lean business model canvas pdf: Progress in Sustainable Mobility Research Jorge Marx Gómez, Jantje Halberstadt, Anna Henkel, Frank Köster, Jürgen Sauer, Jürgen Taeger, Andreas Winter, David M. Woisetschläger, 2021-05-24 This book presents the outcomes of the trans- and interdisciplinary research project NEMo (Nachhaltige Erfüllung von Mobilitätsbedürfnissen im ländlichen Raum - Sustainable Fulfilment of Mobility Needs in Rural Areas). Due to demographic change, it is becoming increasingly difficult for rural districts and communities to maintain a basic set of public transport services such as bus and train transit without encountering issues regarding necessary social participation, sensible regional value creation and, last but not least, achievable environmental protection goals. At the same time, the demand for mobility in rural areas will continue to rise in the future, e.g. due to the concentration of medical care facilities and shopping centres close to cities. Focusing on the development of sustainable and innovative mobility services and business models, this book explains how new mobility offers can be created in which citizens themselves become mobility providers. To do so, it combines the findings of the individual research groups with external contributions from science and practice.

lean business model canvas pdf: *Teaching the Entrepreneurial Mindset Across the University* Lisa Bosman, Stephanie Fernhaber, 2021-10-07 "It stretches no point to suggest that creativity, innovation and risk-taking will decide our future societal prosperity. We cannot spread those values too widely, so having taught engineering faculty in their first book, these authors now aim to boost the spirit across all disciplines. What a great success for all of us if they succeed." – Mitchell E. Daniels, Jr., president of Purdue University and former governor of Indiana Despite the relevancy of the entrepreneurial mindset for all career paths, only a small percentage of the higher education student population takes part in entrepreneurially-minded learning opportunities. This gap can be attributed to several factors. From a program perspective, many degrees are already at credit capacity which allows limited room in the existing curriculum to add new courses. From a student perspective, entrepreneurship education is thus positioned as optional and requires extra time (and in some cases tuition) to do so. Finally, from an educator perspective, the majority of faculty members across the university have not been trained in entrepreneurship and may not know where to start. *Teaching the Entrepreneurial Mindset Across the University: An Integrative Approach* overcomes these challenges by providing higher education faculty with a toolkit, including tips and strategies, to integrate the entrepreneurial mindset into existing courses regardless of discipline. The book is broken into three core parts: Motivation: The importance of the entrepreneurial mindset for all students is established; Design: The Entrepreneurial Mindset Teaching Blueprint is introduced as a tool for integrating entrepreneurially-minded curricular learning experiences within existing courses; Application: Example entrepreneurially-minded curriculum from across the university are provided. By integrating the entrepreneurial mindset across the curriculum, students from all disciplinary backgrounds will be better prepared to enter the workforce, solve complex social issues, and leverage entrepreneurial thinking in their everyday lives. This book is meant for educators who want to make an impact and truly prepare graduates for the real world.
