An exciting and diverse range of fictions is introduced and examined with the aim of generating a cohesive perspective on Irish urban fictions and to stimulate further discussion in this emerging area.

city of glass paul auster pdf: *The Cinematic Novel and Postmodern Pop Fiction* Décio Torres Cruz, 2019-12-05 Décio Torres Cruz approaches connections between literature and cinema partly through issues of gender and identity, and partly through issues of reality and representation. In doing so, he looks at the various ways in which people have thought of the so-called cinematic novel, tracing the development of that genre concept not only in the French ciné-roman and film scenarios but also in novels from the United States, England, France, and Latin America. The main tendency he identifies is the blending of the cinematic novel with pop literature, through allusions to Pop Art and other postmodern cultural trends. His prime exhibits are a number of novels by the Argentinian writer Manuel Puig: *Betrayed* by Rita Hayworth; *Heartbreak Tango*; *The Buenos Aires Affair*; *Kiss of the Spider Woman*; and *Pubis angelical*. Bringing in suggestive sociocultural and psychoanalytical considerations, Cruz shows how, in Puig's hands, the cinematic novel resulted in a pop collage of different texts, films, discourses, and narrative devices which fused reality and imagination into dream and desire.

city of glass paul auster pdf: *Mapping in Architectural Discourse* Marc Schoonderbeek, 2021-11-29 This book explores the notion of mapping in architectural discourse. First locating, positioning and theorizing mapping, it then makes explicit the relationship between research and design in architecture through cartography and spatial analysis. It proposes three distinct modalities: tool, operation and concept, showing how these methods lead to discursive aspects of architectural work and highlighting mapping as an instrument in developing architectural form. It emphasizes the importance of place and time as fundamental terms with which to understand the role of mapping. An investigation into architectural discourse, this book will appeal to academics

and researchers within the discipline with a particular interest in theory, history and cartography.

Grewe-Salfeld, 2021-11-05 From self-help books and nootropics, to self-tracking and home health tests, to the tinkering with technology and biological particles – biohacking brings biology, medicine, and the material foundation of life into the sphere of »do-it-yourself«. This trend has the potential to fundamentally change people's relationship with their bodies and biology but it also creates new cultural narratives of responsibility, authority, and differentiation. Covering a broad range of examples, this book explores practices and representations of biohacking in popular culture, discussing their ambiguous position between empowerment and requirement, promise and prescription.

city of glass paul auster pdf: Don Quixote Slav N. Gratchev, Howard Mancing, 2017-11-06

This book is a unique scholarly attempt to examine Don Quixote from multiple angles to see how the re-accentuation of the world's greatest literary hero takes place in film, theatre, and literature. To accomplish this task, eighteen scholars from the USA, Canada, Spain, and Great Britain have come together, and each of them has brought his/her unique perspective to the subject. For the first time, Don Quixote is discussed from the point of re-accentuation, i.e. having in mind one of the key Bakhtinian concepts that will serve as a theoretical framework. A primary objective was therefore to articulate, relying on the concept of re-accentuation, that the history of the novel has benefited enormously from the re-accentuation of Don Quixote helping us to shape countless iconic novels from the eighteenth century, and to see how Cervantes's title character has been reinterpreted to suit the needs of a variety of cultures across time and space.
