Understanding the Fourth Turning Theory

Origins and Concept

The "Fourth Turning" concept originates from the work of historians William Strauss and Neil Howe, who proposed a cyclical theory of history and societal change. According to their theory, history moves through recurring cycles called "turnings," each lasting approximately 80-100 years, roughly a human generation.

The four turnings are:

1. **The High:** A period of strong institutions and societal optimism.
2. **The Awakening:** A time of spiritual renewal and questioning established norms.
3. **The Unraveling:** An era of individualism, cultural fragmentation, and decline of trust.
4. **The Crisis (Fourth Turning):** A period of upheaval, conflict, and transformation, often involving societal rebuilding.

The current era is often associated with the Fourth Turning, characterized by significant upheaval and the emergence of new societal heroes.

The Role of Heroes in the Fourth Turning

In this cycle, heroes are individuals who emerge during times of crisis to lead society through upheaval. heroes of the fourth turning pdf: Why America Matters Michael Wilkerson, 2022-11-01 Who are we? Where are we going? And why are we so divided? *Why America Matters* addresses these questions and argues that the place Americans call home is worth fighting for. The widely held belief of past generations—that America is special, with an extraordinary role to play in the world—remains true, but has been undermined by external adversaries, internal contradictions, and weakness of vision. *Why America Matters* reveals how the nation faces four crises: extraordinary circumstances, confused identity, corrupt institutions, and inept policy engagement. The idea of America is under attack, yet many of our wounds are self-inflicted. Powerful forces within our country—hostile to the ideals of America—seem to be winning. These agents seek to rewrite America's history, undermine its institutions, and silence those who don't agree. All the while, America's foreign adversaries prey on our divisions and weaknesses. America is neither declining

nor dying, but in a winter season. Our current political and social crises represent fertile ground for national springtime and renewal, a process the nation has gone through before. While the country has never been more divided on partisan, cultural, and ideological lines, there is a path to achieve the unity and vigor necessary to confront the twenty-first century's challenges. Americans must recognize and reject false ideologies; resist surveillance and tyranny; take back our communities, schools, and families; and assert our enshrined rights to free speech and privacy. The world recognized that America was great because America was good. America's founding ideals, timeless values, and distinctive national character are needed now more than ever. But we can't simply go back to the past. A new century requires a new vision of American greatness. *Why America Matters* points the way. "Why America Matters is an astonishing achievement. Wilkerson's masterful synthesis of our history as it relates to where we are right at this moment—and how we can and must go forward—is an inestimable gift, and can hardly be praised enough." —Eric Metaxas is the New York Times #1 bestselling author of *Bonhoeffer*, *Martin Luther, Is Atheism Dead?*, *If You Can Keep It*, and *Letter to the American Church*, and founder and host of *Socrates in the City* "Why America Matters is a courageous book. Wilkerson confronts the powers—both political and ideological, that have conspired to destroy our nation and its values. Why America Matters holds an urgent and timely message for anyone who cares about the future of this nation. Why America Matters is a must read for anyone seeking to understand what is happening to America, and more importantly, how to fix it!" —Matt Schlapp, Chairman, Conservative Political Action Coalition (CPAC) "Michael Wilkerson has pulled off a mean feat with *Why America Matters*. As much as it is a crisply written lament for our fractured national identity, his tour de force also is a blueprint for a new generation who will be left to rebuild the moral capital squandered by their forebears. America has never mattered more, and Wilkerson makes the powerful case for a new exceptionalism that will require men and women of courage and virtue to join the resistance against tyranny." —Miranda Devine, New York Post correspondent and bestselling author of *Laptop from Hell*

heroes of the fourth turning pdf: Media Inequality Victoria Fielding, 2024-09-04 News media notionally underpins a vibrant and diverse democracy by representing political, industrial and social conflict to mass audiences. Yet, few studies measure how equitably journalists frame public contestation. Despite framing theory’s extensive use in media and communication scholarship, little is known about how frames are created and disseminated - how frames are built - to explain how and why journalists frame news the way they do. *Media Inequality* proposes that frame building occurs through a two-step process of frame adoption and replication. This two-step frame-building process is explored by identifying the newspaper master narratives used in five historical industrial dispute case studies. These master narratives are then mapped to public narratives used by unionised firefighters and their employer in the Australian case of the 2016 Victorian Country Fire Authority industrial dispute. By theorising about the causes of journalists’ inequitable framing of contested narratives, *Media Inequality* tells the story of unconscious structural media bias, interrogates the power of news media to reinforce dominant frames, offers valuable theoretical perspectives about the influence of media power on the accumulation of power in society, and provides lessons for groups communicating in competitive contexts. *Media Inequality* is thus valuable to scholars, academics and research students in the fields of journalism, communication, and media, particularly scholars interested in how journalists represent political, industrial, and social contestation.
