introduction to educational research 3rd edition pdf free: Unbundling the University Curriculum Kate O'Connor, 2022-09-02 In a context in which explicit attention to the curriculum has been sidelined in universities' strategy, this book makes an argument for why curriculum matters, both in understanding the effects of unbundled online learning and more broadly. It takes up two particular curriculum issues which are amplified in an unbundled context: differences in the

formulation of curriculum between disciplines and professional fields, and the extent these are recognised in university strategy; and the push for constructivist pedagogies, and its effects on curriculum construction. Since the onslaught of MOOCs in 2012, unbundled forms of online learning offered via partnerships with external online program management and MOOC providers have grown significantly across the university sector. There has been much debate about the implications of these partnerships but the focus has predominantly been on the engagement of students and their learning. This book takes a different and novel approach, looking instead at the effects on curriculum and knowledge. Drawing on selected case studies, the book reflects on how university leaders and academics engaged with MOOCs and other forms of unbundled online learning in the early 2010s, and the effects of these reforms on curriculum practice. It captures in detail the complex and difficult work involved in university curriculum making in a way rarely seen in discussions of higher education. And it generates new in-sights about some of the critical problems manifest in the ongoing moves to embrace unbundled online learning today.

International contributors explore regional, national and international perspectives, presenting a variety of critically assessed accounts case studies that reflect different local and national contexts, institutional archetypes and academic missions. Frameworks of sustainability-led transformation are illustrated at the level of the institution (executive/administrative), organization, culture, place-based (anchor) and student in various countries including Aruba, Belgium, Brazil, Canada, Hong Kong, Japan, Lebanon, Nepal, New Zealand, Nigeria, South Africa, Spain, Uganda, United Kingdom and the United States of America. The book concludes with a manifesto for change and a call to action. It identifies that the sustainability journey of a HEI is influenced by context and place, with mission, leadership and strategy playing a vital role and change agency by students a key ingredient.
