There are more than 350 FTAs worldwide today. In the last two decades these agreements significantly expanded in scope, covering not only market access but also behind-the-border policy issues going far beyond WTO rules. Developed countries are also establishing their own templates for FTA-making. This book is intended to bring about a greater level of understanding among readers in a systematic manner with respect to the vast changes taking place on the FTA scene worldwide and about India's own limited participation in this regard so far. FTAs are legal instruments, but they also substantially affect business, industry, and agriculture interests. There is a widely held perception in the country, not without some validity,
