Don't fret! You have what it takes to get the results you desire with a little help: New Knowledge is the First Step. It's hard to solve a problem if you don't understand the problem. You probably never realized that your child actually develops in 4 Dimensions: The Physical, Mental, Emotional, and Spiritual. Neglecting even one dimension can be a source of problems. When you understand your child's capabilities (and limitations) in each of the 4 Dimensions at each specific age, you will see more clearly why he or she is acting that way. Taking Action is the Second Step. Knowledge isn't really power until it is put into action. Once you have the theory, you need practical solutions that will give you results. You need clear actions you can take with your child to help him/her develop in each dimension. Raising 4 Dimensional Children in a 2 Dimensional World is a book that gives you both!
